

THE TRAINING MANUAL

Every enquiry answered. Every deal on track.

The complete guide for agents, managers, owners and compliance officers — at the desk and in the car.

What's inside

Who does what	3		
01 Getting started	4	04 Running the brokerage	37
1.1 Signing in	5	4.1 Reports	38

Who does what

Everybody signs in to the same system and sees what their role needs. Each section of this manual says who it is for.

	AGENT	MANAGER	ADMIN	OWNER	COMPLIANCE OFFICER
See every lead in the brokerage	—	●	●	●	●
See their own leads and message them	●	●	●	●	—
Add and edit leads, book viewings	●	●	●	●	—
Give leads to agents, import and export	—	●	●	●	—
Add and change listings	—	●	●	●	—
See the brokerage's revenue	—	●	●	●	—
Invite people	—	●	●	●	—
Remove people, change channels, settle commission	—	—	●	●	—
Billing	—	—	—	●	—
Open Compliance and decide on reports	—	—	—	—	●

VIEWER

Reads leads, conversations and listings and changes nothing: for a partner or an auditor.

COMPLIANCE

Owners and admins cannot open it. By law the compliance officer's reports are kept from everybody else.

VISIBILITY

Agents see their own leads; managers and owners see everybody's. Changes to a lead stay with its own agent.

The screens in this manual show Marina Bay Properties, a sample brokerage. Its people, properties and figures are illustrative.

01

PART 1

Getting started

Signing in, finding your way round, and setting the brokerage up.

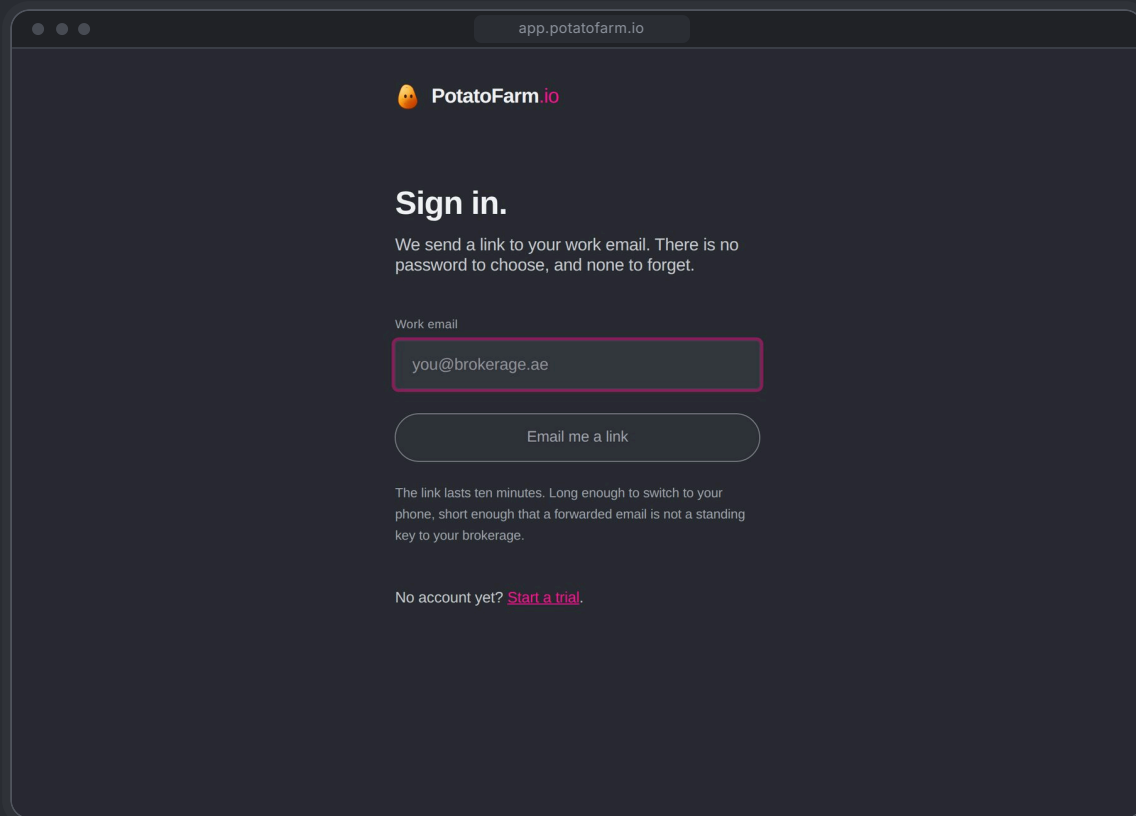

1.1 Signing in

1.2 Check your email, and two-step sign-in

1.3 Finding your way round

1.4 Search anything (Ctrl K)

1.5 Setting up a new brokerage

The sign-in screen. There is no password.

1.1 · GETTING STARTED

Signing in

FOR
Everyone

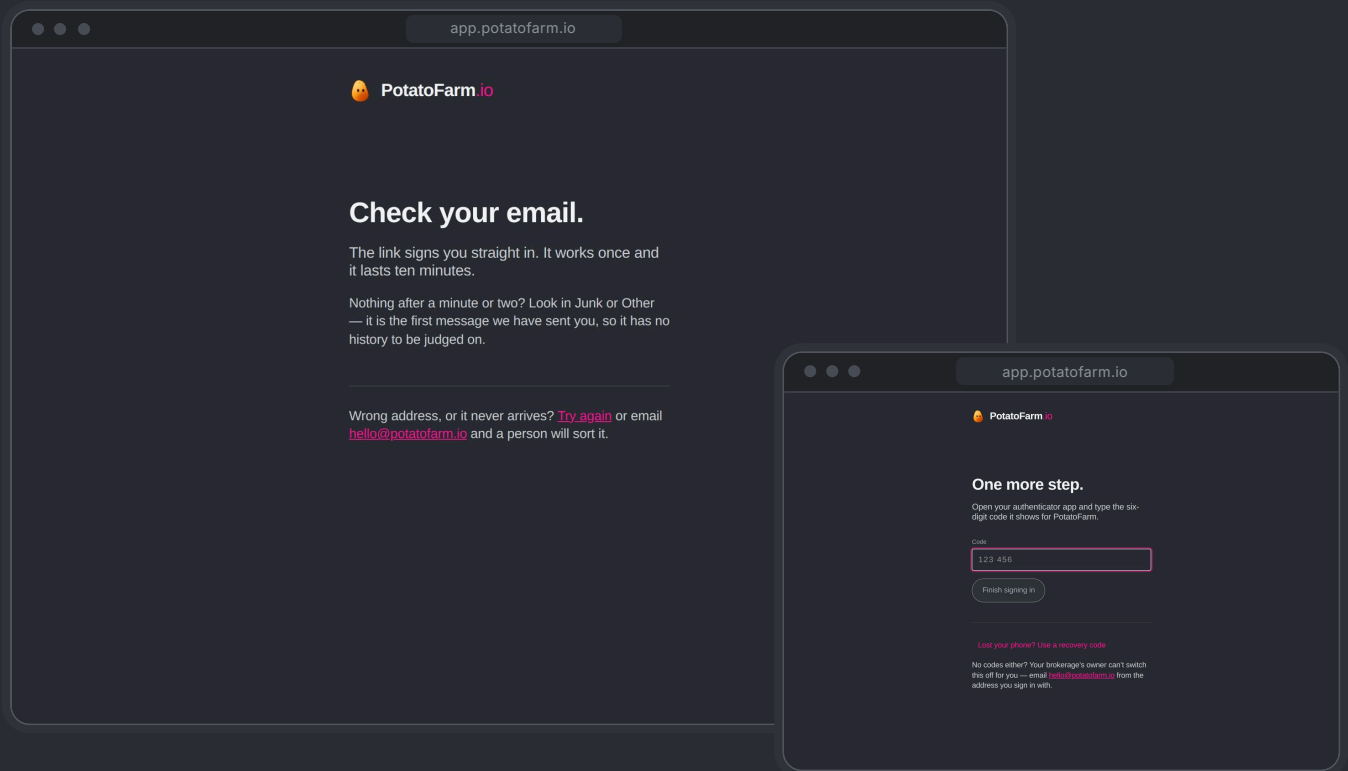

PotatoFarm.io has no passwords. You type your work email and we send you a link that signs you straight in. The link works once and lasts ten minutes, so a forwarded email is never a standing key to your brokerage.

- 01 Go to the sign-in page and type your work email.
- 02 Press **Email me a link**.
- 03 Open the email on this device (or your phone) and tap the link. You are signed in.
- 04 Nothing after a minute or two? Look in Junk or Other: it is the first message we have sent you, so it has no history to be judged on.

GOOD TO KNOW

New brokerage? Use **Start a trial** under the sign-in button. Existing brokerage? Ask your owner or manager to invite you from the Team screen.

Stay signed in on your own phone and laptop only. You can see every device you are signed in on under Settings → Security.

After pressing Email me a link. **Inset:** Two-step sign-in, if it is on for you.

1.2 · GETTING STARTED

Check your email, and two-step sign-in

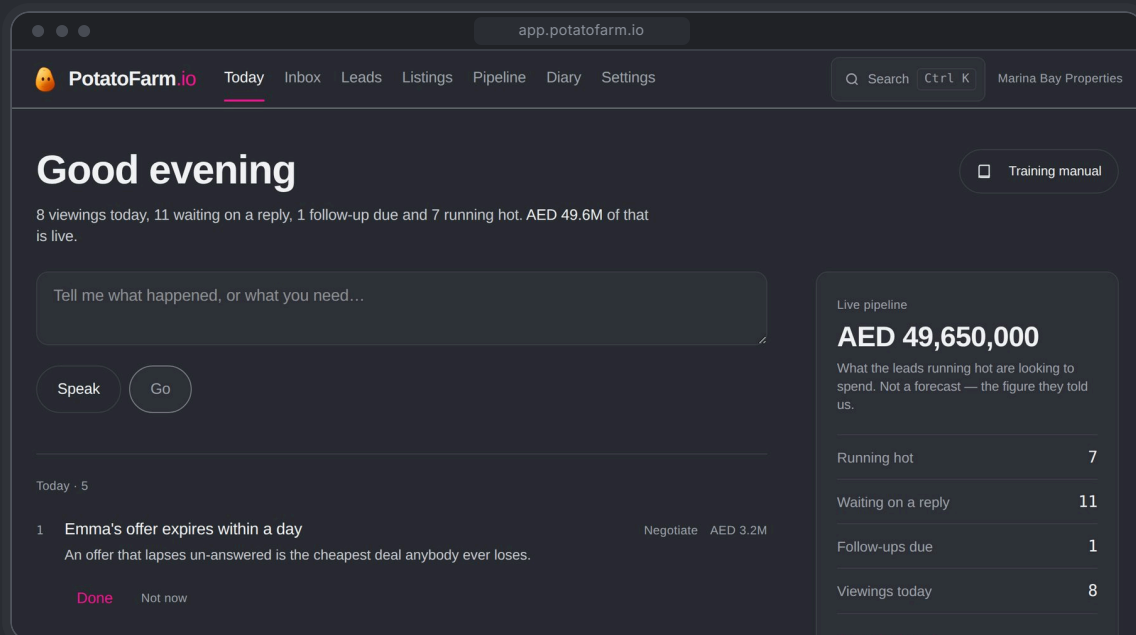

FOR
Everyone

If you have turned on two-step sign-in (strongly recommended for owners and managers), you are asked for a six-digit code from your authenticator app after the email link. Somebody who gets into your email still cannot get into your brokerage.

- 01 Open the email link as usual.
- 02 When asked for **One more step**, open your authenticator app (Google Authenticator, Microsoft Authenticator, 1Password and similar).
- 03 Type the six-digit code shown for PotatoFarm and press **Finish signing in**.
- 04 Lost your phone? Use one of the recovery codes you saved when you turned it on.

GOOD TO KNOW

Your owner cannot switch two-step off for you. That is deliberate: if they could, so could anybody who got into their account. Email hello@potatofarm.io from your sign-in address instead.

The top bar on a desktop: Today, Inbox, Leads, Listings, Pipeline, Diary and Settings.

1.3 · GETTING STARTED

Finding your way round

FOR
Everyone

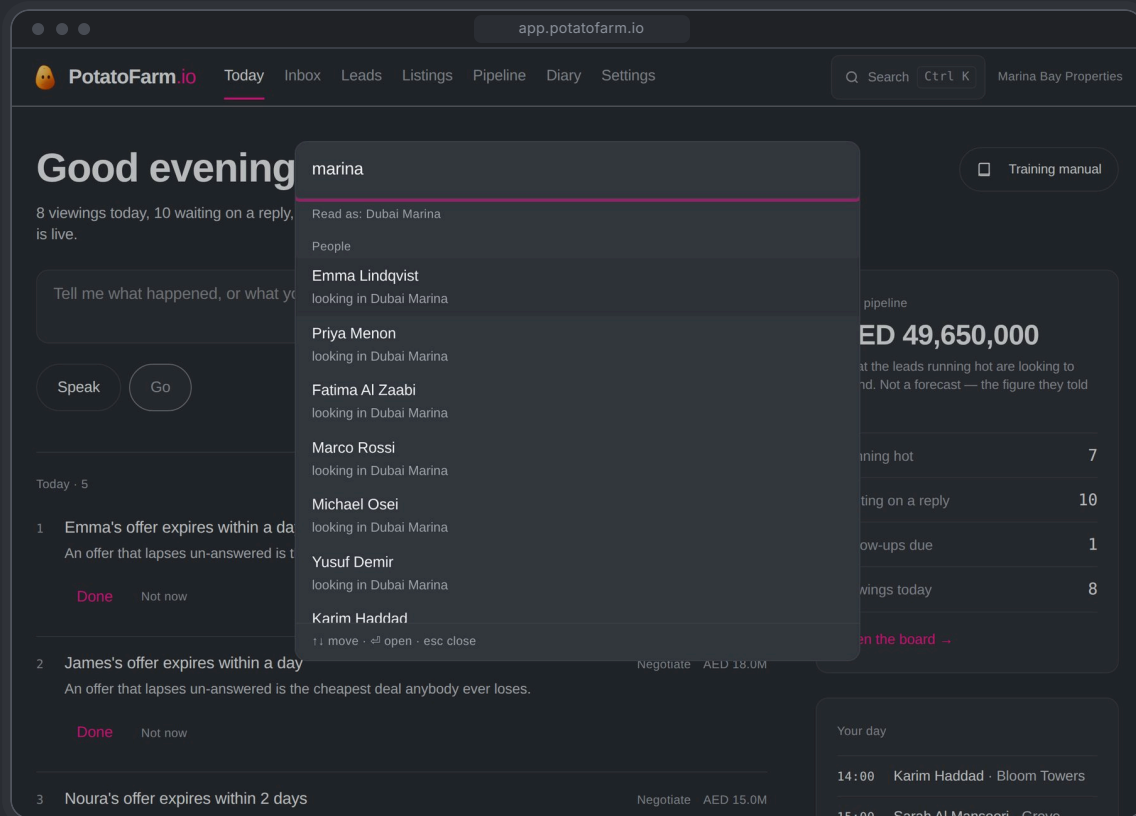

Every screen sits inside the same frame. Along the top: the seven places you go most, a search box, and the name of the brokerage you are working in. On a phone the same places move to a bar at the bottom, within reach of your thumb (see *On your phone*).

- 01 **Today:** what to do next, in order.
- 02 **Inbox:** every WhatsApp conversation.
- 03 **Leads:** everybody who has enquired, with filters.
- 04 **Listings:** your properties, permits and portals.
- 05 **Pipeline:** the board, by stage.
- 06 **Diary:** viewings.
- 07 **Settings:** everything else, including Offers, Deals, Commission, Reports, Compliance and Team.

GOOD TO KNOW

The brokerage name on the right tells you which brokerage you are in. If you work for two, check it before you message anybody.

If the assistant has been stopped, the top bar says **Assistant stopped**. Its absence is the normal state.

Press Ctrl K (⌘K on a Mac) anywhere and start typing.

1.4 · GETTING STARTED

Search anything (Ctrl K)

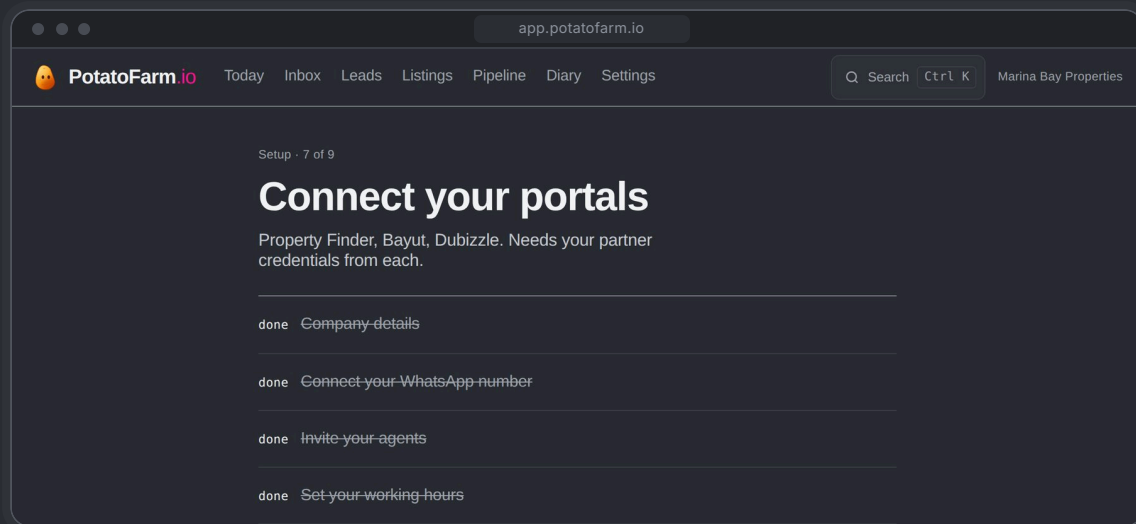

FOR
Everyone

The quickest way to anything. Press **Ctrl K** (or **⌘K** on a Mac), or click **Search** in the top bar, and type a name, a number, a building or a reference. People, owners, properties and screens all come up in one list.

GOOD TO KNOW

For questions rather than names ("3 bed in Dubai Marina under 3m"), use **Find anyone**, the first entry in the list.

- 01 Press **Ctrl K** from any screen.
- 02 Type part of a name, a phone number, a listing reference such as *MG-202*, or a screen name such as *commission*.
- 03 Use the arrow keys and **Enter**, or click, to open it.
- 04 Press **Esc** to close it.

Setup: nine steps, in the order that saves the most time.

1.5 · GETTING STARTED

Setting up a new brokerage

FOR

Owners and admins

Setup is the owner's checklist for a new brokerage. The steps are ordered so that the slow one, WhatsApp verification with Meta, starts first and runs in the background while you do the rest.

- 01 Company details:** name, timezone and currency. Two minutes.
- 02 Connect your WhatsApp number:** you are handed to Meta to verify the business. This usually takes two to three working days and none of it is in our hands, so start it first.
- 03 Invite your agents:** they can use the inbox before WhatsApp is live.
- 04 Set your working hours,** including the weekend. Viewings are only offered inside them.
- 05 Import your listings** from a CSV export or your existing portal feed. You see what was found before anything is saved.
- 06 Connect your portals** once you have partner credentials from Property Finder, Bayut or Dubizzle.
- 07 Write your qualifying questions:** the questions you would want asked on a first call.
- 08 Record where you are today:** we measure your current reply times before the assistant does anything, so the difference is yours to check.
- 09 Switch the assistant on.**

GOOD TO KNOW

Each step says **Do it** and takes you to the right screen. A step you have finished stays ticked.

02

PART 2

Your working day

Where agents spend their time: Today, the Inbox, leads, the people behind them, and the diary.

2.1 Today

2.2 The Inbox

2.3 A conversation, and the assistant's replies

2.4 Leads

2.5 Adding a lead

2.6 Importing and exporting leads

2.7 A person's page

2.8 Tasks and follow-ups

2.9 Adding a task

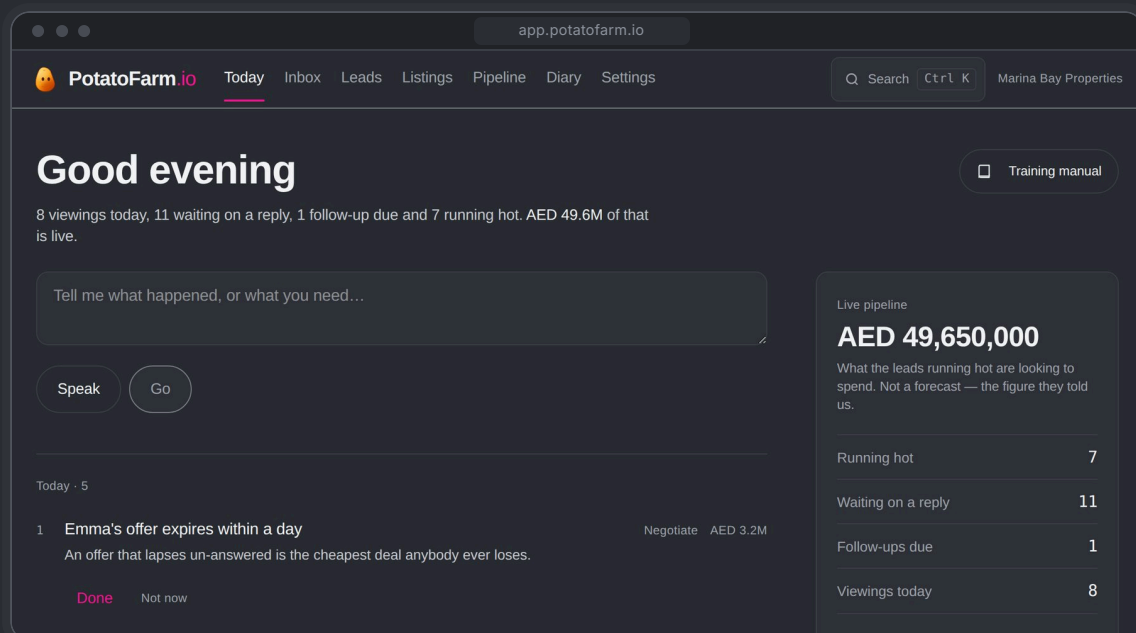

2.10 The diary and booking viewings

2.11 Say it: record by voice or text

2.12 Find anyone

2.13 Your blackbook

2.14 My figures, availability and alerts

Today for the owner: the day in one line, five things to do, deals to keep moving and follow-ups.

2.1 · YOUR WORKING DAY

Today

FOR
Everyone

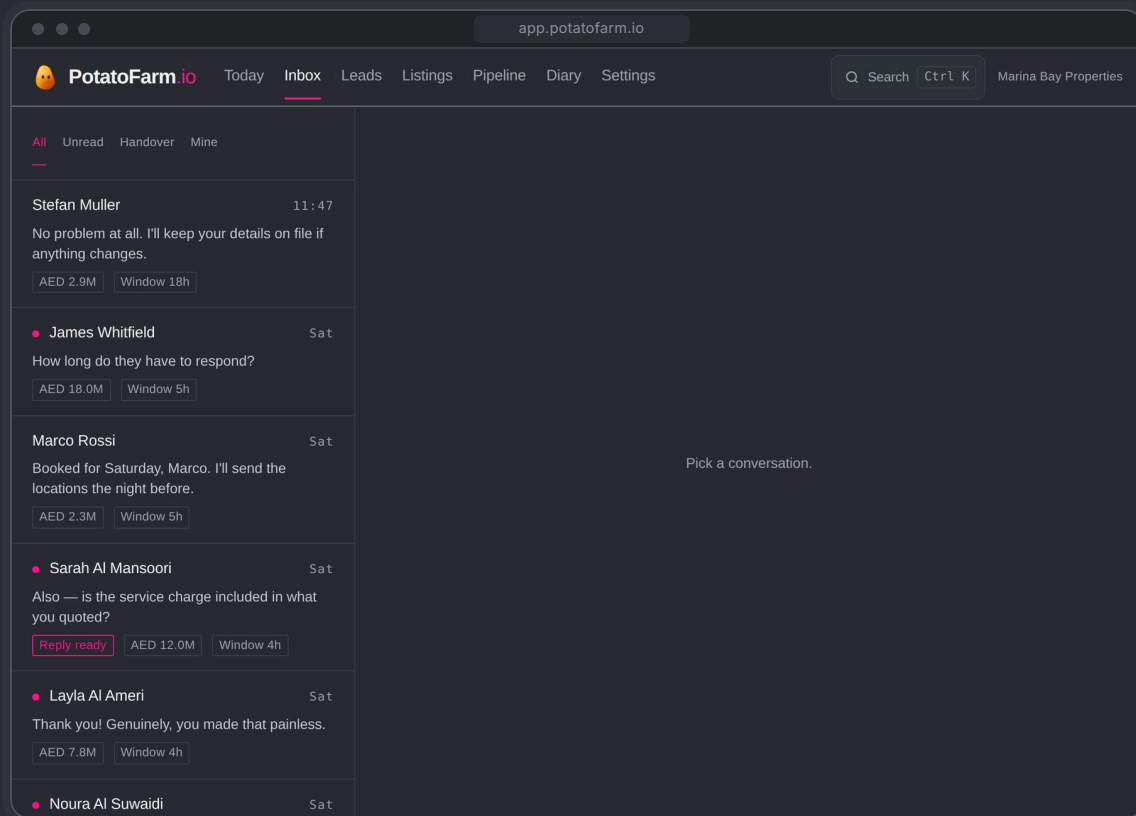

Today is the first screen you open. It is not a dashboard of numbers. It is a short list of what to do next, in order, each with the reason it is there. An offer about to lapse outranks a warm lead, because that is the deal you actually lose.

- 01 Read the line at the top: viewings today, people waiting on a reply, follow-ups due, and what is live.
- 02 Work down **Today** from 1 to 5. Each item says what to do (Negotiate, Follow up, Send, Log outcome) and why.
- 03 Press **Done** when it is done, or **Not now** to move it out of the way for today.
- 04 Check **Deals to keep moving**: completions that are no longer achievable, and what to agree.
- 05 Clear **Follow-ups**. Some carry a draft message; press **Show the draft** to read it before you send anything.
- 06 Use the box at the top, *Tell me what happened, or what you need*, to record something quickly by typing or with **Speak**.

GOOD TO KNOW

"Reply to Stefan before the window shuts" means the WhatsApp reply window is about to close. After that a normal message is accepted by WhatsApp and never delivered. Reply first, tidy up later.

Managers and owners also see the whole brokerage's figures on the right: live pipeline, running hot, waiting on a reply and viewings today.

The conversation list. Tags show the budget, whether a reply is ready, and how long the reply window has left.

2.2 · YOUR WORKING DAY

The Inbox

FOR

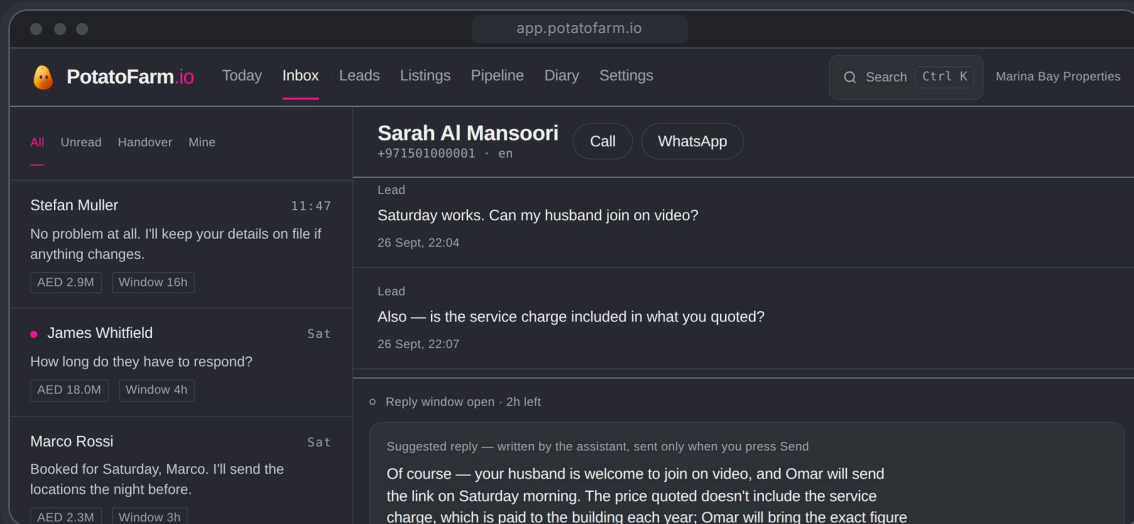

Agents · Managers

Every WhatsApp conversation with a buyer or an owner, newest first. Each row tells you what you need before you open it: the last message, the budget, **Reply ready** if the assistant has drafted one, **Handover** if a person is needed, and the reply window.

GOOD TO KNOW

The reply window is WhatsApp's rule, not ours: businesses may send free-form messages only within 24 hours of the customer's last message. PotatoFarm.io checks it before every send.

- 01 Use the filters along the top: **All**, **Unread**, **Handover** (the assistant has asked for a person) and **Mine**.
- 02 A pink dot means unread.
- 03 **Window 11h** means you can message normally for 11 more hours. **Window closed** (dashed) means a normal message will not arrive: use an approved template, or ring them.
- 04 Click a conversation to open it on the right.

Sarah's conversation. The assistant qualified her; Omar took over; the assistant has drafted a reply for Omar to send.

2.3 · YOUR WORKING DAY

A conversation, and the assistant's replies

FOR

Agents · Managers

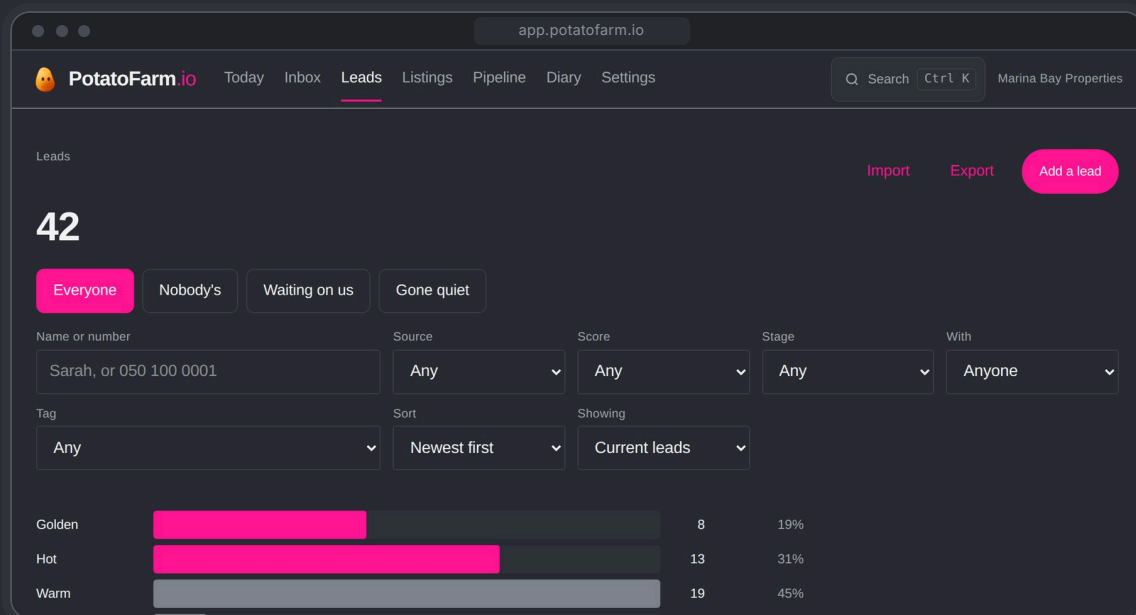

Open a conversation to see the whole thread, who wrote what (the buyer, the assistant, or you), the reply window, and any reply the assistant has prepared.

- 01 While a new buyer is being qualified, the assistant replies by itself in their language, one question at a time, if your owner has switched that on (Settings → Assistant). It never claims to be a person.
- 02 Once you have written in a conversation, or the buyer is qualified, the assistant stops sending and drafts instead. The draft appears above the reply box as *Suggested reply*.
- 03 Press **Send as written** to send it, **Edit** to change it first, or **Discard** to throw it away.
- 04 To write your own, type in **Write a reply...** and press **Send**. **Attach** sends a brochure, floor plan or document. **Send a property** puts a property's page into your reply.
- 05 **I've got this** silences the assistant on this conversation only, for a delicate negotiation. **Hand back** gives it back.
- 06 **Call** and **WhatsApp** at the top open your phone's dialler or WhatsApp with the number ready.

GOOD TO KNOW

Below the thread: **Identity** says whether a compliance file is needed and takes the passport or Emirates ID they give you; one sent on WhatsApp has **Add to file** beneath it. Only the compliance officer sees it. **How this came to you** shows why the lead reached you; if it should not have, say so there and a manager sees it.

What you do with each draft (sent as written, edited, discarded) is recorded. It is how your owner decides how much to trust the assistant.

Leads: tabs, filters, score bands and every person with their source, agent and what is happening.

2.4 · YOUR WORKING DAY

Leads

FOR

Agents · Managers

Everybody who has enquired, from every source, in one list. Agents see their own leads; managers and owners see everybody's.

GOOD TO KNOW

Import and **Export** (managers) bring a spreadsheet of leads in, or take one out.

- 01 Use the tabs: **Everyone**, **Nobody's** (unassigned), **Waiting on us** (they wrote last) and **Gone quiet**.
- 02 Search by name or number, and filter by **Source**, **Score**, **Stage**, agent (**With**) and **Tag**. **Sort** by newest, score, name or last changed.
- 03 The score bands (Golden, Hot, Warm, Cold) show how likely each person is to transact. The line under each name says why: "warming — up 19 points this week · 1 offer made".
- 04 Click a name to open their page.
- 05 Tick several people (or **Select all shown**) to act on them together: give them to an agent, move them to a stage, tag them, archive them or delete them.
- 06 **Showing** switches between current leads, archived ones and recently deleted ones (which can be restored).

The screenshot shows the app.potatofarm.io interface. On the left, a modal titled 'Add a lead' is open. It contains the following fields and options:

- Mobile:** A text input with the value '+971 50 123 4567'. Below it, a note says 'With the country code — it is how this buyer is recognised next time.'
- Name:** A text input with the value 'Aisha Khan'.
- Email:** An empty text input.
- How they came to us:** A dropdown menu with 'Walked in' selected.
- What they said:** A text area with the value 'Two-bed in Marina, moving in September, cash.'
- Buttons:** 'Cancel' and 'Add them' (in red).

On the right, the main interface shows a header with 'Diary' and 'Settings', a search bar, and 'Marina Bay Properties'. Below this are 'Import', 'Export', and 'Add a lead' buttons. A table displays lead statistics:

Score	Stage	With
Any	Any	Anyone
Showing		
Current leads		
8	19%	
13	31%	
19	45%	
2	5%	
0	—	

At the bottom, there is a section 'Not scored yet' with a 'Select all shown' checkbox and a list of leads, including 'Zeinab Farouk' with status 'Warm 55', 'Walk in', and 'Omar Haddad' with status 'negotiating - never replied'.

Add a lead: somebody who walked in, rang, or was referred.

2.5 · YOUR WORKING DAY

Adding a lead

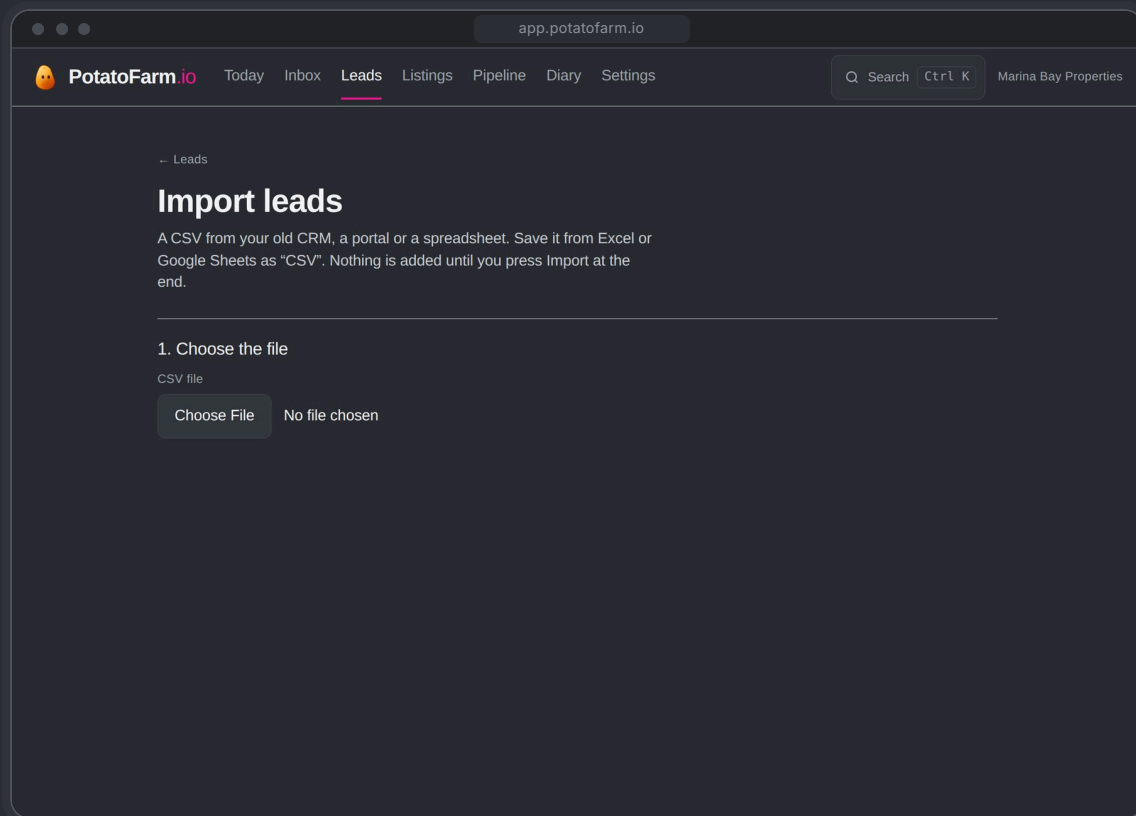

FOR
Agents · Managers

Most leads arrive by themselves, from WhatsApp, the portals, your website form or Facebook and Instagram lead ads. Add one by hand for a walk-in, a phone call or a referral.

GOOD TO KNOW

A walk-in you add yourself stays with you.

- 01 On Leads, press **Add a lead**.
- 02 Type their **mobile** number with the country code (+971...). A number is enough: it is how WhatsApp knows them, and how they are recognised next time.
- 03 Add their name and email if you have them, choose **How they came to us** (walked in, referral, phone call and so on), and note **What they said**.
- 04 Press **Add them**. They go on the board and to whoever routing picks.
- 05 If the number is already on the book, you are told who has them rather than getting a duplicate.

Import leads from a CSV. Nothing is added until you press Import at the end.

2.6 · YOUR WORKING DAY

Importing and exporting leads

FOR

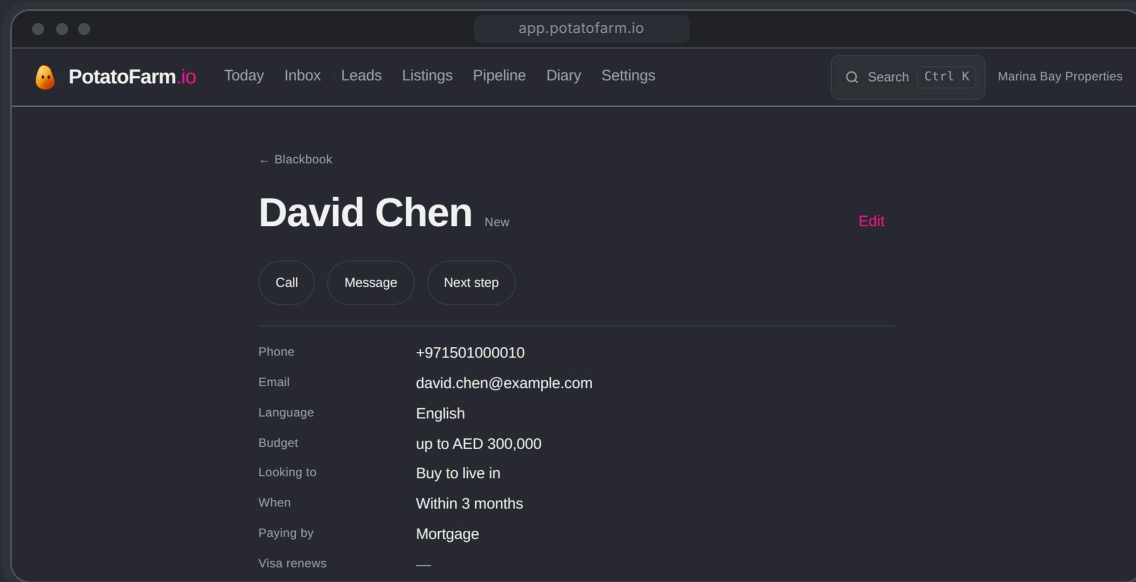

Managers · Owners and admins

Bring your book across from another CRM, a portal or a spreadsheet. Save it from Excel or Google Sheets as a CSV first.

GOOD TO KNOW

Only managers and owners can import and export. An export is every client's number in one file.

- 01 On Leads, press **Import**, then choose the file.
- 02 Match your columns to ours on screen: name, phone, email, source, budget and so on.
- 03 Check what will be created, and which rows will not come across and why.
- 04 Press **Import**. Every import is recorded with a count.
- 05 To take a copy out, press **Export** on Leads.

David Chen: contact details, what he wants, other business with him, next step, private notes and everything that has happened.

2.7 · YOUR WORKING DAY

A person's page

FOR

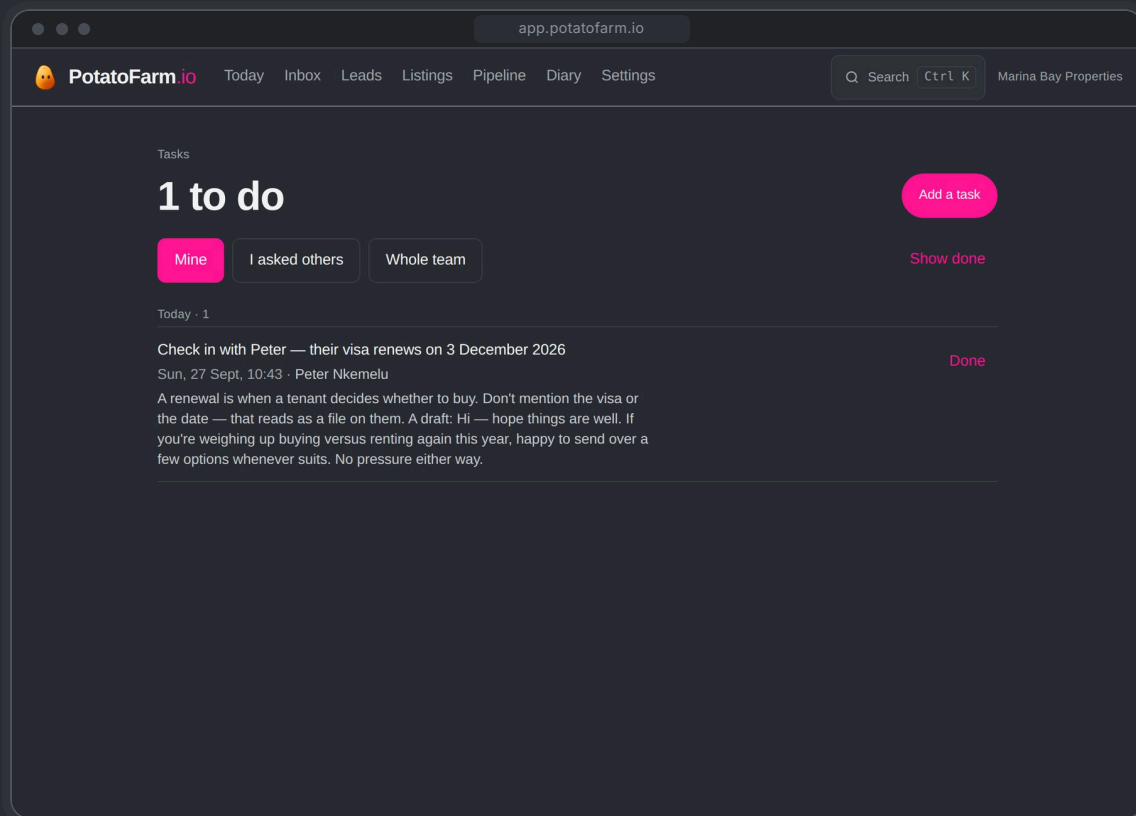

Agents · Managers

Everything about one person on one page. Open it from Leads, the Inbox, the Pipeline or search.

- 01 The three buttons under the name, **Call**, **Message** and **Next step**, are the things you do most.
- 02 **Edit** changes their details: language, budget, what they are looking to do, when, how they are paying, and a visa renewal date if they mentioned it (never ask for it). The phone number is fixed: it is their WhatsApp identity.
- 03 **What they're looking for** is the search that matches them to properties. The assistant fills it in from the conversation; yours wins once you change it. **Add another search** if they want two things.
- 04 **Other business with them:** the buyer who is also letting their villa. Add it, give it a value and an agent, and move it along its own column on the board.
- 05 **Next step:** add a task. **Nurture plan:** put somebody who is "six months away" on a plan of reminders.
- 06 **Your note** is private to you. No manager sees it.
- 07 Underneath is the whole history: messages, viewings, offers and emails, newest first.

GOOD TO KNOW

If the reply window has closed, the page says so. Use an approved template, or ring them.

Tasks: yours, the ones you asked others for, and the whole team's.

2.8 · YOUR WORKING DAY

Tasks and follow-ups

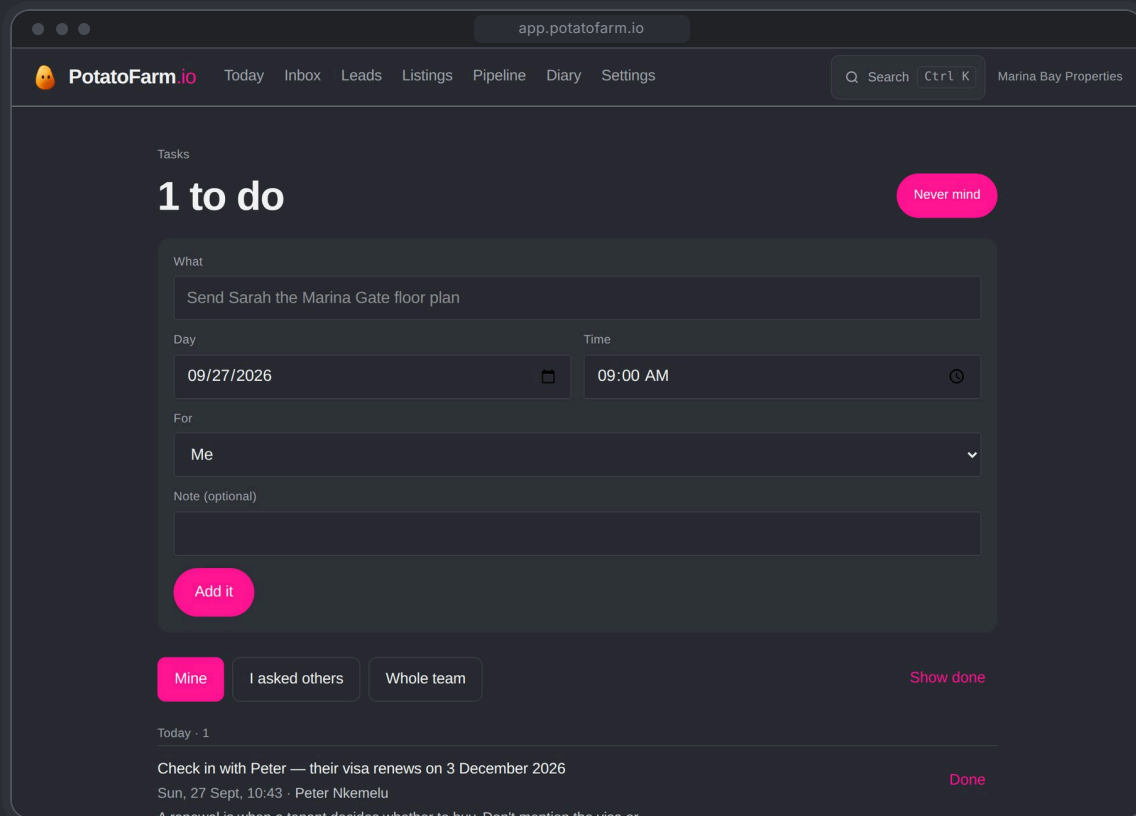

FOR
Agents · Managers

Everything you have said you will do, and the follow-ups PotatoFarm.io has put on your list: asking how a viewing went, checking in at a visa renewal, the next step of a nurture plan. Many come with a draft message; nothing is ever sent by itself.

GOOD TO KNOW

"Don't mention the visa or the date" on a renewal task is deliberate: it reads as a file on them. Just check in.

- 01 Switch between **Mine**, **I asked others** and **Whole team**.
- 02 Press **Add a task** to write one, for yourself or a colleague, with a due date.
- 03 Read the draft if there is one, send it yourself, then press **Done**.
- 04 **Show done** brings back what you have finished.

Add a task: what, for whom, and when.

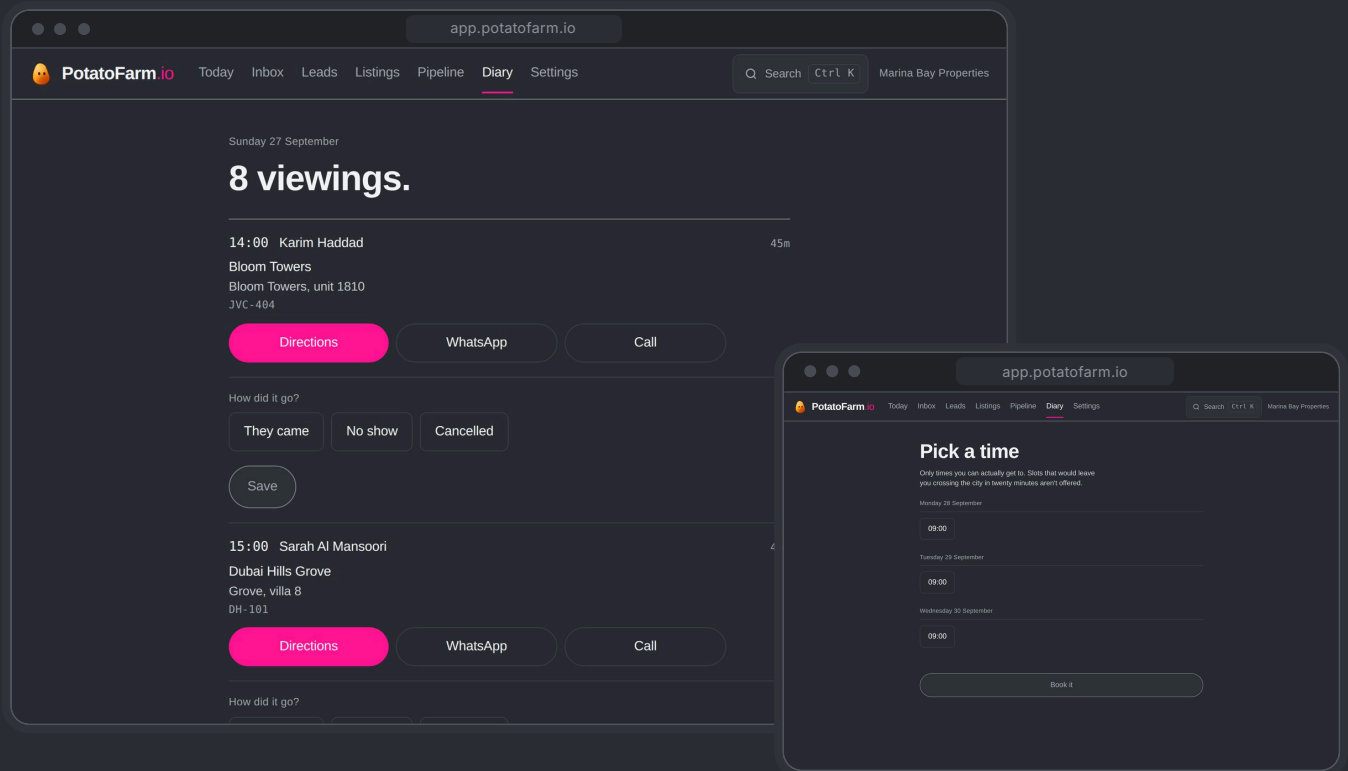

2.9 · YOUR WORKING DAY

Adding a task

FOR
Agents · Managers

A task is a promise with a date on it. Give it to yourself, or ask a colleague.

- 01 Press **Add a task**.
- 02 Write **What** needs doing, pick the **Day** and **Time**, and choose **For**: yourself or a colleague.
- 03 Add a note if it helps, and press **Add it**. It appears on their Today and their Tasks.
- 04 To add a task about a particular person, use **Next step** on their page instead: it is linked to them.

The diary: today's viewings, in order. **Inset:** Book a viewing: only times you can actually get to.

2.10 · YOUR WORKING DAY

The diary and booking viewings

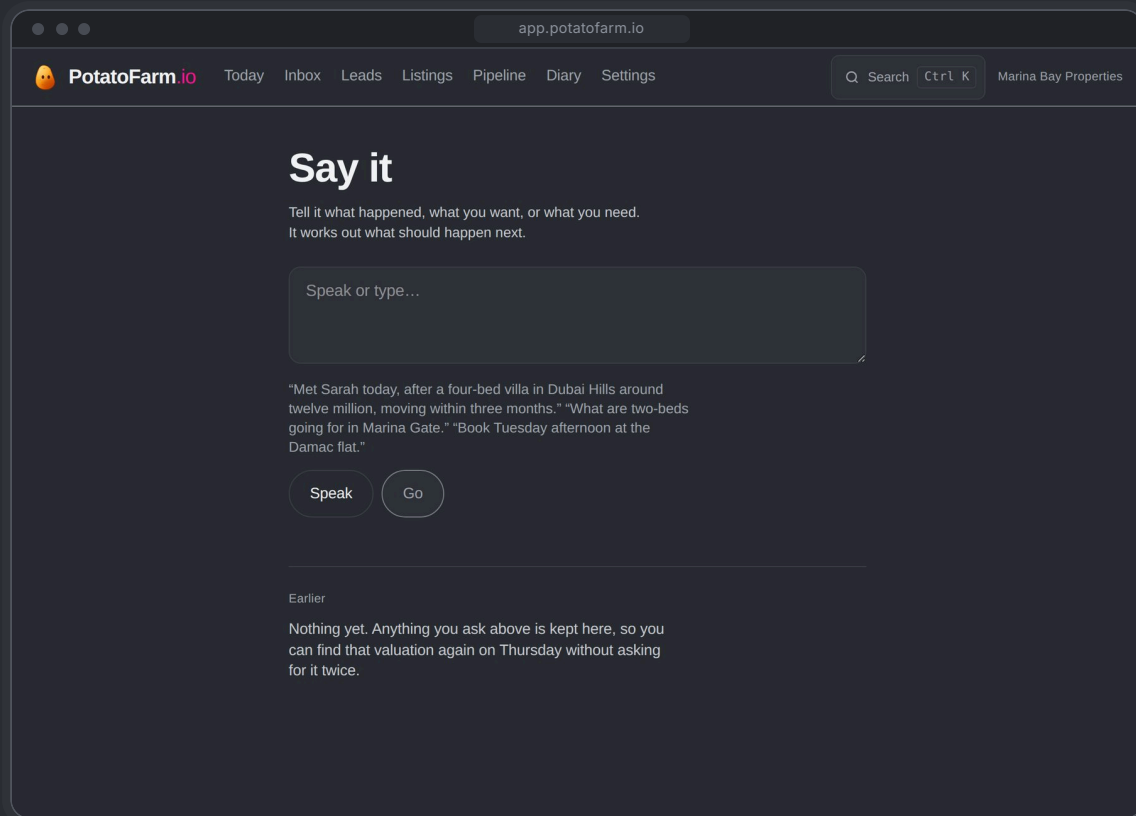

FOR
Agents · Managers

Every viewing, by day. Booking only offers times inside your brokerage's working hours and times you can actually reach, so you are never offered a slot that leaves you crossing the city in twenty minutes.

GOOD TO KNOW

Your viewings can appear in your own phone calendar: Settings → **Create my calendar link**.

- 01 Open **Diary** to see today's viewings in order: the time, the client, the property and its reference.
- 02 Each viewing has **Directions**, **WhatsApp** and **Call**. **Move it** changes the time.
- 03 To book, pick a time from the offered slots and press **Book it**.
- 04 After the viewing, record what happened: they came, they did not, and what they thought. Today reminds you ("How did the viewing go?") until you do.
- 05 The owner's weekly report counts the feedback; the buyer's own words stay with you.

Say it: tell it what happened, and it works out what should happen next.

2.11 · YOUR WORKING DAY

Say it: record by voice or text

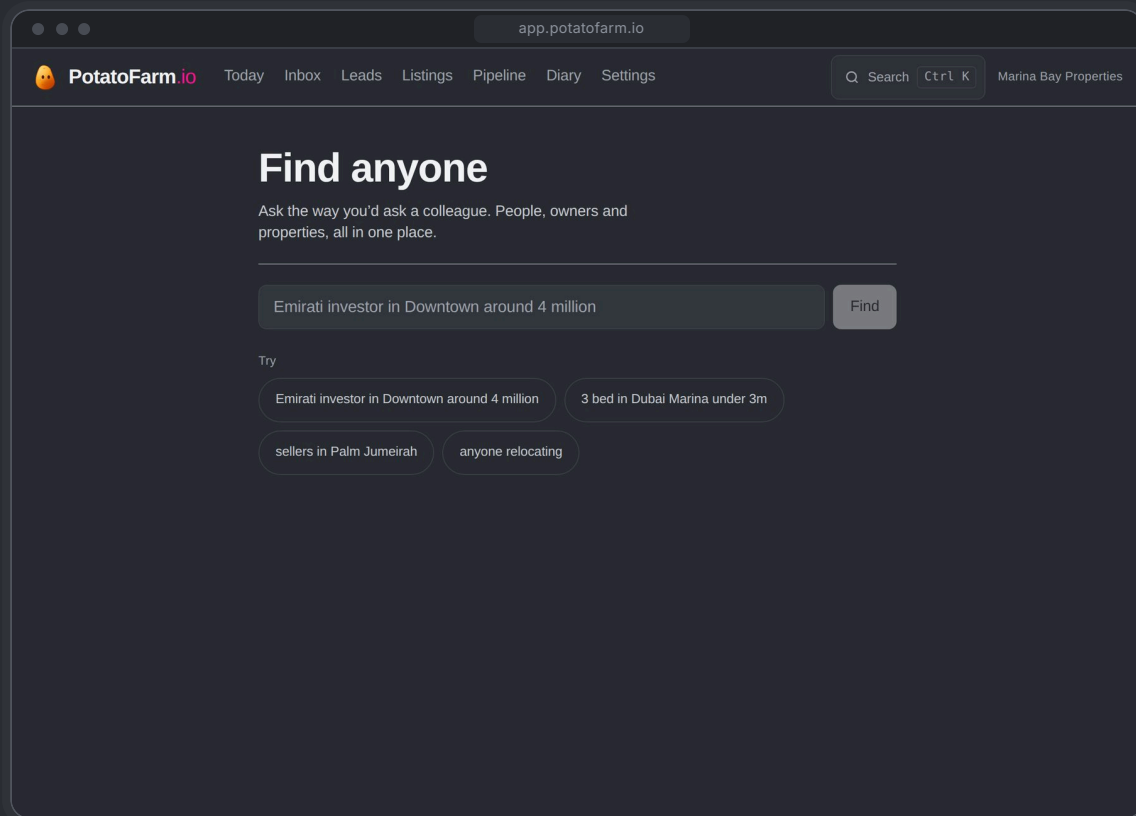

FOR
Agents

The fastest way to get something out of your head and into the system, between viewings or in the car. Type or speak a sentence and it works out what to record and what to do next.

GOOD TO KNOW

It prepares; you confirm. It never sends anything to a client.

- 01 Open **Ask** (from Search, or the box on Today).
- 02 Type, or press **Speak** and talk: "Met Sarah today, after a four-bed villa in Dubai Hills around twelve million, moving within three months."
- 03 Press **Go**. You see what it understood, and it is kept under **Earlier**.

Find anyone: ask the way you would ask a colleague.

2.12 · YOUR WORKING DAY

Find anyone

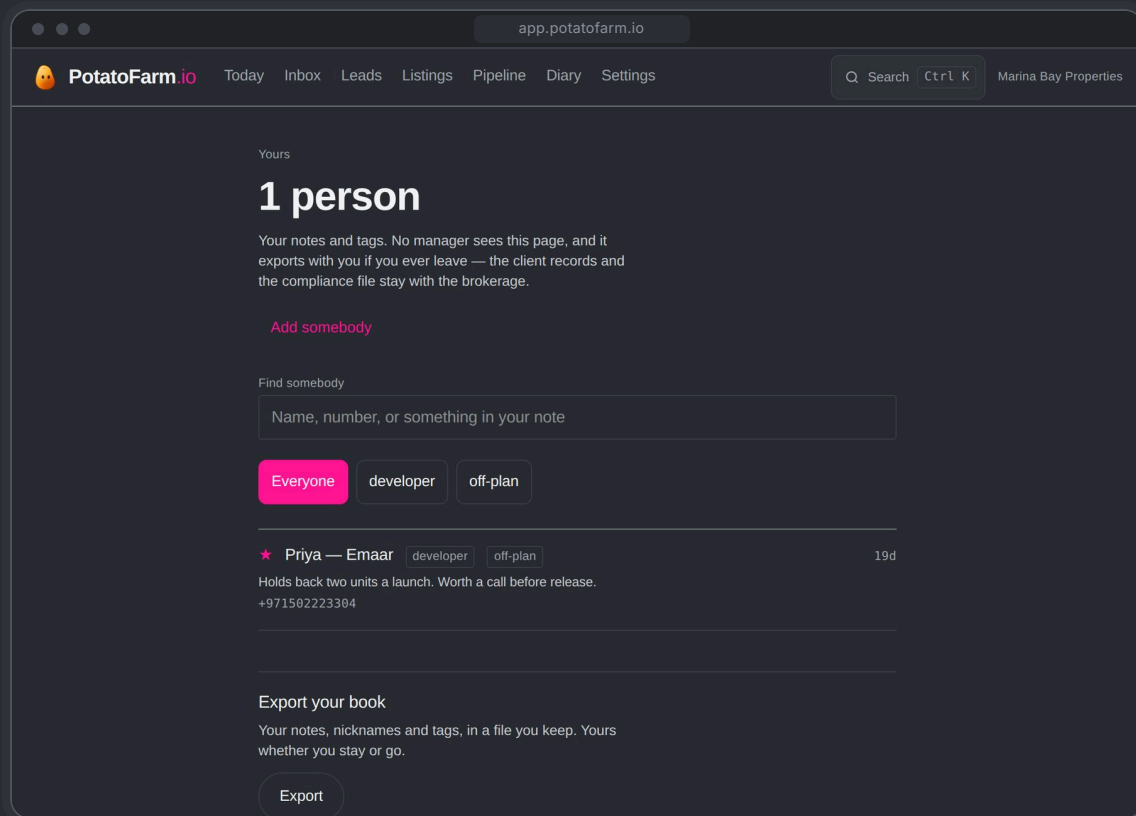

FOR
Everyone

Search in plain words, across people, owners and properties at once.

- 01 Type a question the way you would ask a colleague: *3 bed in Dubai Marina under 3m, sellers in Palm Jumeirah, anyone relocating.*
- 02 Press **Find**. Results are grouped by people, owners and properties.

GOOD TO KNOW

Area names are understood as places: "Dubai Hills" finds listings filed under "Dubai Hills Estate".

Your blackbook: your own contacts, notes and tags.

2.13 · YOUR WORKING DAY

Your blackbook

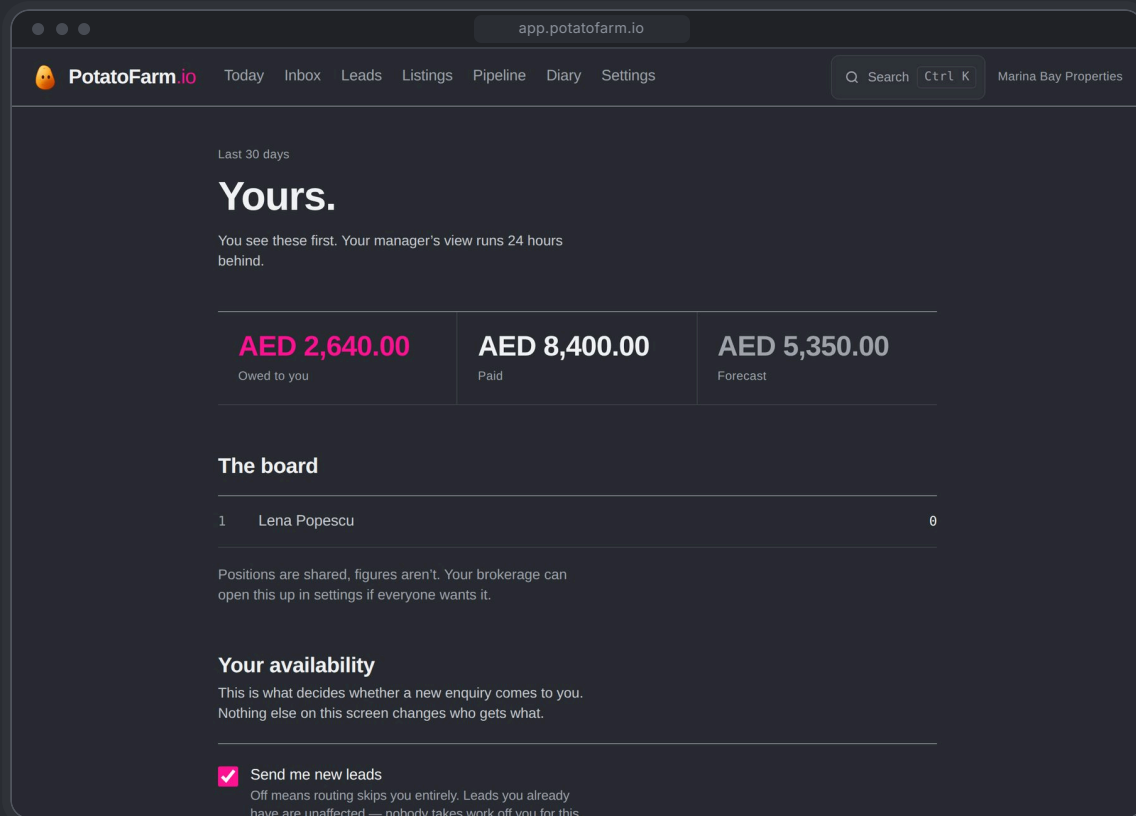

FOR
Agents

Your personal book of contacts: the developer's sales manager, the mortgage broker, the building manager. Your notes and tags are yours. No manager sees this page, and you can export it and take it with you if you ever leave.

GOOD TO KNOW

Client records and compliance files belong to the brokerage and stay with it. Your blackbook is yours.

- 01 Press **Add somebody**, give them a name, number, tags and a note.
- 02 Filter by tag, or star the ones you call most.
- 03 **Export your book** downloads your notes, nicknames and tags.

Yours: your figures for the last 30 days, whether you are taking new leads, and when not to buzz you.

2.14 · YOUR WORKING DAY

My figures, availability and alerts

FOR
Agents

Your own page: what you are owed, where you rank, whether you are taking new leads, and when alerts may reach you.

GOOD TO KNOW

Quiet hours are in Dubai time, so they do not move when you travel.

- 01 See what you are owed, what has been paid and what is forecast.
- 02 **Send me new leads:** switch off and routing skips you. Leads you already have are not taken away.
- 03 **Away:** set the first and last day you are off, with an optional note.
- 04 **When not to buzz you:** quiet hours and days off. Anything that arrives then is held and sent once you are back, in one message. **Let urgent things through anyway** keeps a buyer waiting mid-conversation from being held.

03

PART 3

Properties and deals

Listings, owners, the pipeline, offers, deals and the money that follows.

3.1 Listings

3.2 Adding a property

3.3 The page a buyer sees

3.4 Owners (vendors)

3.5 The pipeline

3.6 Offers

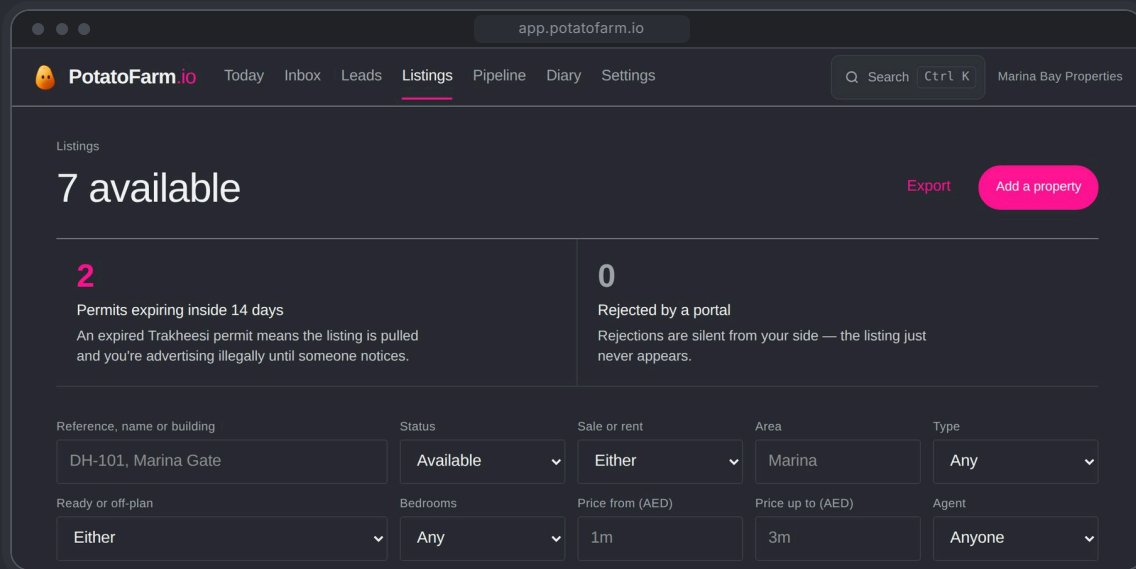

3.7 Recording an offer

3.8 Deals

3.9 Commission

3.10 Revenue

3.11 Documents: permits, cards and licences

Listings: permits about to expire, portal rejections, filters and every property.

3.1 · PROPERTIES AND DEALS

Listings

FOR

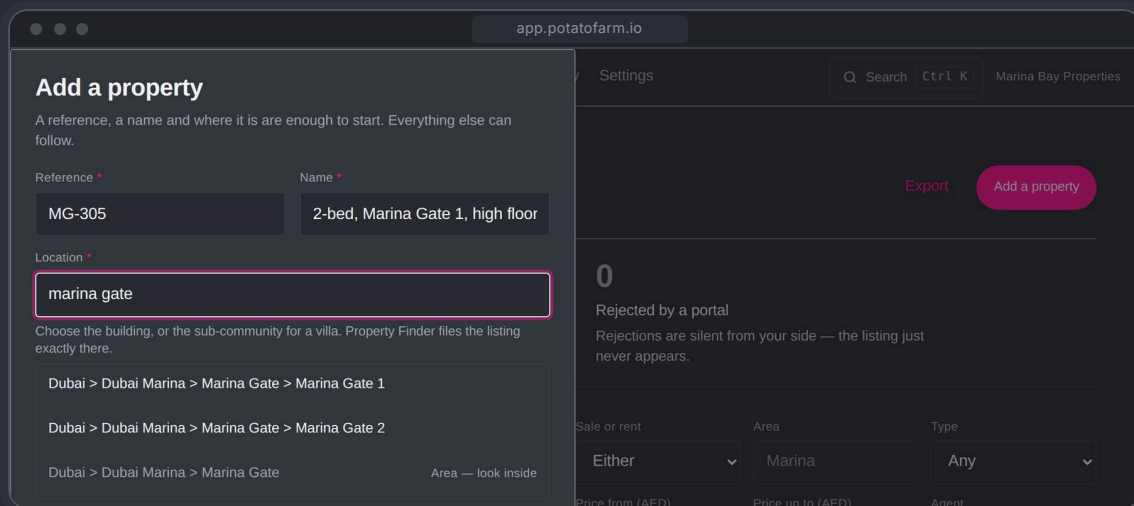

Agents · Managers

Every property on the book, with its price, portals and Trakheesi permit. The two panels at the top are the ones that cost money when missed: permits expiring inside 14 days, and listings a portal has rejected.

GOOD TO KNOW

A listing will not publish without a photo and a valid permit, and Property Finder will not take one without an exact location.

- 01 Filter by status, sale or rent, area, type, ready or off-plan, bedrooms, price and agent. **Export** downloads the list.
- 02 Each row shows where the property is and the days left on its permit. An expired Trakheesi permit means you are advertising illegally.
- 03 A property added before locations were required says **No exact location** in red. Press **Edit** and choose it.
- 04 **Edit** changes the details. **Photos** adds and orders its photographs; the first is the cover. **Check wording** checks the advert for claims that break the rules. **Who wants it** lists matching buyers. **Publish** queues it for the portals. **Owner** sets the owner and the agent looking after it. **Share link** gives you its own page to send.

Add a property: where it is, chosen from the location list, then the details a buyer asks about first.

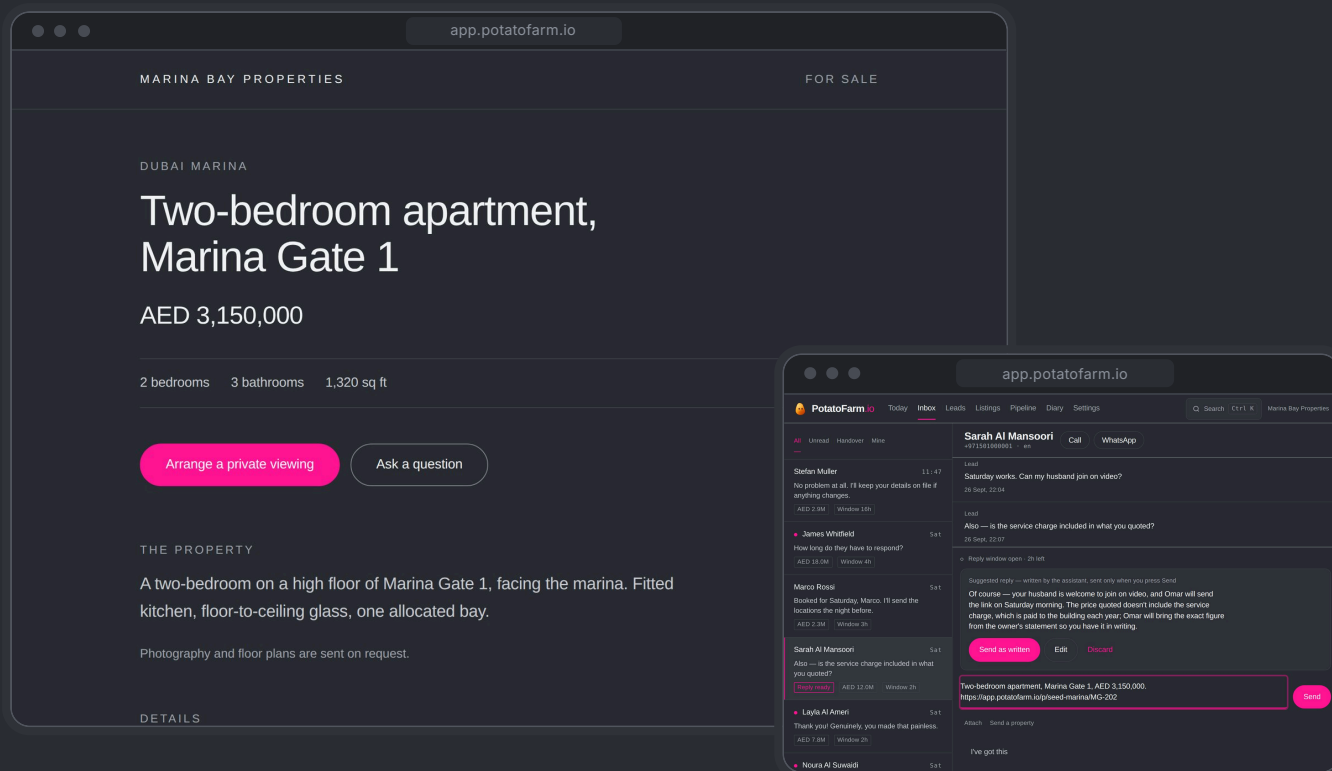

3.2 · PROPERTIES AND DEALS

Adding a property

FOR
Managers

Add a property by hand. Each one is filed under its exact place, so search, matching and the portals all read the same one.

- 01 On Listings, press **Add a property**. A reference, a name and where it is are enough to start; everything else can follow.
- 02 Under **Location**, type the building, sub-community or area and choose the exact place: the building, or the sub-community for a villa. An area is marked *Area — look inside*; choosing it shows the places inside it.
- 03 Add the bedrooms, bathrooms, area and price, then the type, ready or off-plan, for sale or to rent, and its status.
- 04 Under **Trakheesi permit**, enter the permit number and expiry, and the RERA broker card. The permit is needed before it can be advertised.
- 05 Off-plan and rental details are further down if they apply.
- 06 Press **Add it**. It appears on Listings, and **Who wants it** immediately lists matching buyers.

A property's own page, in your brokerage's name: what a buyer opens from a link you send. **Inset:** Send a property: its name, price and link, in your reply, for you to send.

3.3 · PROPERTIES AND DEALS

The page a buyer sees

FOR
Everyone

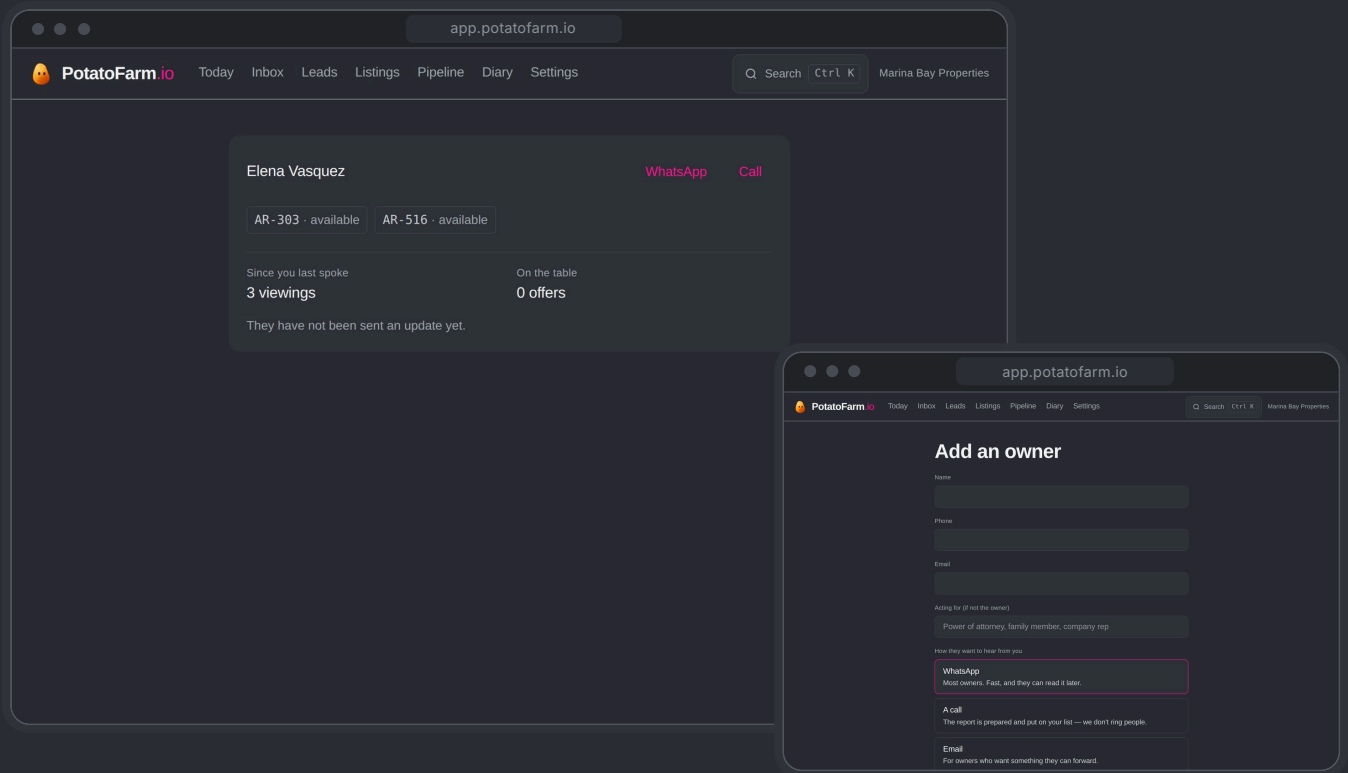

Every available property with a valid permit has its own page, in your brokerage's name, signed "Powered by PotatoFarm.io" at the foot. Send the link and WhatsApp shows a preview card: the property, its price and your brokerage's name.

- 01 On Listings, press **Share link**. At a desk the link is copied; on a phone your share sheet opens, WhatsApp included.
- 02 In a conversation, press **Send a property**, find it by reference, name or building, and pick it. Its name, price and link go into your reply; read it and press **Send**.
- 03 The buyer sees the property, its details, you as their agent, and the permit, which the law requires on every advert.
- 04 **Arrange a private viewing** and **Ask a question** open WhatsApp to your brokerage's number with the property already named, so it arrives in the Inbox as an enquiry about the right property.

GOOD TO KNOW

A property that is not available, or has no valid permit, has no page. **Share link** says why instead of sending a dead link.

The price on the page is always the current one. Change it on Listings and every link you have sent shows the new price.

An owner's page: their properties, and what has happened since you last spoke. **Inset:** Add an owner, and how they want to hear from you.

3.4 · PROPERTIES AND DEALS

Owners (vendors)

FOR
Agents · Managers

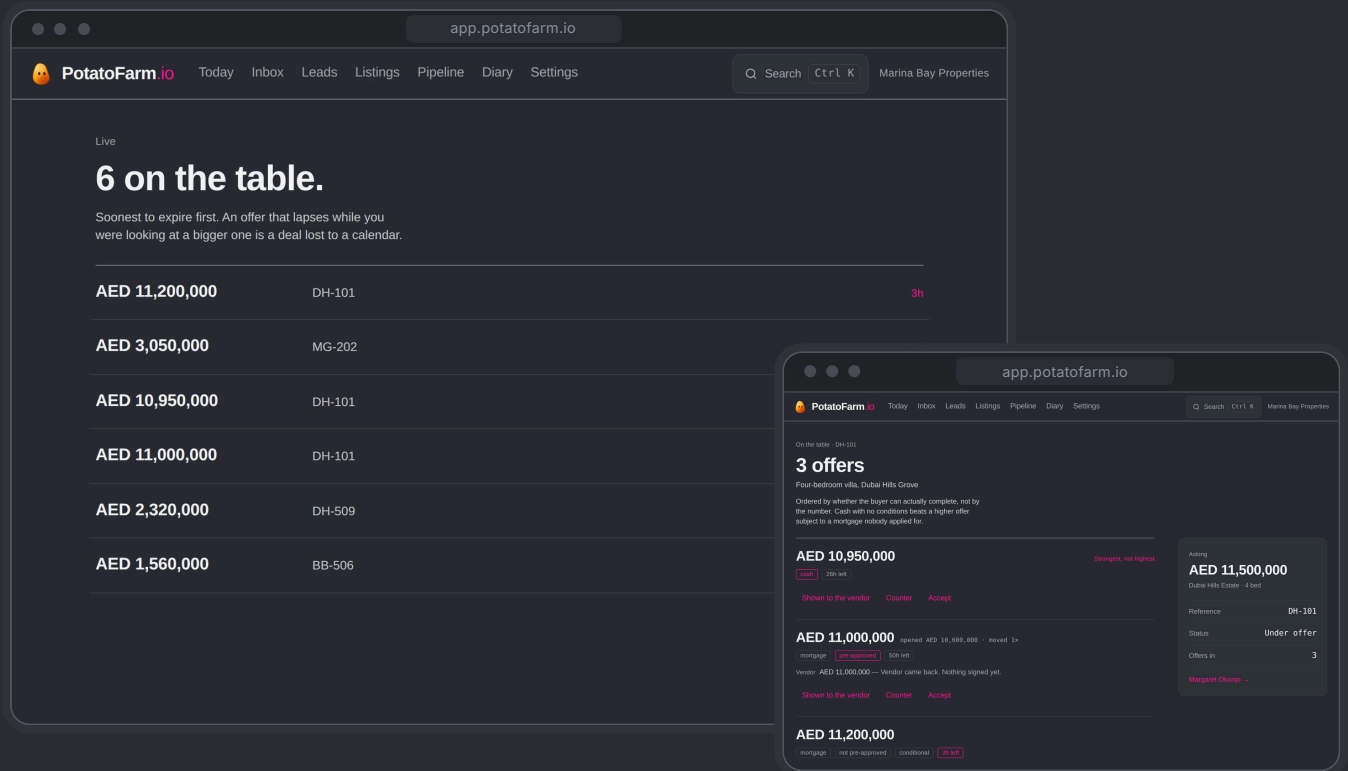

The seller side. Each owner has a page with their properties, viewings and offers, and the weekly report they receive.

- 01 Open an owner from a listing's **Owner** button, or add one with **Add an owner**.
- 02 Choose how they want to hear from you: **WhatsApp, a call** (the report is prepared and put on your list; we do not ring people), **email**, or **only when there's an offer**.
- 03 Pick the day for their weekly report. A quiet week is still worth sending: an owner who hears nothing assumes you have stopped trying.

GOOD TO KNOW

"Only when there's an offer" is a real instruction. Ringing that owner for a chat is the fastest way to lose the property.

An owner who writes to your WhatsApp number lands on their own conversation, not as a new buyer.

Offers on the table, soonest to expire first. Inset: One property's offers, strongest first.

3.6 · PROPERTIES AND DEALS

Offers

FOR
Agents · Managers

Every live offer, soonest to expire first, because an offer that lapses while you were looking at a bigger one is a deal lost to a calendar. Open a property to see its offers ranked by strength, not price.

GOOD TO KNOW

"Strongest, not highest" is the label to show an owner. It is the conversation that wins you the instruction next time.

- 01 Open **Offers** to see everything on the table and how long each has left.
- 02 Click a property. Offers are ordered by whether the buyer can actually complete: cash with no conditions beats a higher offer subject to a mortgage nobody has applied for.
- 03 Press **Counter** to record the owner's counter. Offers are never edited: each move is kept, so the negotiation is on record.
- 04 Press **Accept** when the owner agrees. A deal is created and, if needed, a compliance file opens.

Record an offer: the amount, how they are paying, conditions and when it expires.

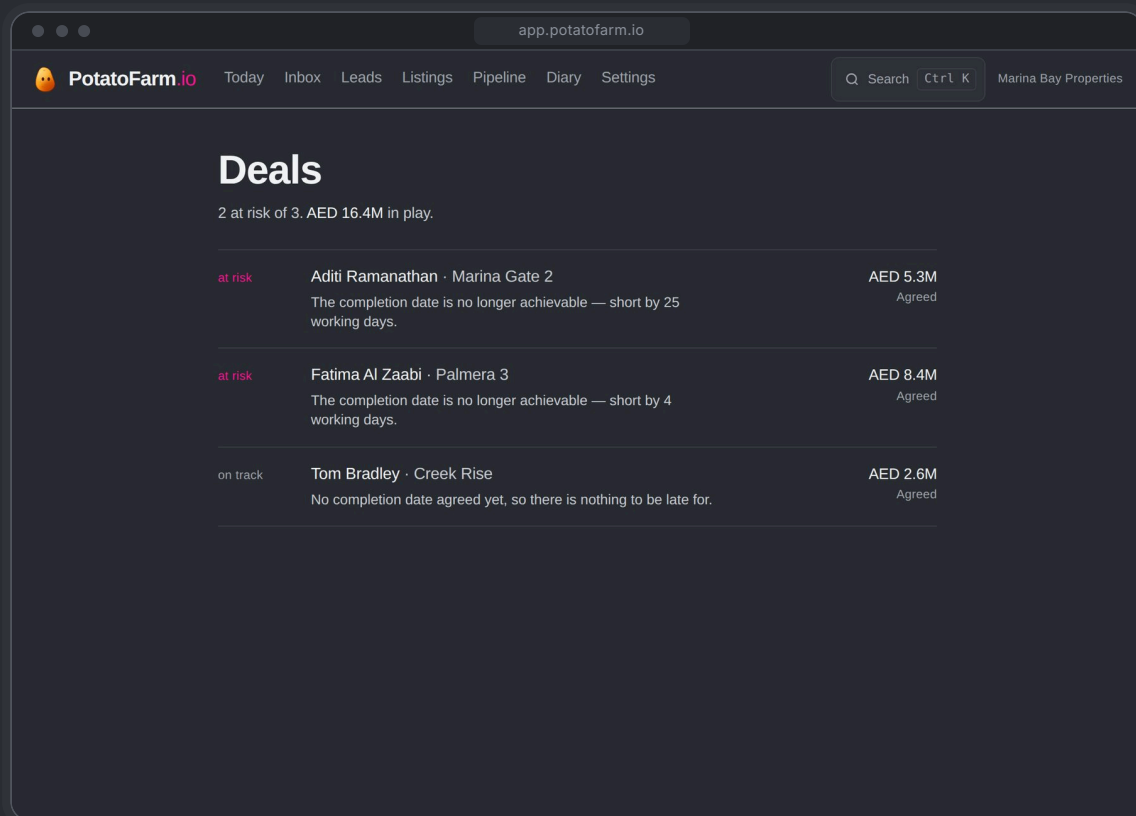

3.7 · PROPERTIES AND DEALS

Recording an offer

FOR
Agents

Record every offer the moment you hear it, so it is ranked, timed and on the owner's report.

- 01 Enter the amount in dirhams.
- 02 Choose how they are paying: cash, mortgage, or not said. Tick if the seller has a mortgage on the property; it changes how long the transfer takes.
- 03 Add conditions ("subject to selling their own villa").
- 04 Set how many days it is open for. We mark it lapsed and tell you when it runs out.
- 05 Press **Record it**.

Deals: every agreed sale, and whether its completion date is still achievable.

3.8 · PROPERTIES AND DEALS

Deals

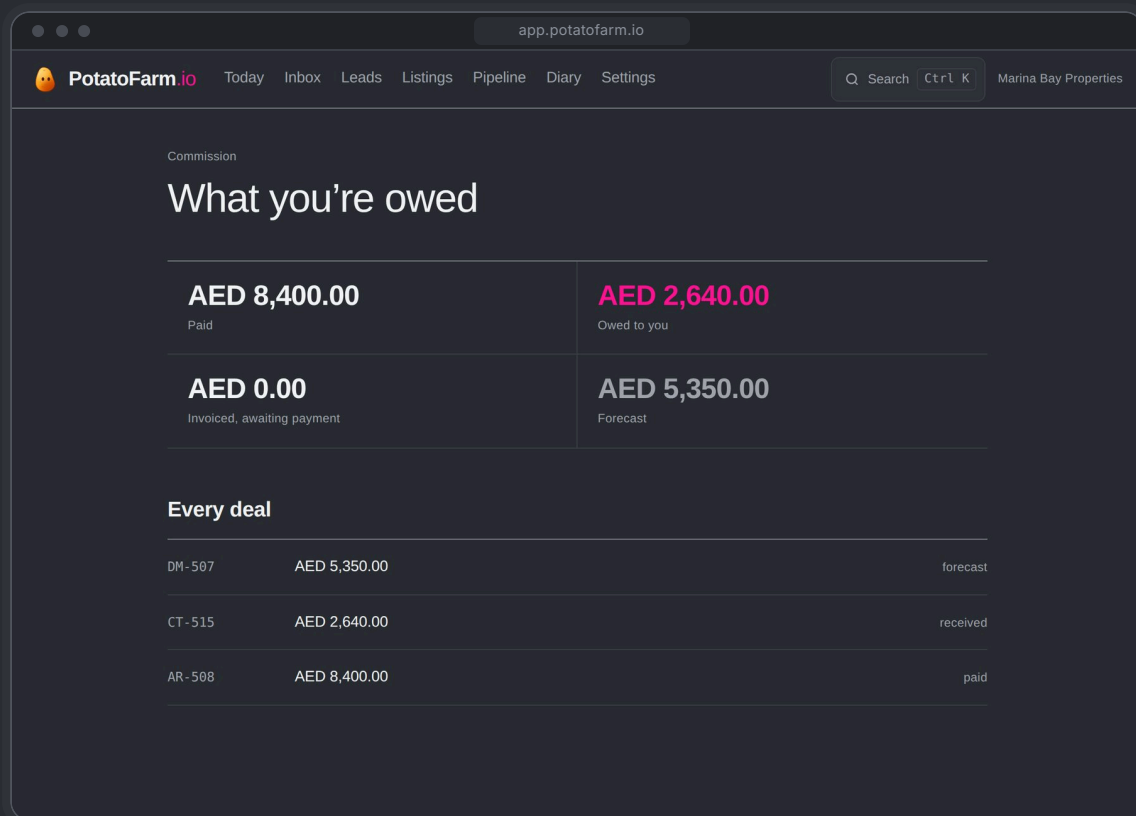

FOR
Agents · Managers

An accepted offer becomes a deal, planned backwards from the completion date on the Form F. The screen tells you which deals are at risk and why.

- 01 **At risk** means the agreed completion date is no longer achievable. The line says by how many working days.
- 02 **On track** means nothing is late, or no date has been agreed yet.
- 03 Click a deal to see its steps to transfer at the DLD. Tick each step as it is done, or mark it blocked with the reason, so everyone can see what is holding it up.

GOOD TO KNOW

A mortgaged buyer against a mortgaged seller takes roughly 47 working days. A 30-day Form F is about 22. Agree realistic dates early.

Commission: what you are owed, what has been paid, and every deal.

3.9 · PROPERTIES AND DEALS

Commission

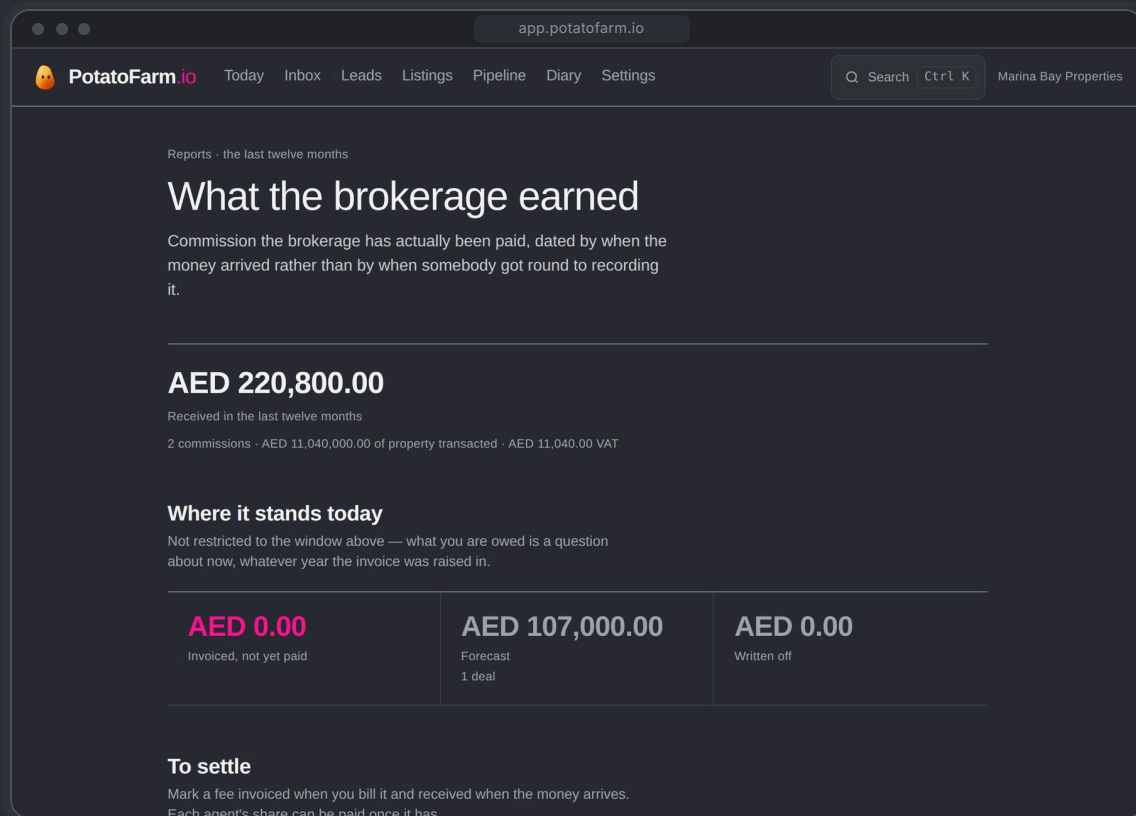

FOR
Agents

What you are owed, what has been paid, what is invoiced and what is forecast, deal by deal.

- 01 **Owed to you:** the brokerage has been paid and your share has not yet been paid out.
- 02 **Paid:** paid to you. **Forecast:** deals not yet invoiced.
- 03 Each deal shows its reference, amount and state: forecast, invoiced, received or paid.

GOOD TO KNOW

If your share looks wrong, check your commission plan with your manager (Settings → Commission).

Revenue: what the brokerage has actually been paid, and what is still to settle.

3.10 · PROPERTIES AND DEALS

Revenue

FOR

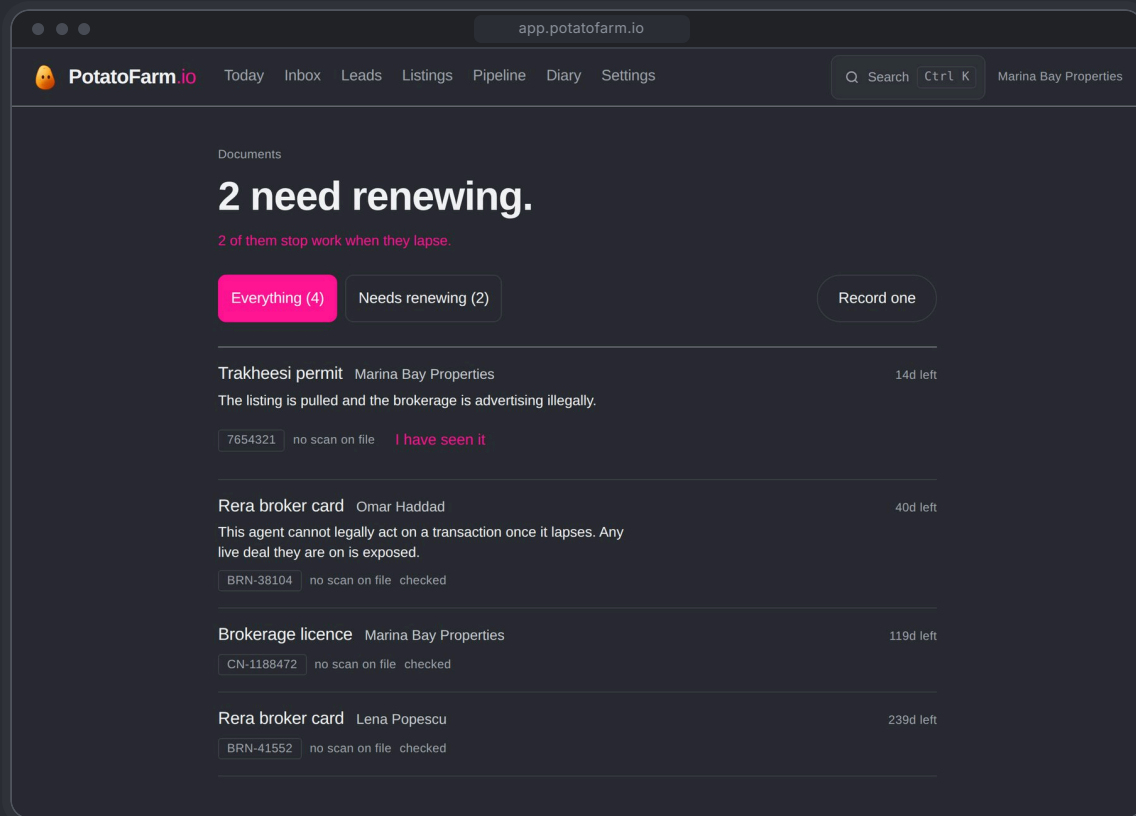

Owners and admins · Managers

What the brokerage has actually earned, dated by when the money arrived. Owners and admins also move fees along from here.

GOOD TO KNOW

Only owners and admins can mark money received or paid. A manager can read the book.

- 01 See what was received in the last twelve months, what is invoiced and not yet paid, and what is forecast.
- 02 Under **To settle**: press **Mark invoiced** when you bill a fee and **Mark received** when the money arrives. **Write off** if it never will.
- 03 Once received, press **Mark paid** against each agent's share when you pay them.
- 04 **By month** shows every month, including the quiet ones.

Documents: what needs renewing, and what stops work when it lapses.

3.11 · PROPERTIES AND DEALS

Documents: permits, cards and licences

FOR
Everyone

The register of documents with an expiry date: Trakheesi permits, RERA broker cards, the brokerage licence. It tells you what needs renewing, and which lapses stop work.

GOOD TO KNOW

Agents can always record their own broker card.

- 01 Filter by **Needs renewing**.
- 02 Each entry says what happens when it lapses. A broker card: that agent cannot legally act on a transaction.
- 03 Press **Record one** to add a document and its expiry, with a scan if you have it.
- 04 Press **I have seen it** to confirm a document you have checked.

04

PART 4

Running the brokerage

Reports, the assistant's record, the team, documents and compliance.

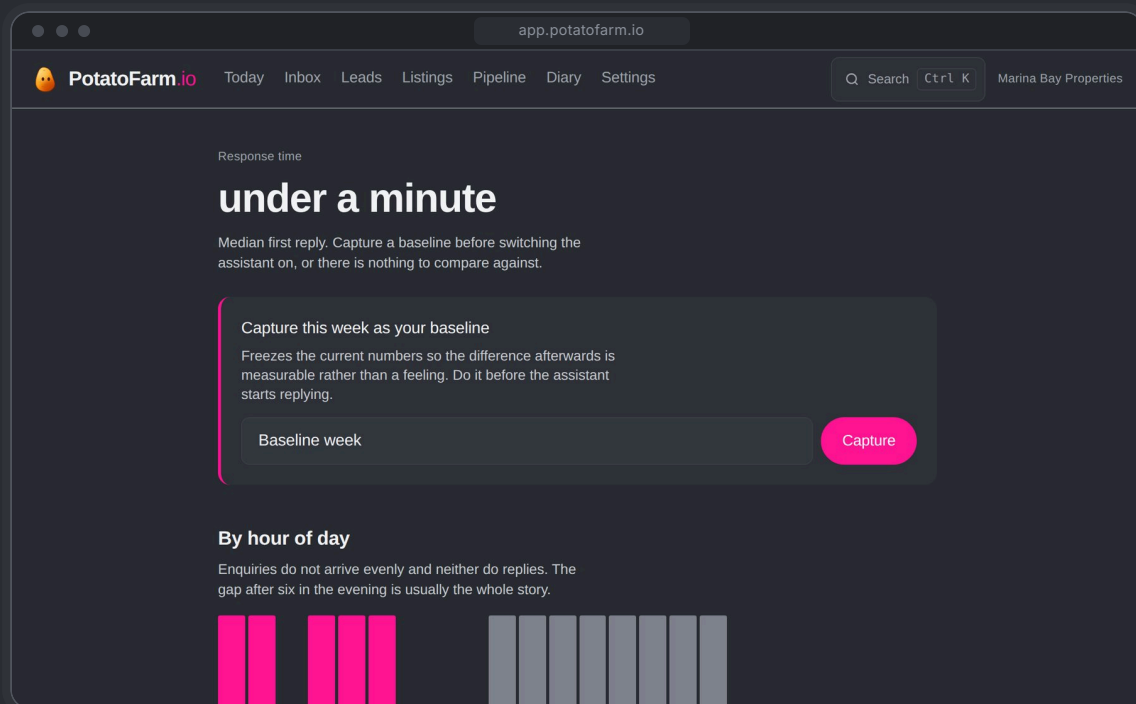

4.1 Reports

4.2 Where your enquiries come from

4.3 What the assistant did

4.4 Team

4.5 Compliance (for the compliance officer)

Reports: response time, by hour, by source, the weighted pipeline and who has gone quiet.

4.1 · RUNNING THE BROKERAGE

Reports

FOR

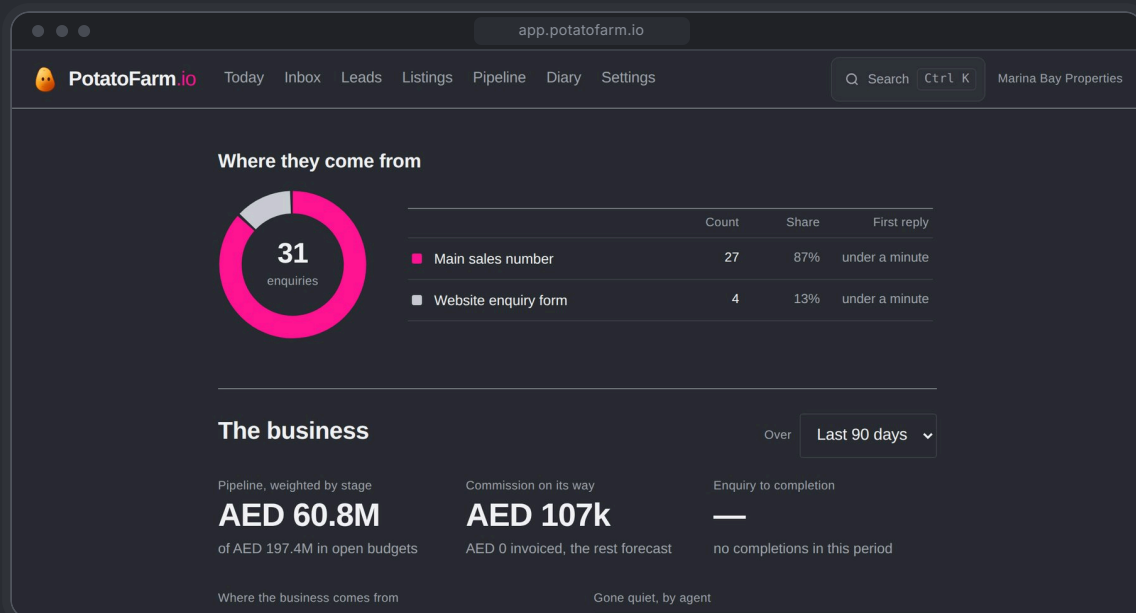

Managers · Owners and admins

How the brokerage is doing, starting with the number the product exists to improve: how quickly enquiries are answered.

GOOD TO KNOW

Choose the period: last 30 days, 90 days or year.

- 01 Response time:** the median first reply.
- 02 Capture this week as your baseline** before switching the assistant on. It freezes the current numbers, so the difference afterwards can be measured.
- 03 By hour of day:** when enquiries arrive and how quickly they are answered. The gap after six in the evening is usually the whole story.
- 04 Where they come from:** each source's share of your enquiries, as a ring (next page).
- 05 The business:** the pipeline weighted by stage, commission on its way, enquiry-to-completion time, leads, wins and conversion by source, and who has gone quiet, by agent.

Reports → Where they come from: each source's share of enquiries, and how quickly each is first answered.

4.2 · RUNNING THE BROKERAGE

Where your enquiries come from

FOR

Managers · Owners and admins

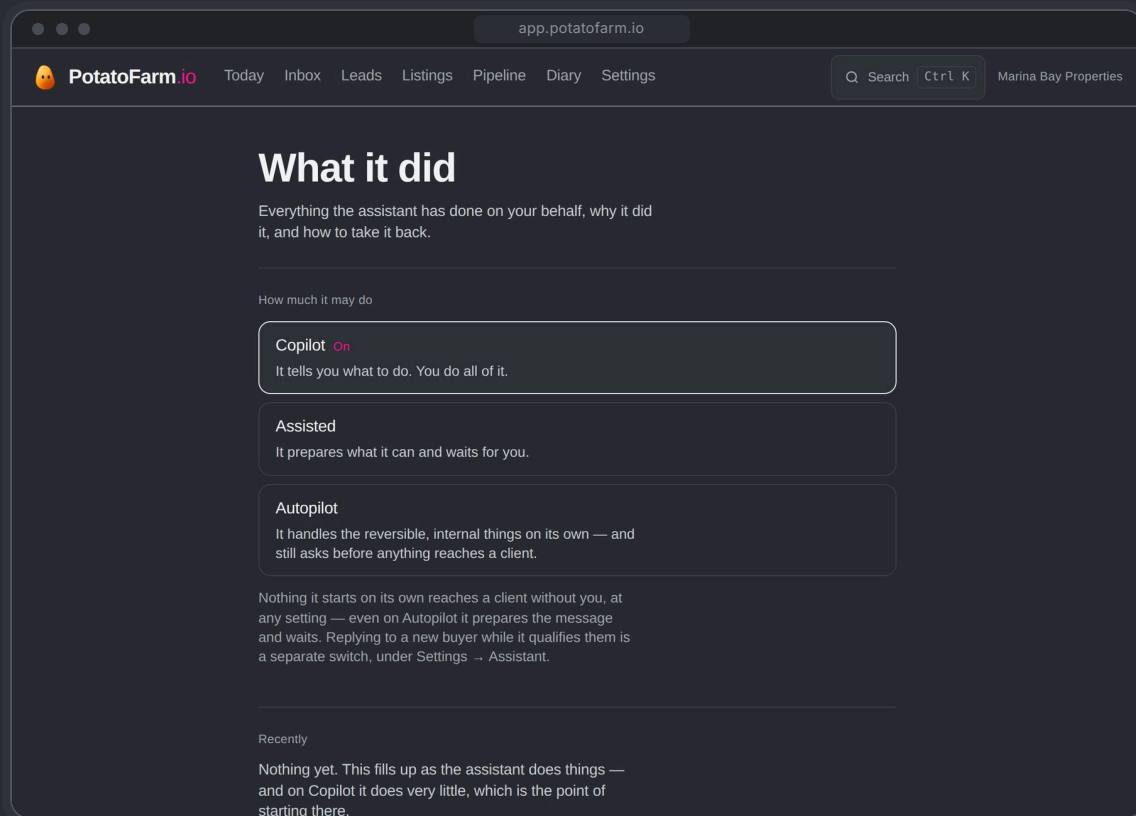

Further down Reports: which sources your enquiries arrive through, and how well each is answered. Every enquiry arrives through exactly one source, so together they make a whole, drawn as a ring.

- 01 The **ring** shows each source's share. The number in the middle is the total for the period.
- 02 Beside it, every source with its **count**, its **share** and its typical **first reply**. Point at a slice or a row to pick it out.
- 03 Past three sources, the smallest are drawn together as one grey slice; the list still names every one.
- 04 On a phone, the first-reply time sits under each source's name.

GOOD TO KNOW

A busy source with a slow first reply is where the next deal is being lost.

With only one source connected, a sentence says so instead of a ring.

What it did: everything the assistant has done for you, why, and how to take it back.

4.3 · RUNNING THE BROKERAGE

What the assistant did

FOR

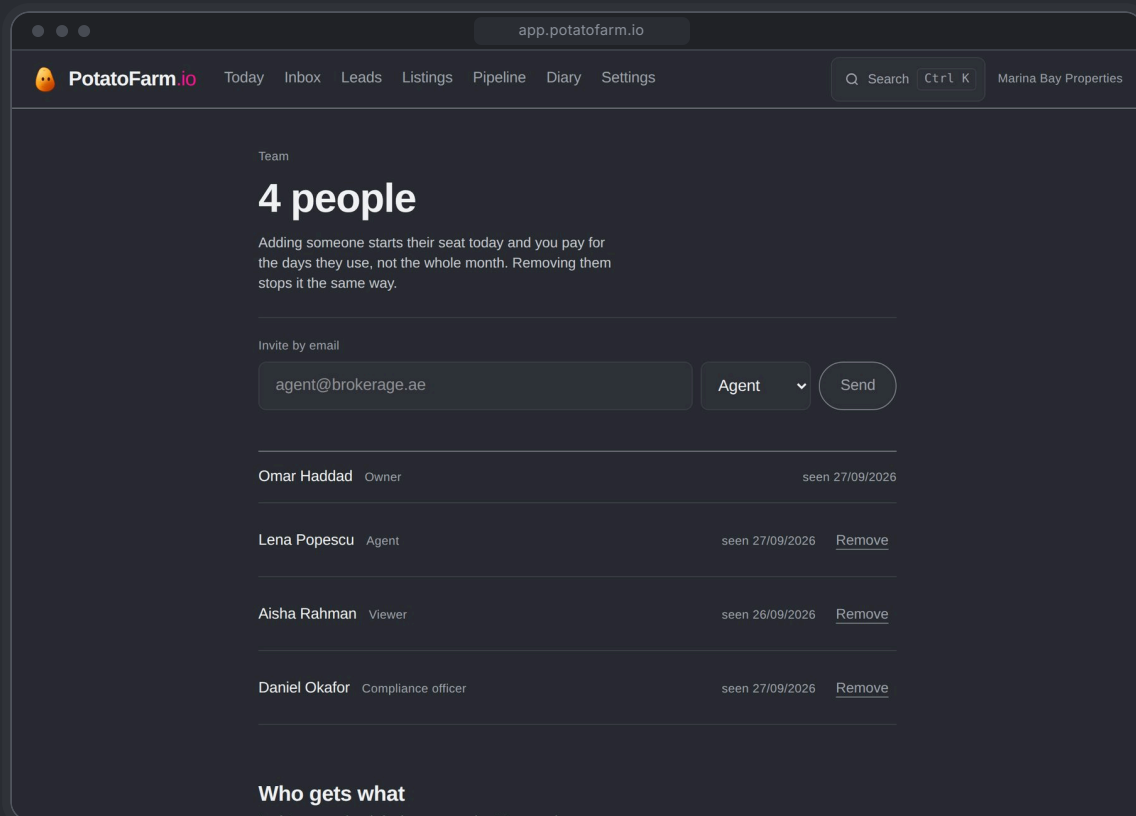

Managers · Owners and admins

A record of everything the assistant has done on your behalf, why it did it, and how to undo it. This is also where you choose how much it may do on its own.

GOOD TO KNOW

Replying to a new buyer while qualifying is a separate switch: Settings → Assistant.

- 01 **Copilot:** it tells you what to do; you do all of it.
- 02 **Assisted:** it prepares what it can and waits for you.
- 03 **Autopilot:** it handles reversible, internal things on its own, and still asks before anything it starts reaches a client.
- 04 Under **Recently**, each entry says what it did and gives you the way to take it back.

Team: who is here, who gets which leads, and what agents see of each other.

4.4 · RUNNING THE BROKERAGE

Team

FOR

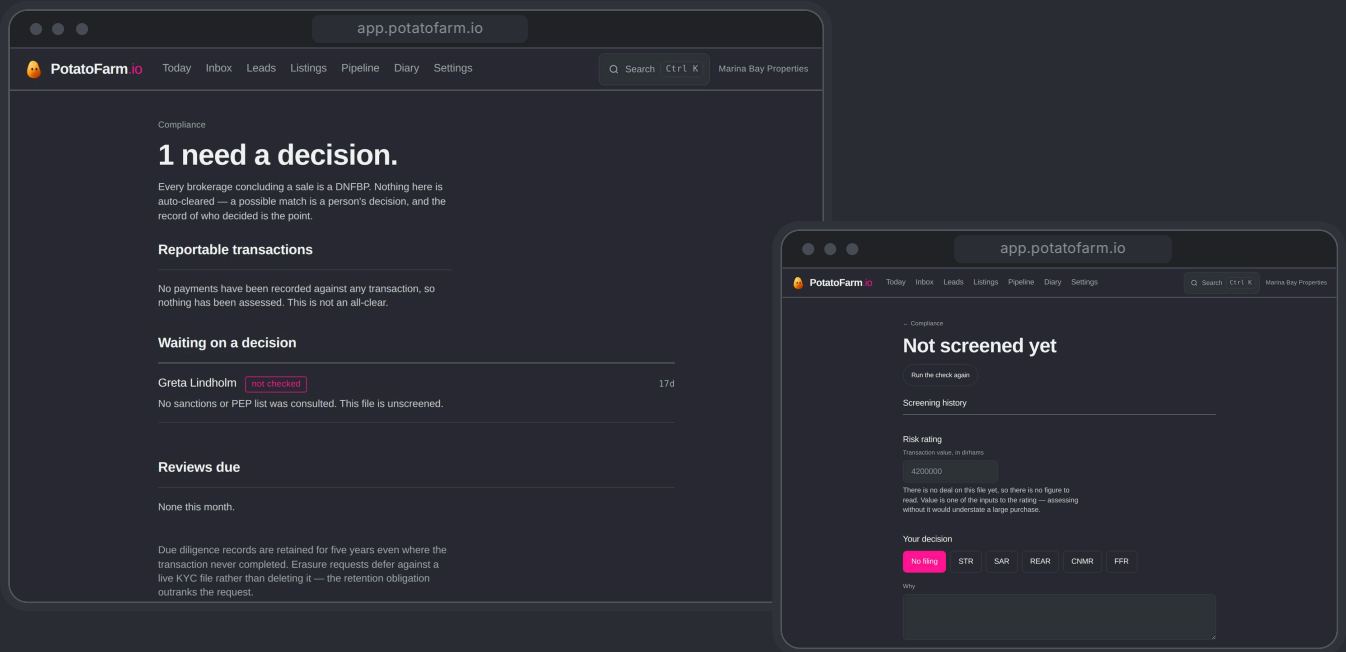

Owners and admins · Managers

Invite people, set their role, choose who gets which leads, and decide what agents can see of each other.

GOOD TO KNOW

Managers and owners always see the whole team.

- 01 Type an email under **Invite by email**, choose Agent or Manager, and press **Send**. Their seat starts today; you pay for the days they use.
- 02 **Remove** someone and you are asked who takes their book. Leads, viewings and follow-ups move in one go, and their seat stops.
- 03 **Who gets what**: each agent's capacity, languages and communities for routing.
- 04 **What agents see about each other**: the whole board, or just their own figures and rank.

The compliance officer's desk: decisions waiting, reportable transactions and reviews due. **Inset:** A compliance file: screening, risk rating and the decision.

4.5 · RUNNING THE BROKERAGE

Compliance (for the compliance officer)

FOR
Compliance officer

Every UAE brokerage that concludes a sale is a DNFBP, with anti-money-laundering duties. This screen belongs to the compliance officer (MLRO). Owners and admins cannot open it, by law: telling a client a report has been filed is itself an offence.

- 01 **Waiting on a decision:** files that need you. **Not checked** means no sanctions or PEP list was consulted: the file is unscreened.
- 02 Open a file. Run the screening, set the risk rating, and enter the transaction value.
- 03 **Identity documents:** **Open** shows one for two minutes, and each opening is recorded; then **Mark as checked**.
- 04 Record your decision: no filing, or STR, SAR, REAR, CNMR or FFR. Write why, even for no filing. This is the part an inspector reads.
- 05 Press **Record the decision**. Your name and the time are recorded, and cannot be edited or deleted.

GOOD TO KNOW

- Nothing is ever auto-cleared. A possible match is always a person's decision.
- Records are kept for five years, even if the sale fell through. An erasure request waits.

05

PART 5

Settings

Every switch an owner or manager can change, and what each one does.

5.1 Settings: the assistant's brake, calendar and listing feed

5.2 How the assistant's drafts are received

5.3 The assistant: questions, tone and automatic replies

5.4 Channels

5.5 Lead routing

5.6 Working hours

5.7 Nurture plans

5.8 Commission plans

5.9 Email

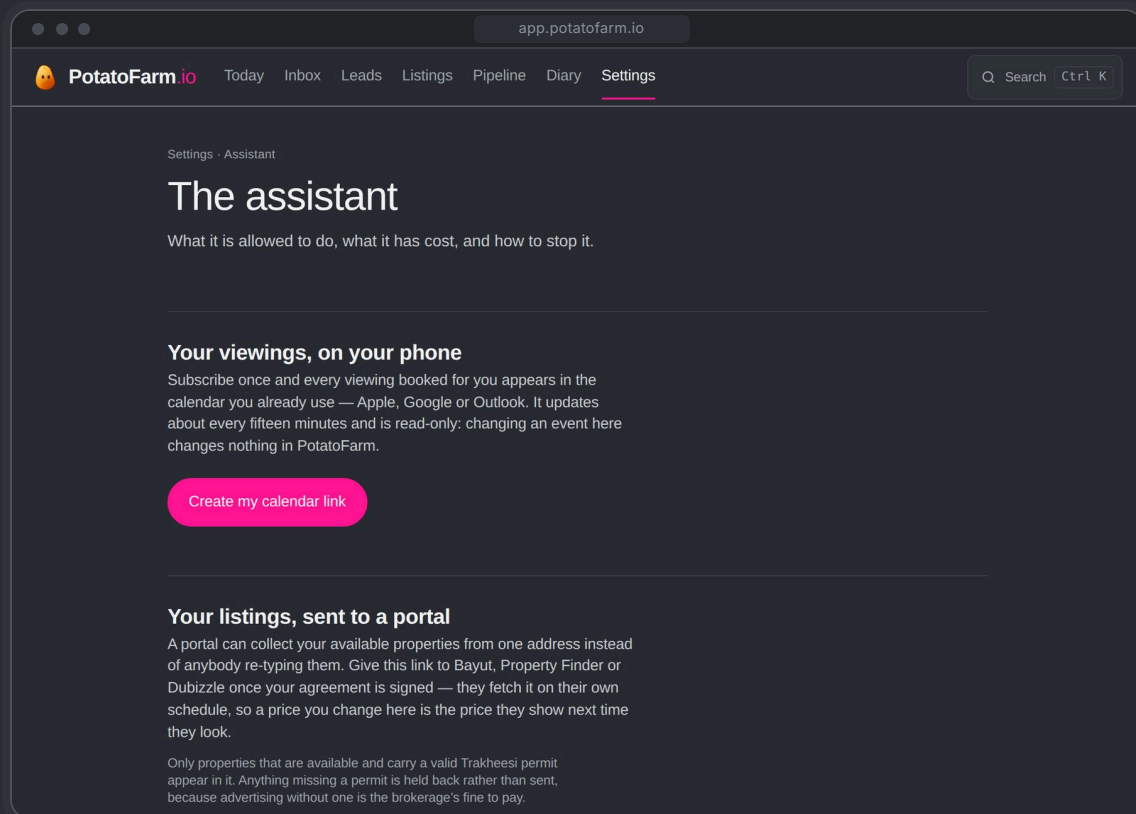

5.10 Import your history

5.11 Security and two-step sign-in

5.12 Support access

5.13 Privacy requests

5.14 Billing and invoices

Settings: the assistant's status and stop button, your calendar link, and your listing feed.

5.1 · SETTINGS

Settings: the assistant's brake, calendar and listing feed

FOR

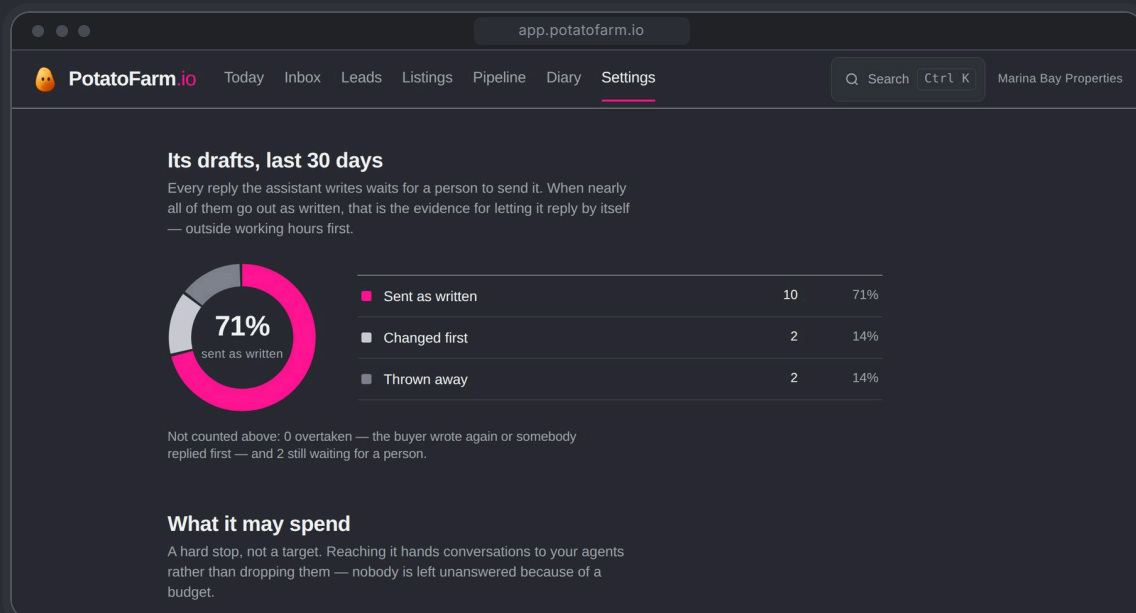

Owners and admins · Managers

The first Settings screen: whether the assistant is running, the button that stops it, your calendar link, and the feed address a portal collects your listings from. Further down: how its drafts are received (next page).

GOOD TO KNOW

Treat the feed address like a password. Anyone with it can read every property you have for sale or rent.

- 01 Stop everything** halts the assistant in every conversation in the brokerage at once: no delay, no cache, no messages still going out. **Start it again** puts it back.
- 02 Create my calendar link** puts every viewing booked for you in the calendar you already use (Apple, Google or Outlook). It is read-only.
- 03 Your feed address** is what a portal collects your available, permitted listings from. Copy it and give it to Property Finder, Bayut or Dubizzle once your agreement is signed.

Settings → Its drafts, last 30 days: every draft somebody decided about, and the share sent exactly as written.

5.2 · SETTINGS

How the assistant's drafts are received

FOR

Owners and admins · Managers

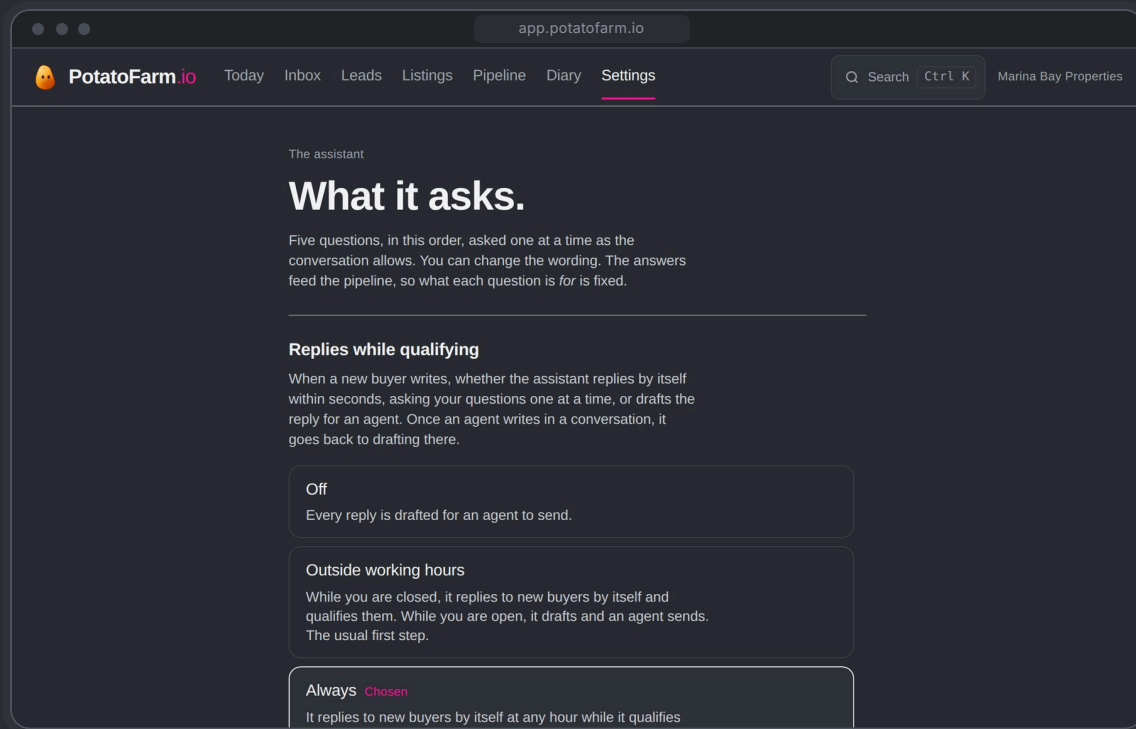

Further down the first Settings screen: what your team did with the assistant's drafts over the last 30 days. It is the evidence for deciding how far to trust it.

- 01 The **ring** counts every draft somebody decided about: **sent as written** in pink, **changed first** and **thrown away** in grey.
- 02 The number in the middle is the share **sent exactly as written**.
- 03 Beside the ring, each outcome with its count and its share. Point at a slice or a row to pick it out.
- 04 Underneath: drafts **overtaken** (the buyer wrote again, or somebody replied first) and drafts **still waiting**. Nobody decided about those, so they are not in the ring.

GOOD TO KNOW

When nearly all go out as written, that is the case for automatic replies. Start with **Outside working hours**: Settings → Assistant.

Colour is never the only clue. Every slice has its name, count and share written beside it.

Settings → Assistant: replies while qualifying, the five questions, and the tone.

5.3 · SETTINGS

The assistant: questions, tone and automatic replies

FOR

Owners and admins

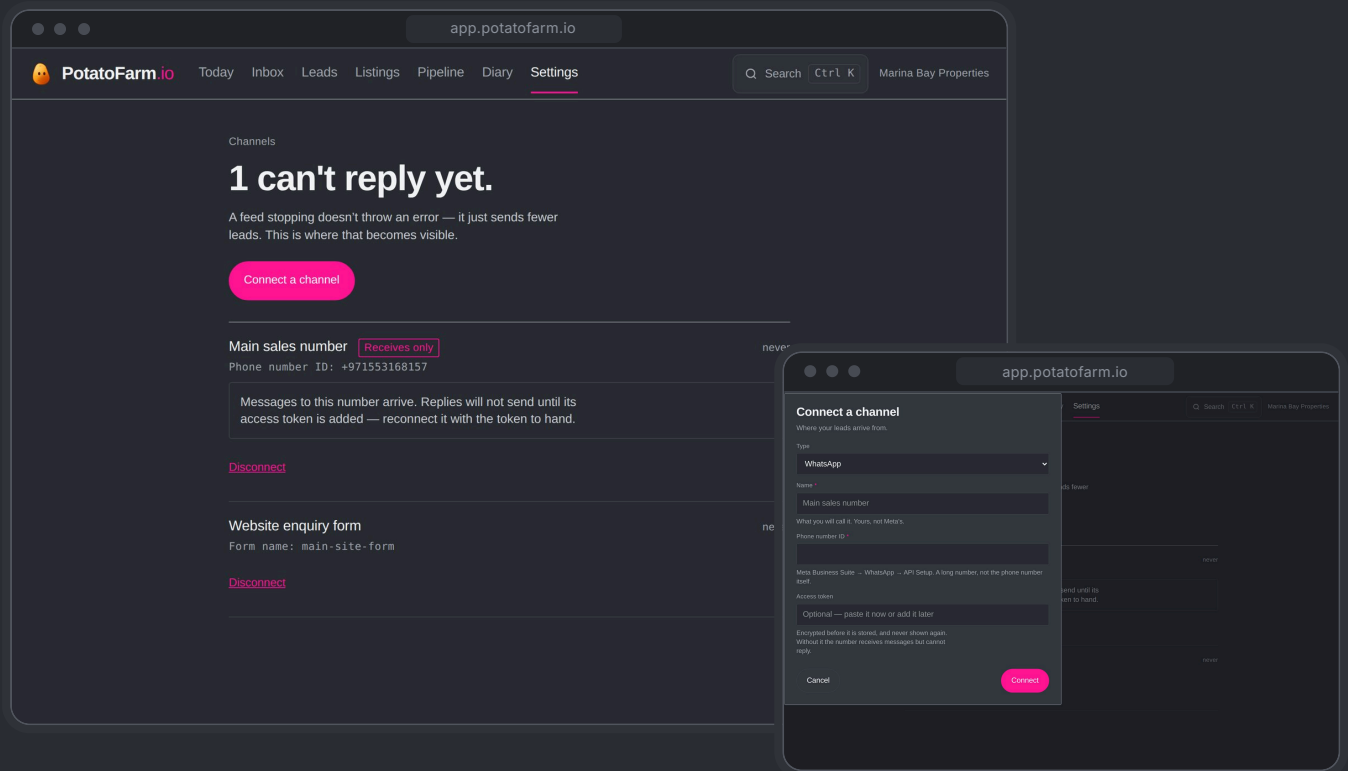

What the assistant asks a new buyer, how it sounds, and whether it replies by itself while it qualifies them.

- 01 **Replies while qualifying:** choose **Off** (every reply is drafted for an agent to send), **Outside working hours** (it replies by itself while you are closed and drafts while you are open) or **Always**. When it replies, it does so within seconds (read receipt, "typing...", then the reply), asks your questions one at a time, and hands over to their agent.
- 02 Underneath: how many of the assistant's drafts agents sent exactly as written. That is the evidence to look at before you choose.
- 03 **What it asks:** five questions, in this order: budget, timeline, financing, purpose and a viewing. Anything the buyer has already told it, it does not ask again. Change the wording; what each question is for stays fixed, because the answers feed the pipeline.
- 04 **Tone:** how it should sound, in your words.
- 05 Press **Save**. The next enquiry uses it.

GOOD TO KNOW

It never claims to be a person, and says it is the brokerage's assistant if asked. "Stop everything" and "I've got this" still stop it at once.

Nothing you write in Tone can make it quote a price nobody gave it, or negotiate for you.

Channels: where enquiries come from, and whether each can reply. **Inset:** Connect a channel.

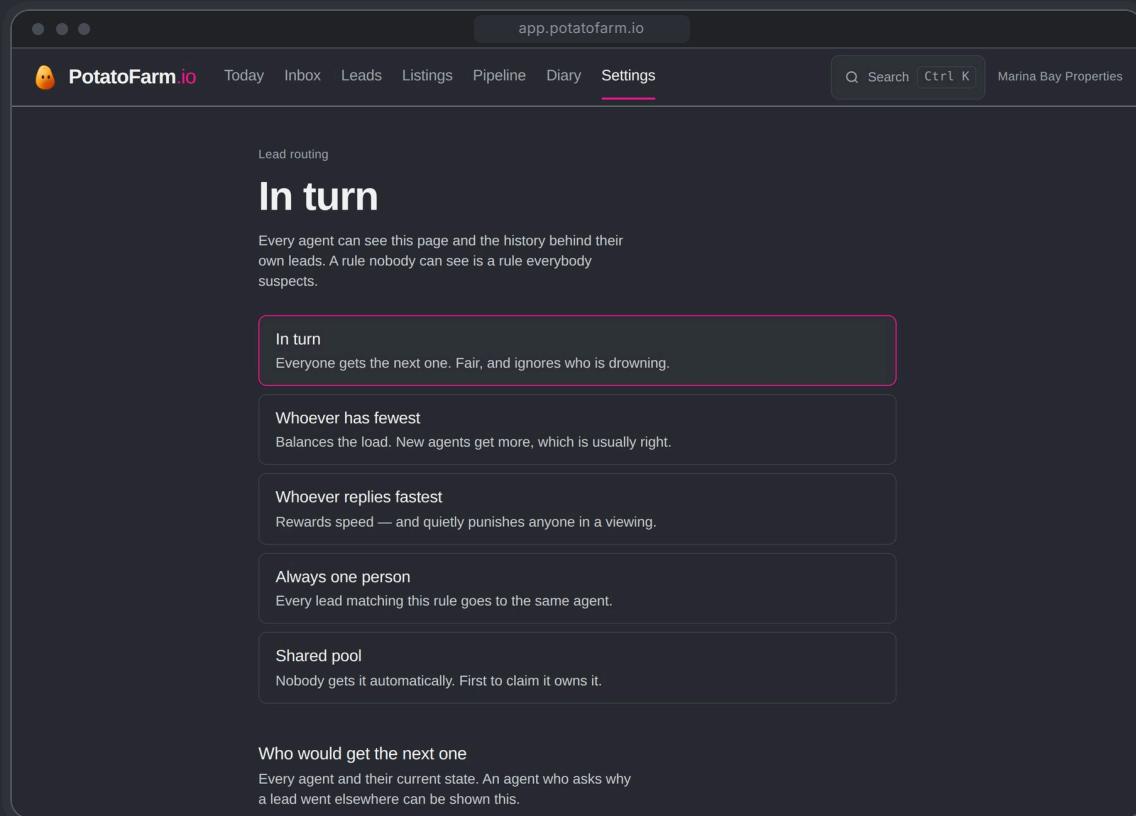

5.4 · SETTINGS

Channels

FOR
Owners and admins

Where enquiries come from: your WhatsApp number, your website form, Facebook and Instagram lead ads, and the portals. A feed that stops does not throw an error, it just sends fewer leads. This is where that becomes visible.

- 01 Press **Connect a channel** and choose the type.
- 02 WhatsApp: enter the phone number ID and access token from Meta. Without the token, messages arrive but replies will not send, and the channel says so.
- 03 Website form: you are given an address to post your website's enquiry form to.
- 04 Each channel shows when it last received something. **Disconnect** stops it.

Lead routing: how new leads are shared out, and who would get the next one.

5.5 · SETTINGS

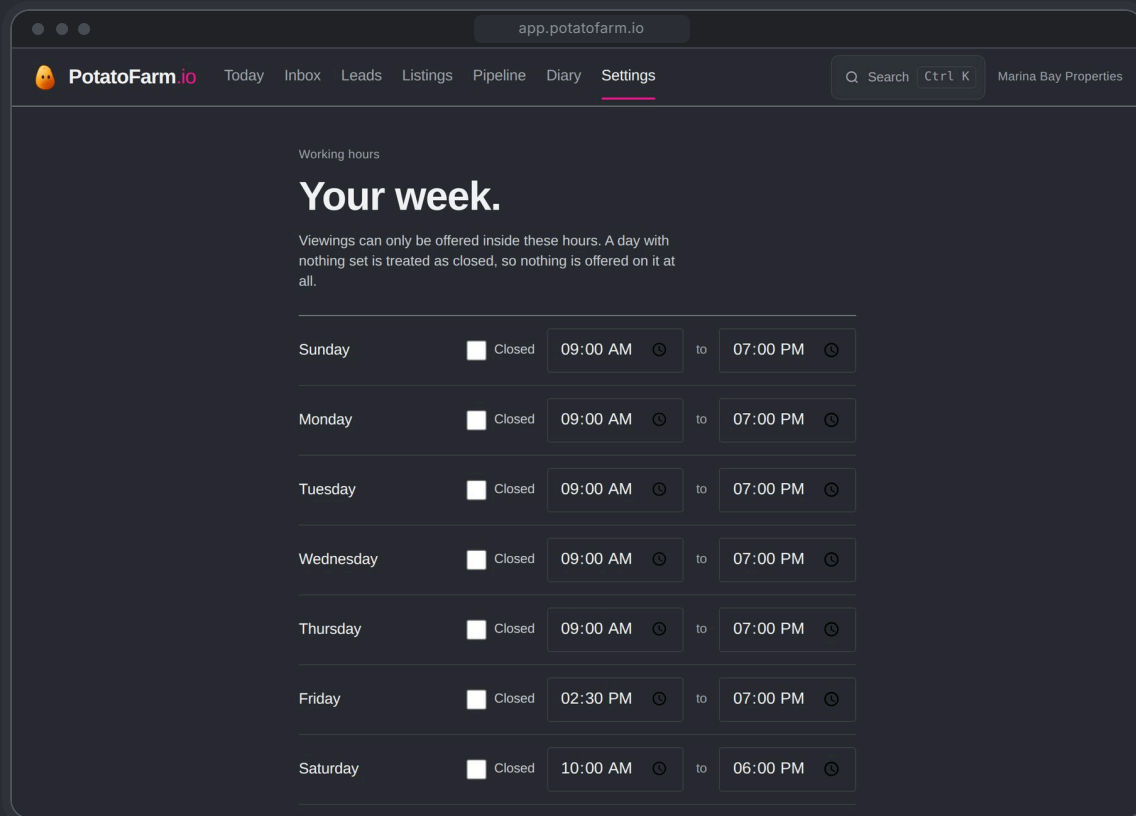

Lead routing

FOR

Owners and admins · Managers

How new leads are shared between agents. Every agent can see this page, because a rule nobody can see is a rule everybody suspects.

- 01 Choose a rule: **In turn**, **Whoever has fewest**, **Whoever replies fastest**, **Always one person**, or a **Shared pool** where the first to claim it owns it.
- 02 **Who would get the next one** shows every agent, their current load and capacity.
- 03 An agent who thinks a lead went to the wrong person raises it from the lead itself; it reaches a manager with the routing decision attached.

Working hours: your week, including the weekend.

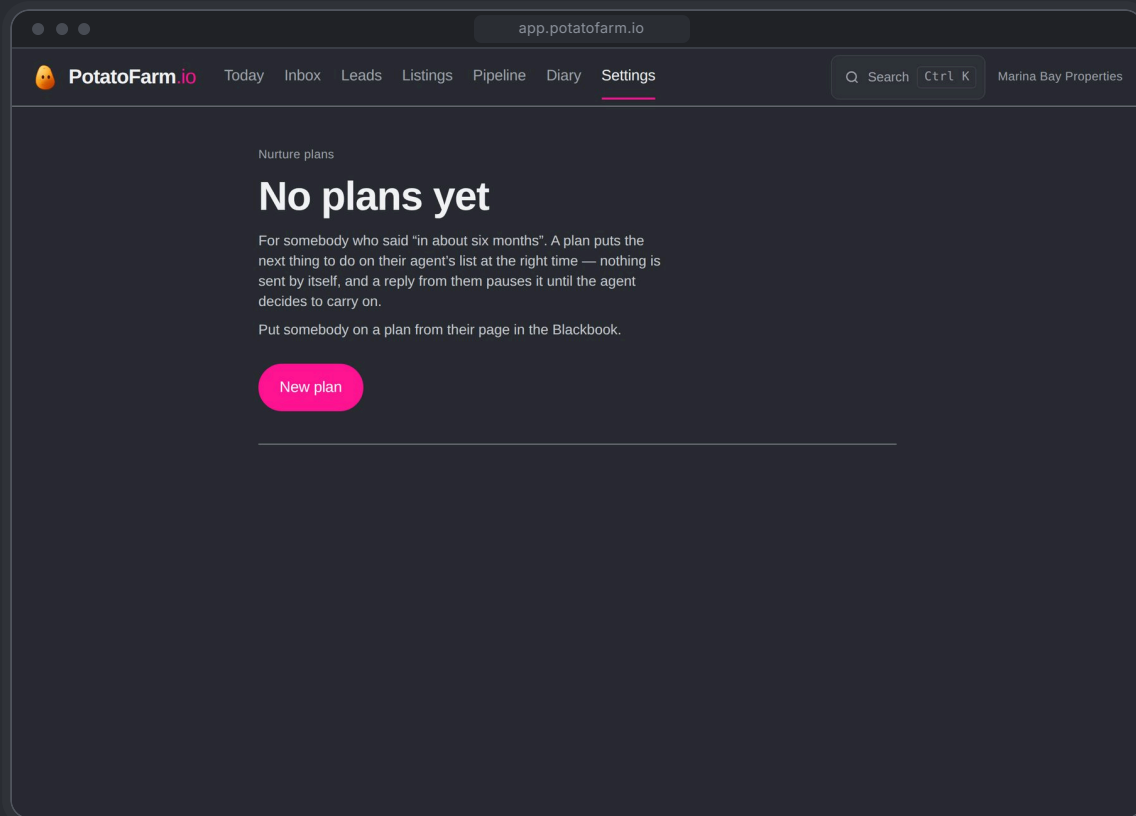

5.6 · SETTINGS

Working hours

FOR
Owners and admins

The hours viewings can be offered in. A day with nothing set is treated as closed.

- 01 Set a start and end time for each day, or tick **Closed**.
- 02 Remember Saturday: most viewings happen at the weekend.
- 03 Press **Save the week**.

Nurture plans: for somebody who said "in about six months".

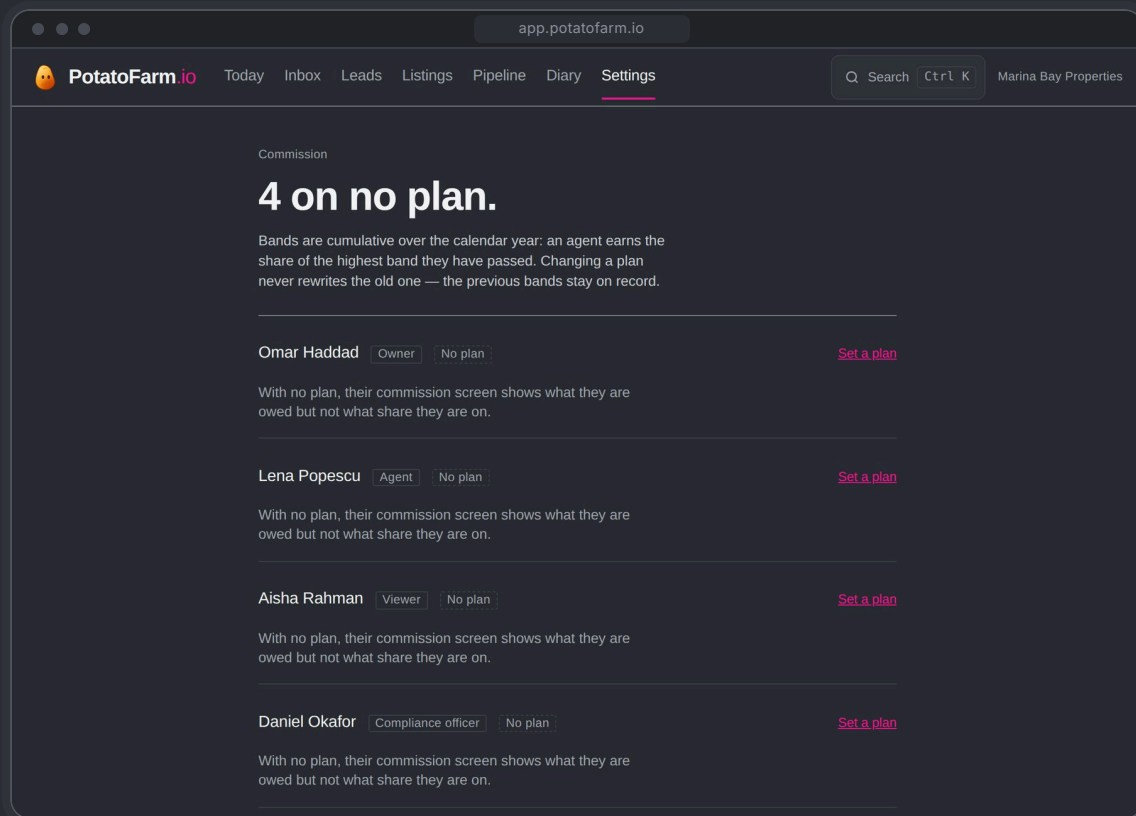

5.7 · SETTINGS

Nurture plans

FOR
Managers

A plan puts the next thing to do on an agent's list at the right time, for somebody who is not ready yet. Nothing is sent by itself, and a reply from them pauses the plan until the agent decides to carry on.

- 01 Press **New plan**, or start from the ready-made six-touch buyer plan.
- 02 Add steps: what to do, and how many days after the last one.
- 03 Agents put somebody on a plan from that person's page.

Commission plans: each person's bands for the year.

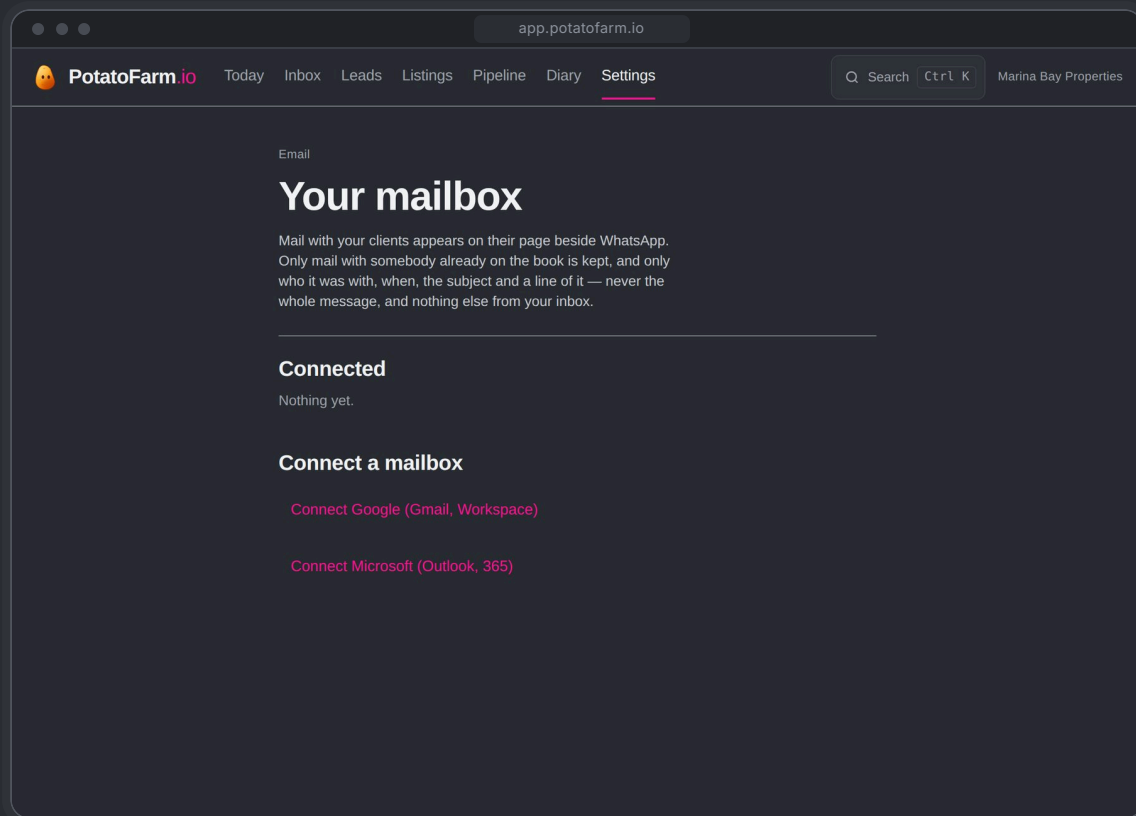

5.8 · SETTINGS

Commission plans

FOR
Owners and admins

Each agent's commission bands. Bands are cumulative over the calendar year: an agent earns the share of the highest band they have passed.

- 01 Press **Set a plan** next to a person.
- 02 Add bands: up to a year-to-date amount, and the share above it.
- 03 Save. Changing a plan never rewrites the old one; the previous bands stay on record.

Email: connect your Gmail or Outlook mailbox.

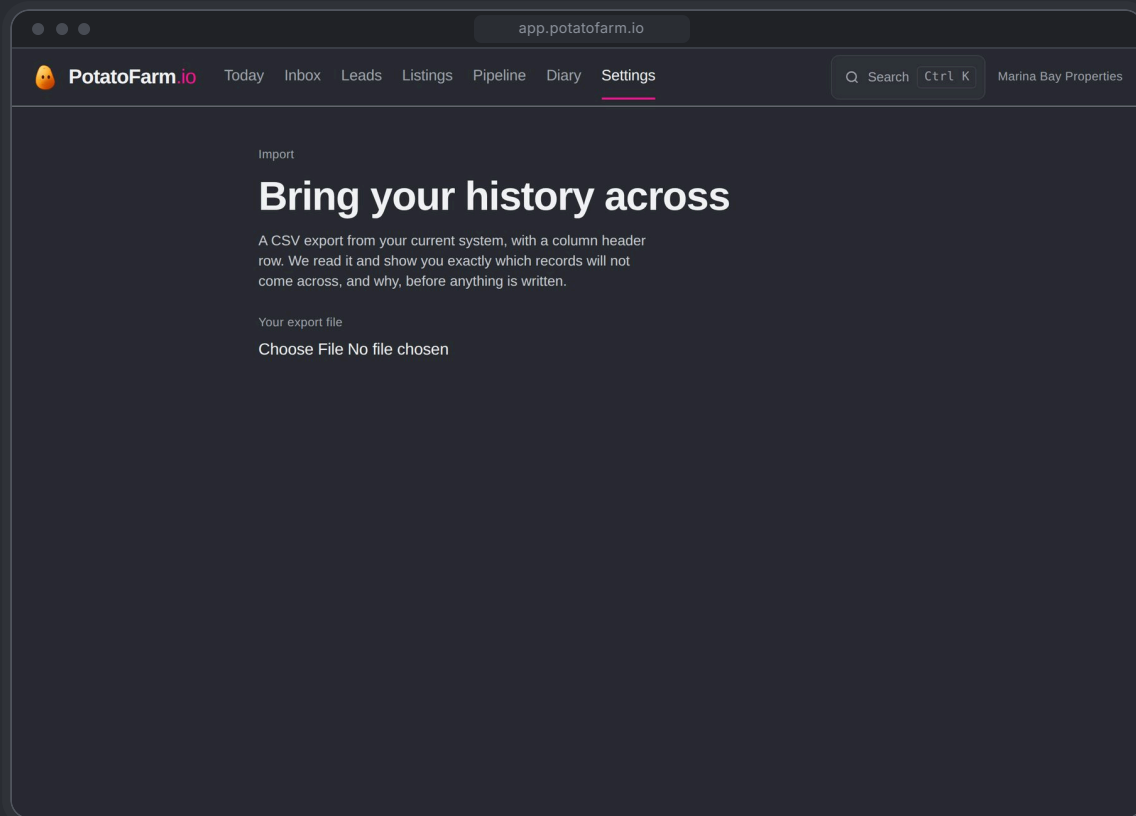

5.9 · SETTINGS

Email

FOR
Agents · Managers

Connect your mailbox so mail with your clients appears on their page beside WhatsApp. Only mail with somebody already on the book is kept, and only who it was with, when, the subject and a line of it. Never the whole message, and nothing else from your inbox.

- 01 Press **Connect Google** or **Connect Microsoft**.
- 02 Sign in to your mailbox and allow read-only access.
- 03 Your mailbox appears under **Connected**. Disconnect it here at any time.

Import: bring your history across from your current system.

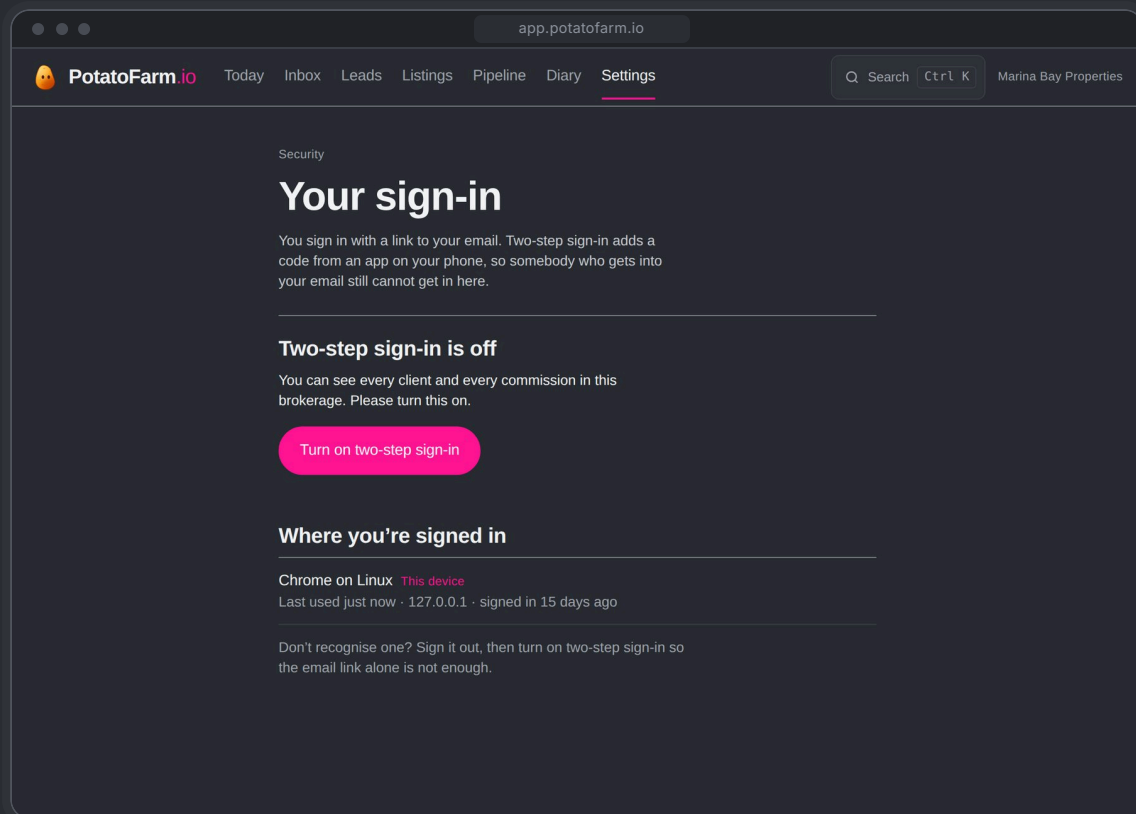

5.10 · SETTINGS

Import your history

FOR
Owners and admins

Bring listings and history across from your current system as a CSV export with a header row. You see exactly which records will not come across, and why, before anything is written.

- 01 Choose **Your export file**.
- 02 Match the columns and check the preview.
- 03 Press **Import**.

Security: two-step sign-in, and every device you are signed in on.

5.11 · SETTINGS

Security and two-step sign-in

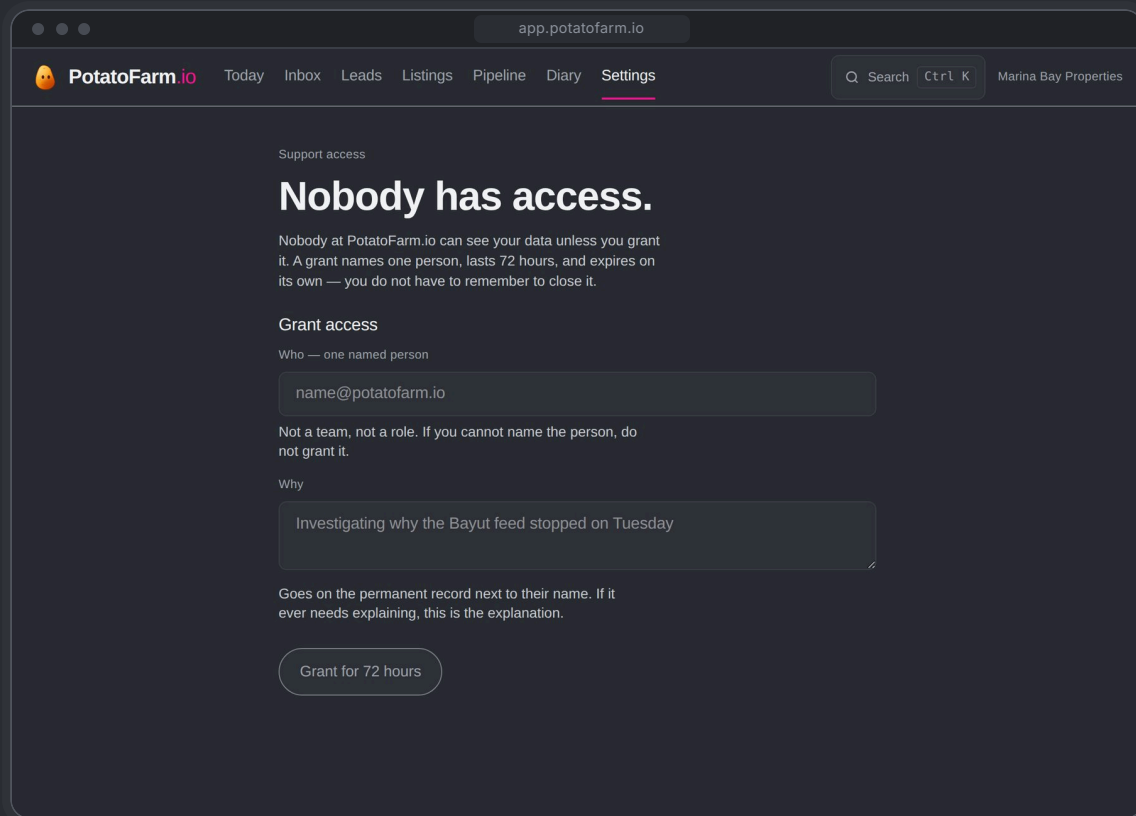

FOR
Everyone

Protect your account. Two-step sign-in adds a code from an app on your phone, so somebody who gets into your email still cannot get in here.

GOOD TO KNOW

Owners and managers can see every client and every commission. Please turn it on.

- 01 Press **Turn on two-step sign-in**.
- 02 Install an authenticator app (Google Authenticator, Microsoft Authenticator or 1Password). On your phone, tap **open it in the app**; on a computer, choose "enter a setup key" in the app and type the key shown.
- 03 Type the code the app shows and press **Turn on**. Save the recovery codes you are given somewhere safe.
- 04 **Where you're signed in** lists every device. Do not recognise one? Sign it out, then turn on two-step sign-in.

Support access: nobody at PotatoFarm.io can see your data unless you grant it.

5.12 · SETTINGS

Support access

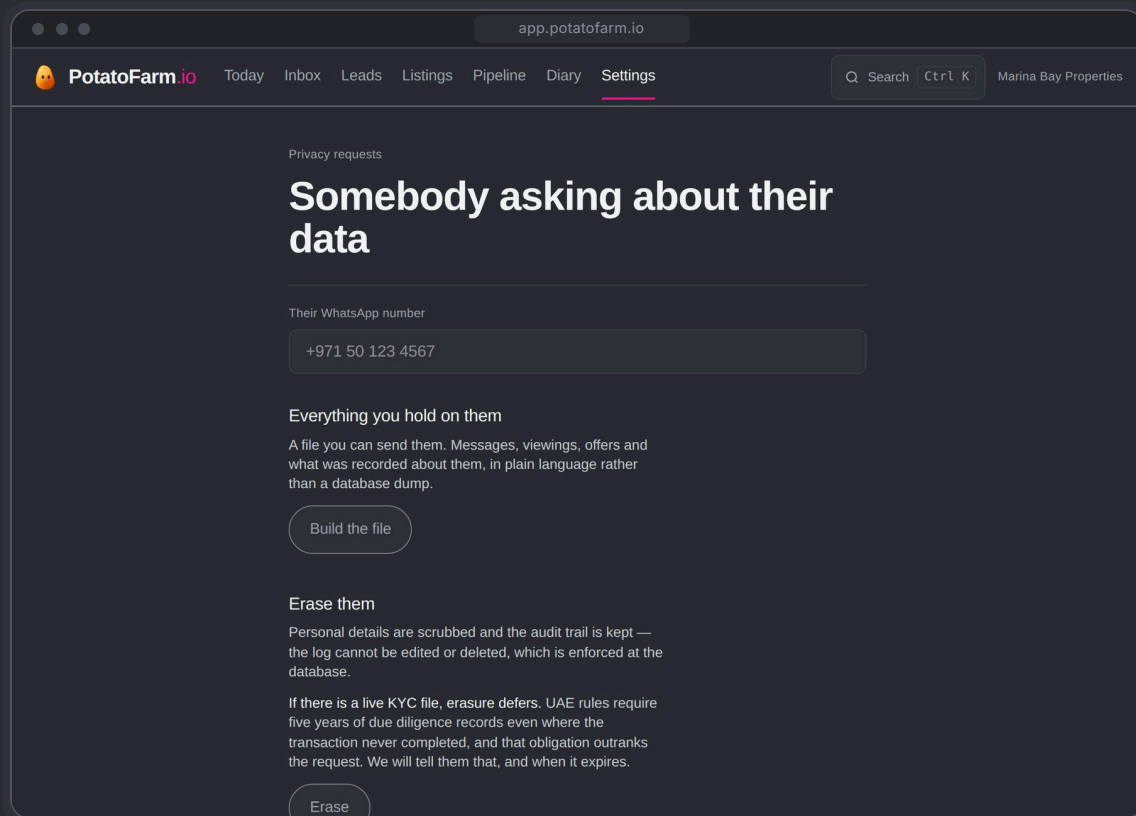

FOR
Owners and admins

Nobody at PotatoFarm.io can see your data unless you grant it. A grant names one person, lasts 72 hours and expires on its own.

GOOD TO KNOW

If you cannot name the person, do not grant it.

- 01 Type the one named person who needs access.
- 02 Write why. It goes on the permanent record next to their name.
- 03 Press **Grant for 72 hours**. You can revoke it early.

Privacy requests: a copy of what you hold on somebody, or erasing them.

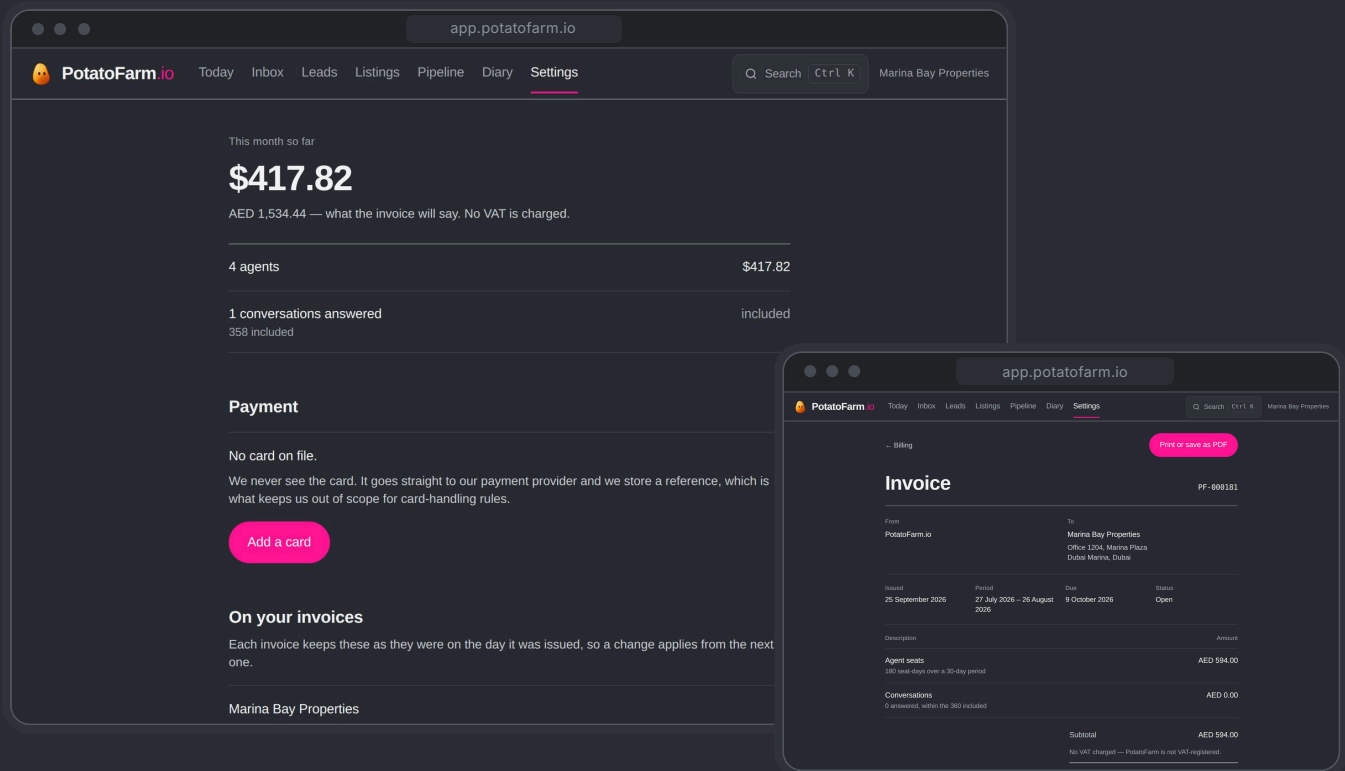

5.13 · SETTINGS

Privacy requests

FOR
Owners and admins

When somebody asks what you hold on them, or asks to be erased.

- 01 Type their WhatsApp number.
- 02 **Build the file** gives you everything you hold on them, in plain language, to send to them.
- 03 **Erase** scrubs their personal details and keeps the audit trail. If there is a live compliance file, erasure waits: UAE rules require five years of due-diligence records, and we tell them when it expires.
- 04 **Past requests** lists every request and what was done.

Billing: this month so far, your card, and invoices. **Inset:** An invoice, ready to print or save.

5.14 · SETTINGS

Billing and invoices

FOR
Owners and admins

What this month will cost, your payment card, the details on your invoices, and every invoice.

- 01 **This month so far** shows agents, conversations answered and the running total. You pay per agent per month; conversations beyond the included allowance are charged per conversation.
- 02 **Add a card:** it goes straight to our payment provider and we never see it.
- 03 Enter your billing address and, if you are VAT-registered, your 15-digit TRN.
- 04 Open an invoice to print it or save it as a PDF.

GOOD TO KNOW

Add someone mid-month and you pay for the days they use. Remove them and it stops the same way.

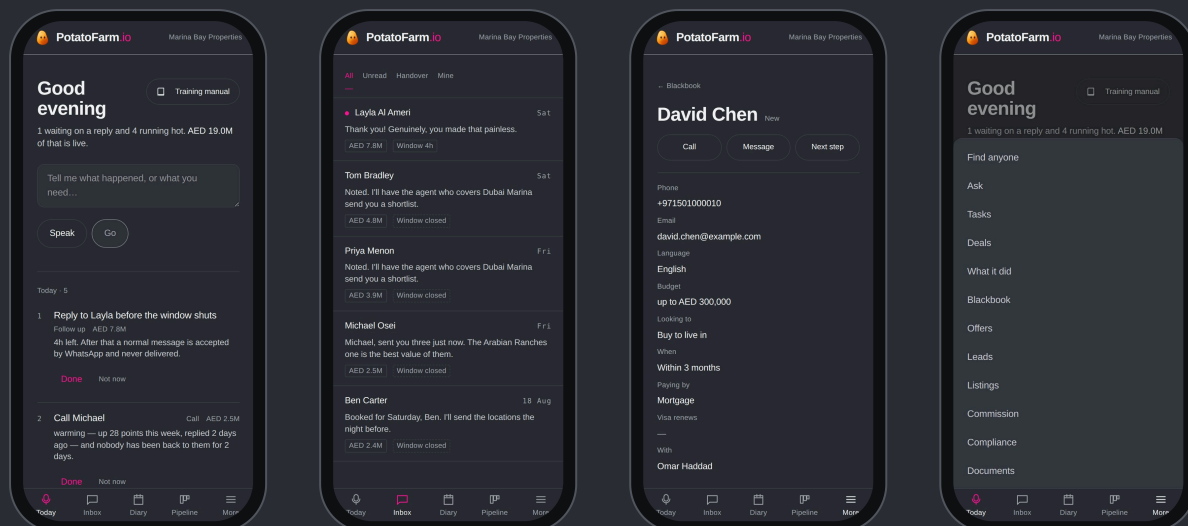

06

PART 6

On your phone

The same system in your pocket, built for a thumb.

6.1 Using PotatoFarm.io on your phone

Today · The Inbox · A person: Call, Message and Next step first.

6.1 · ON YOUR PHONE

Using PotatoFarm.io on your phone

FOR
Agents

Everything works on a phone, in the browser, and it installs to your home screen like an app. Navigation moves to a bar at the bottom, within reach of your thumb: **Today**, **Inbox**, **Diary**, **Pipeline** and **More**.

- 01 **Install it:** open PotatoFarm.io in Safari (iPhone) or Chrome (Android), then choose **Share** → **Add to Home Screen** (iPhone) or **Install app** (Android). It opens full-screen from the icon.
- 02 Turn on notifications when asked, so a buyer waiting reaches you.
- 03 In the Inbox, open a conversation; ← **All conversations** takes you back.
- 04 On a person's page, **Call**, **Message** and **Next step** are the first things under the name.
- 05 **More** opens everything else: Leads, Listings, Offers, Deals, Commission, Reports and Settings.
- 06 No signal? You are told you are offline rather than shown a broken page. Anything already saved is safe; try again when you are back.

07

PART 7

Routines and reference

Checklists for each role, what to do when something looks wrong, and the words we use.

7.1 Routines by role

7.2 When something looks wrong

7.3 Words we use

Routines by role

Tick through these until they are habit. They are the difference between a CRM that is filled in and one that is used.

Agent: every morning

- ☐ Open Today and work 1 to 5.
 - ☐ Clear Reply ready and Handover in the Inbox.
 - ☐ Reply to anybody whose window is about to close.
 - ☐ Check today's viewings in the Diary.
-

Agent: when an offer comes in

- ☐ Record it at once, with how they are paying and any conditions.
 - ☐ Tell the owner the same day.
 - ☐ Watch the expiry on Offers.
-

Owner: every month

- ☐ Reports and Revenue: what was earned and what is owed.
 - ☐ Mark fees invoiced and received; pay agents' shares.
 - ☐ Team: who is joining, who is leaving.
 - ☐ Documents: anything due for renewal.
-

Agent: after every viewing

- ☐ Record the outcome: came, no-show, and what they thought.
 - ☐ Update what they are looking for if it changed.
 - ☐ Add a next step with a date.
-

Manager: every week

- ☐ Look at Nobody's and Gone quiet on Leads.
 - ☐ Check Untouched cards on the Pipeline.
 - ☐ Read Reports: response time by hour and by source.
 - ☐ Review Deals at risk with the agents on them.
-

Compliance officer: every week

- ☐ Clear Waiting on a decision on Compliance.
 - ☐ Record a reason for every decision, including not filing.
 - ☐ Check Reviews due.
-

When something looks wrong

A buyer says they never got my message.

Check the reply window on the conversation. After 24 hours without a message from them, WhatsApp accepts a normal message and never delivers it. Use an approved template, or ring them.

A lead went to the wrong agent.

Open the conversation and use **This should have gone to someone else**. It reaches a manager with the routing decision attached.

A listing is not on the portals.

Check it has a photo (**Photos** on Listings) and a valid Trakheesi permit. Without both it is held back. Check Rejected by a portal at the top.

The Channels screen says a channel can't reply.

Its WhatsApp access token is missing or has expired. Reconnect it with the token from Meta.

I think a figure is wrong.

Every screen says where its number comes from. Commission is dated by when money arrived; the pipeline is weighted by stage. Ask your manager, or email hello@potatofarm.io.

The assistant did not reply to someone.

Check the top bar for **Assistant stopped**, the conversation for **I've got this** or **Handover**, and whether the buyer wrote STOP. Past qualification, once an agent has written, or during working hours when it is set to **Outside working hours**, it drafts rather than sends.

My sign-in link does not arrive.

Look in Junk or Other. The link lasts ten minutes; request another if it has expired.

Add to file says WhatsApp no longer has it.

WhatsApp keeps what a buyer sends for a limited time. Ask them to send it again.

I can't open Compliance.

By design. Only the compliance officer can, because telling a client a report has been filed is an offence.

Still stuck? Email hello@potatofarm.io from the address you sign in with, and a person will reply.

Words we use

24-hour window	WhatsApp's rule: a business may send free-form messages only within 24 hours of the customer's last message.
Handover	The assistant has asked for a person to take a conversation.
I've got this	Silences the assistant on one conversation.
Stop everything	Halts the assistant across the whole brokerage, immediately.
Replies while qualifying	The owner's choice of whether the assistant replies to new buyers by itself: off, outside working hours, or always.
Draft / Reply ready	A reply the assistant has written for an agent to send.
Score (Golden, Hot, Warm, Cold)	How likely a lead is to transact, recalculated every night, with the reasons shown.
Trakheesi	Dubai Land Department's advertising permit. No permit, no listing.
Form F	The sale agreement; its completion date is what a deal is planned back from.
DLD	Dubai Land Department, where transfer happens.
DNFBP	Designated non-financial business or profession: a UAE brokerage concluding a sale is one, with AML duties.
MLRO	Money laundering reporting officer: the compliance officer.
STR / SAR / REAR	Suspicious transaction report, suspicious activity report, real-estate activity report.
PEP	Politically exposed person.
Nurture plan	A timed list of reminders for somebody not ready yet. Nothing is sent by itself.
Blackbook	Your personal contacts and notes. Yours, not the brokerage's.
Baseline	Your reply times before the assistant was switched on, frozen so the difference can be measured.

PotatoFarm.io

Every property enquiry answered in seconds, qualified in the
buyer's own language, and carried through to transfer.
