

PotatoFarm.io

TRAINING MANUAL

Every enquiry answered. Every deal on track.

The complete guide to PotatoFarm.io for agents, managers, owners and compliance officers, on desktop and on your phone.

The desktop interface shows a top navigation bar with 'Today', 'Inbox', 'Leads', 'Listings', 'Pipeline', 'Diary', and 'Settings'. A search bar and a status indicator 'Demo — messages recorded, never delivered' are also present. The main area is divided into a left sidebar with filters (All, Unread, Handover, Mine) and a list of enquiries. The selected enquiry from Sarah Al Mansoori is shown in detail, including a timeline of messages and a suggested reply.

Enquiry List:

- James Whitfield: How long do they have to respond? (AED 18.0M, Window 11h)
- Marco Rossi: Booked for Saturday, Marco. I'll send the locations the night before. (AED 2.3M, Window 10h)
- Sarah Al Mansoori: Also — is the service charge included in what you quoted? (AED 12.0M, Window 10h)
- Layla Al Ameri: Happy to help — what sort of budget are you working to? (AED 7.8M, Window 10h)
- Noura Al Suwaidi: No problem at all. I'll keep your details on file if anything changes. (AED 15.0M, Window 9h)
- Aditi Ramanathan: Thank you! Genuinely, you made that painless. (AED 6.4M, Window 9h)
- Emma Lindqvist: Hello? Still there? (AED 3.2M, Window 9h)

Enquiry Detail: Sarah Al Mansoori

26 Sept, 21:51

PotatoFarm.io: That works for this one. Omar looks after Dubai Hills — shall I ask him to call you?

26 Sept, 21:52 · read

You: Sarah, Omar here. I have the keys Saturday morning if you'd like to see it.

26 Sept, 22:01 · read

Lead: Saturday works. Can my husband join on video?

26 Sept, 22:04

Lead: Also — is the service charge included in what you quoted?

26 Sept, 22:07

o Reply window open · 10h left

Suggested reply — written by the assistant, sent only when you press Send

Of course — your husband is welcome to join on video, and Omar will send the link on Saturday morning. The price quoted doesn't include the service charge, which is paid to the building each year. Omar will bring the exact figure from the owner's statement so you have it in writing.

I've got this

The mobile app interface shows a 'Good morning' greeting and a list of tasks. The tasks are: 1. Call Michael (warming — up 28 points this week, replied 2 days ago — and nobody has been back to them for 2 days), 2. Get Priya in front of something (Viewing AED 3.9M, They have told you what they want and have not seen a single property yet).

Good morning

4 running hot. AED 19.0M of that is live.

Tell me what happened, or what you need...

Who does what

Everybody signs in to the same system and sees what their role needs. Each section of this manual is marked with the roles it is for.

WHAT	AGENT	MANAGER	ADMIN	OWNER	COMPLIANCE OFFICER
See every lead in the brokerage	—	•	•	•	•
See their own leads and message them	•	•	•	•	—
Add and edit leads, book viewings	•	•	•	•	—
Give leads to agents, import and export	—	•	•	•	—
Add and change listings	—	•	•	•	—
See the brokerage's revenue	—	•	•	•	—
Invite people	—	•	•	•	—
Remove people, change channels, settle commission	—	—	•	•	—
Billing	—	—	—	•	—
Open Compliance and decide on reports	—	—	—	—	•

GOOD TO KNOW

- A **Viewer** can read leads, conversations and listings and change nothing: for a partner or an auditor.
- Owners and admins cannot open Compliance. By law, the compliance officer's reports are kept from everybody else: telling a client a report has been filed is an offence.
- Agents see their own leads; managers and owners see everybody's. An agent handling another piece of business with a person (a letting alongside a purchase) can read that person's page, but changes to the lead stay with its own agent.

01

Getting started

Signing in, finding your way round, and setting the brokerage up.

1.1 Signing in

1.2 Check your email, and two-step sign-in

1.3 Finding your way round

1.4 Search anything (Ctrl K)

1.5 Setting up a new brokerage

1.1 Signing in

EVERYONE

PotatoFarm.io has no passwords. You type your work email and we send you a link that signs you straight in. The link works once and lasts ten minutes, so a forwarded email is never a standing key to your brokerage.

The sign-in screen. There is no password.

How to

- 1 Go to the sign-in page and type your work email.
- 2 Press **Email me a link**.
- 3 Open the email on this device (or your phone) and tap the link. You are signed in.
- 4 Nothing after a minute or two? Look in Junk or Other: it is the first message we have sent you, so it has no history to be judged on.

GOOD TO KNOW

- New brokerage? Use **Start a trial** under the sign-in button. Existing brokerage? Ask your owner or manager to invite you from the Team screen.
- Stay signed in on your own phone and laptop only. You can see every device you are signed in on under Settings → Security.

1.2 Check your email, and two-step sign-in

EVERYONE

If you have turned on two-step sign-in (strongly recommended for owners and managers), you are asked for a six-digit code from your authenticator app after the email link. Somebody who gets into your email still cannot get into your brokerage.

After pressing Email me a link.

Two-step sign-in, if it is on for you.

How to

- 1 Open the email link as usual.
- 2 When asked for **One more step**, open your authenticator app (Google Authenticator, Microsoft Authenticator, 1Password and similar).
- 3 Type the six-digit code shown for PotatoFarm and press **Finish signing in**.
- 4 Lost your phone? Use one of the recovery codes you saved when you turned it on.

GOOD TO KNOW

- Your owner cannot switch two-step off for you. That is deliberate: if they could, so could anybody who got into their account. Email hello@potatofarm.io from your sign-in address instead.

1.3 Finding your way round

EVERYONE

Every screen sits inside the same frame. Along the top: the seven places you go most, a search box, and the name of the brokerage you are working in. On a phone the same places move to a bar at the bottom, within reach of your thumb (see *On your phone*).

The top bar on a desktop: Today, Inbox, Leads, Listings, Pipeline, Diary and Settings.

How to

- 1 **Today:** what to do next, in order.
- 2 **Inbox:** every WhatsApp conversation.
- 3 **Leads:** everybody who has enquired, with filters.
- 4 **Listings:** your properties, permits and portals.
- 5 **Pipeline:** the board, by stage.
- 6 **Diary:** viewings.
- 7 **Settings:** everything else, including Offers, Deals, Commission, Reports, Compliance and Team.

GOOD TO KNOW

- The brokerage name on the right tells you which brokerage you are in. If you work for two, check it before you message anybody.
- A pink **Demo** label means you are in a demonstration brokerage: messages are recorded and never delivered. You will not see it in a real brokerage.
- If the assistant has been stopped, the top bar says **Assistant stopped**. Its absence is the normal state.

1.4 Search anything (Ctrl K)

EVERYONE

The quickest way to anything. Press **Ctrl K** (or **⌘K** on a Mac), or click **Search** in the top bar, and type a name, a number, a building or a reference. People, owners, properties and screens all come up in one list.

Press Ctrl K (⌘K on a Mac) anywhere and start typing.

How to

- 1 Press **Ctrl K** from any screen.
- 2 Type part of a name, a phone number, a listing reference such as *MG-202*, or a screen name such as *commission*.
- 3 Use the arrow keys and **Enter**, or click, to open it.
- 4 Press **Esc** to close it.

GOOD TO KNOW

- For questions rather than names ("3 bed in Dubai Marina under 3m"), use **Find anyone**, the first entry in the list.

1.5 Setting up a new brokerage

OWNERS AND ADMINS

Setup is the owner's checklist for a new brokerage. The steps are ordered so that the slow one, WhatsApp verification with Meta, starts first and runs in the background while you do the rest.

Setup: nine steps, in the order that saves the most time.

How to

- 1 **Company details:** name, timezone and currency. Two minutes.
- 2 **Connect your WhatsApp number:** you are handed to Meta to verify the business. This usually takes two to three working days and none of it is in our hands, so start it first.
- 3 **Invite your agents:** they can use the inbox before WhatsApp is live.
- 4 **Set your working hours,** including the weekend. Viewings are only offered inside them.
- 5 **Import your listings** from a CSV export or your existing portal feed. You see what was found before anything is saved.
- 6 **Connect your portals** once you have partner credentials from Property Finder, Bayut or Dubizzle.
- 7 **Write your qualifying questions:** the questions you would want asked on a first call.
- 8 **Record where you are today:** we measure your current reply times before the assistant does anything, so the difference is yours to check.
- 9 **Switch the assistant on.**

GOOD TO KNOW

- Each step says **Do it** and takes you to the right screen. A step you have finished stays ticked.

02

Your working day

Where agents spend their time: Today, the Inbox, leads, the people behind them, and the diary.

2.1 Today

2.2 The Inbox

2.3 A conversation, and the assistant's replies

2.4 Try a live enquiry (demonstration brokerage only)

2.5 Leads

2.6 Adding a lead

2.7 Importing and exporting leads

2.8 A person's page

2.9 Tasks and follow-ups

2.10 Adding a task

2.11 The diary and booking viewings

2.12 Say it: record by voice or text

2.13 Find anyone

2.14 Your blackbook

2.15 My figures, availability and alerts

2.1 Today

EVERYONE

Today is the first screen you open. It is not a dashboard of numbers. It is a short list of what to do next, in order, each with the reason it is there. An offer about to lapse outranks a warm lead, because that is the deal you actually lose.

Today for the owner: the day in one line, five things to do, deals to keep moving and follow-ups.

How to

- 1 Read the line at the top: viewings today, people waiting on a reply, follow-ups due, and what is live.
- 2 Work down **Today** from 1 to 5. Each item says what to do (Negotiate, Follow up, Send, Log outcome) and why.
- 3 Press **Done** when it is done, or **Not now** to move it out of the way for today.
- 4 Check **Deals to keep moving**: completions that are no longer achievable, and what to agree.
- 5 Clear **Follow-ups**. Some carry a draft message; press **Show the draft** to read it before you send anything.
- 6 Use the box at the top, *Tell me what happened, or what you need*, to record something quickly by typing or with **Speak**.

GOOD TO KNOW

- "Reply to Stefan before the window shuts" means the WhatsApp reply window is about to close. After that a normal message is accepted by WhatsApp and never delivered. Reply first, tidy up later.
- Managers and owners also see the whole brokerage's figures on the right: live pipeline, running hot, waiting on a reply and viewings today.

2.2 The Inbox

AGENTS

MANAGERS

Every WhatsApp conversation with a buyer or an owner, newest first. Each row tells you what you need before you open it: the last message, the budget, **Reply ready** if the assistant has drafted one, **Handover** if a person is needed, and the reply window.

The conversation list. Tags show the budget, whether a reply is ready, and how long the reply window has left.

How to

- 1 Use the filters along the top: **All**, **Unread**, **Handover** (the assistant has asked for a person) and **Mine**.
- 2 A pink dot means unread.
- 3 **Window 11h** means you can message normally for 11 more hours. **Window closed** (dashed) means a normal message will not arrive: use an approved template, or ring them.
- 4 Click a conversation to open it on the right.

GOOD TO KNOW

- The reply window is WhatsApp's rule, not ours: businesses may send free-form messages only within 24 hours of the customer's last message. PotatoFarm.io checks it before every send.

2.3 A conversation, and the assistant's replies

AGENTS

MANAGERS

Open a conversation to see the whole thread, who wrote what (the buyer, the assistant, or you), the reply window, and any reply the assistant has prepared.

Sarah's conversation. The assistant qualified her; Omar took over; the assistant has drafted a reply for Omar to send.

How to

- 1 **While a new buyer is being qualified**, the assistant replies by itself in their language, one question at a time, if your owner has switched that on (Settings → Assistant). It never claims to be a person.
- 2 **Once you have written in a conversation**, or the buyer is qualified, the assistant stops sending and drafts instead. The draft appears above the reply box as *Suggested reply*.
- 3 Press **Send as written** to send it, **Edit** to change it first, or **Discard** to throw it away.
- 4 To write your own, type in **Write a reply...** and press **Send**. **Attach** sends a brochure, floor plan or document.
- 5 **I've got this** silences the assistant on this conversation only, for a delicate negotiation. **Hand back** gives it back.
- 6 **Call** and **WhatsApp** at the top open your phone's dialler or WhatsApp with the number ready.

GOOD TO KNOW

- Below the thread: **Identity** shows whether a compliance file is needed (one opens by itself when an offer is accepted), and **How this came to you** shows why the lead was routed to you. If it should have gone to somebody else, say so there; it goes to a manager with the routing decision attached.
- What you do with each draft (sent as written, edited, discarded) is recorded. It is how your owner decides how much to trust the assistant.

2.4 Try a live enquiry (demonstration brokerage only)

OWNERS AND ADMINS

In a demonstration brokerage, the Inbox has two extra buttons for showing the product to someone. They push a realistic buyer's message through exactly the path a WhatsApp message takes: it becomes a lead, is routed, lands on the board and is answered.

Only in a demonstration brokerage: send a buyer's message through the real system.

How to

- 1 Press **Try a live enquiry** for a ready-made buyer (English or Arabic), or **Type your own** to let somebody in the room write one.
- 2 The new conversation opens at the top of the Inbox, with the assistant's reply a few seconds later.
- 3 Nothing is sent to anybody. The Demo label is on every screen.

GOOD TO KNOW

- You will never see these buttons in a real brokerage.

2.5 Leads

AGENTS

MANAGERS

Everybody who has enquired, from every source, in one list. Agents see their own leads; managers and owners see everybody's.

Leads: tabs, filters, score bands and every person with their source, agent and what is happening.

How to

- 1 Use the tabs: **Everyone**, **Nobody's** (unassigned), **Waiting on us** (they wrote last) and **Gone quiet**.
- 2 Search by name or number, and filter by **Source**, **Score**, **Stage**, agent (**With**) and **Tag**. **Sort** by newest, score, name or last changed.
- 3 The score bands (Golden, Hot, Warm, Cold) show how likely each person is to transact. The line under each name says why: "warming — up 19 points this week · 1 offer made".
- 4 Click a name to open their page.
- 5 Tick several people (or **Select all shown**) to act on them together: give them to an agent, move them to a stage, tag them, archive them or delete them.
- 6 **Showing** switches between current leads, archived ones and recently deleted ones (which can be restored).

GOOD TO KNOW

- **Import** and **Export** (managers) bring a spreadsheet of leads in, or take one out.

2.6 Adding a lead

AGENTS

MANAGERS

Most leads arrive by themselves, from WhatsApp, the portals, your website form or Facebook and Instagram lead ads. Add one by hand for a walk-in, a phone call or a referral.

The screenshot shows the 'Add a lead' form on the left and the leads board on the right. The form has fields for Mobile (+971 50 123 4567), Name (Aisha Khan), Email, How they came to us (Walked in), and What they said (Two-bed in Marina, moving in September, cash.). There are 'Cancel' and 'Add them' buttons. The leads board on the right shows a table of leads with columns for Source, Score, Stage, and With. Below the table is a list of leads with checkboxes and details.

Source	Score	Stage	With
Any	Any	Any	Anyone
Sort	Showing		
Newest first	Current leads		
6	14%		
13	31%		
21	50%		
1	2%		
1	2%		

Not scored yet

- ☐ Select all shown
- ☐ Zeinab Farouk
negotiating - never replied
- ☐ Stefan Muller
WhatsApp ad
- ☐ Layla Al Ameri
negotiating - messaged today - says it is urgent
- ☐ Noura Al Suwaidi
Referral

Add a lead: somebody who walked in, rang, or was referred.

How to

- 1 On Leads, press **Add a lead**.
- 2 Type their **mobile** number with the country code (+971...). A number is enough: it is how WhatsApp knows them, and how they are recognised next time.
- 3 Add their name and email if you have them, choose **How they came to us** (walked in, referral, phone call and so on), and note **What they said**.
- 4 Press **Add them**. They go on the board and to whoever routing picks.
- 5 If the number is already on the book, you are told who has them rather than getting a duplicate.

GOOD TO KNOW

- A walk-in you add yourself stays with you.

2.7 Importing and exporting leads

MANAGERS

OWNERS AND ADMINS

Bring your book across from another CRM, a portal or a spreadsheet. Save it from Excel or Google Sheets as a CSV first.

Import leads from a CSV. Nothing is added until you press Import at the end.

How to

- 1 On Leads, press **Import**, then choose the file.
- 2 Match your columns to ours on screen: name, phone, email, source, budget and so on.
- 3 Check what will be created, and which rows will not come across and why.
- 4 Press **Import**. Every import is recorded with a count.
- 5 To take a copy out, press **Export** on Leads.

GOOD TO KNOW

- Only managers and owners can import and export. An export is every client's number in one file.

2.8 A person's page

AGENTS

MANAGERS

Everything about one person on one page. Open it from Leads, the Inbox, the Pipeline or search.

David Chen: contact details, what he wants, other business with him, next step, private notes and everything that has happened.

How to

- 1 The three buttons under the name, **Call**, **Message** and **Next step**, are the things you do most.
- 2 **Edit** changes their details: language, budget, what they are looking to do, when, how they are paying, and a visa renewal date if they mentioned it (never ask for it). The phone number is fixed: it is their WhatsApp identity.
- 3 **What they're looking for** is the search that matches them to properties. The assistant fills it in from the conversation; yours wins once you change it. **Add another search** if they want two things.
- 4 **Other business with them**: the buyer who is also letting their villa. Add it, give it a value and an agent, and move it along its own column on the board.
- 5 **Next step**: add a task. **Nurture plan**: put somebody who is "six months away" on a plan of reminders.
- 6 **Your note** is private to you. No manager sees it.
- 7 Underneath is the whole history: messages, viewings, offers and emails, newest first.

GOOD TO KNOW

- If the reply window has closed, the page says so. Use an approved template, or ring them.

2.9 Tasks and follow-ups

AGENTS

MANAGERS

Everything you have said you will do, and the follow-ups PotatoFarm.io has put on your list: asking how a viewing went, checking in at a visa renewal, the next step of a nurture plan. Many come with a draft message; nothing is ever sent by itself.

Tasks: yours, the ones you asked others for, and the whole team's.

How to

- 1 Switch between **Mine**, **I asked others** and **Whole team**.
- 2 Press **Add a task** to write one, for yourself or a colleague, with a due date.
- 3 Read the draft if there is one, send it yourself, then press **Done**.
- 4 **Show done** brings back what you have finished.

GOOD TO KNOW

- "Don't mention the visa or the date" on a renewal task is deliberate: it reads as a file on them. Just check in.

2.10 Adding a task

AGENTS

MANAGERS

A task is a promise with a date on it. Give it to yourself, or ask a colleague.

The screenshot shows the PotatoFarm.io web application. The top navigation bar includes links for Today, Inbox, Leads, Listings, Pipeline, Diary, and Settings. A search bar with 'Q Search Ctrl K' and a status indicator 'Demo — messages recorded, never delivered' are also present. The main content area is titled 'Tasks' and shows '1 to do'. A form for adding a task is displayed with the following fields: 'What' (containing 'Send Sarah the Marina Gate floor plan'), 'Day' (set to '09/27/2026'), 'Time' (set to '09:00 AM'), and 'For' (set to 'Me'). There is an optional 'Note' field and an 'Add it' button. Below the form, there are filters for 'Mine', 'I asked others', and 'Whole team', and a 'Show done' link. The 'Today' section shows a task: 'Check in with Peter — their visa renews on 3 December 2026' with a 'Done' button.

Add a task: what, for whom, and when.

How to

- 1 Press **Add a task**.
- 2 Write **What** needs doing, pick the **Day** and **Time**, and choose **For**: yourself or a colleague.
- 3 Add a note if it helps, and press **Add it**. It appears on their Today and their Tasks.
- 4 To add a task about a particular person, use **Next step** on their page instead: it is linked to them.

2.11 The diary and booking viewings

AGENTS

MANAGERS

Every viewing, by day. Booking only offers times inside your brokerage's working hours and times you can actually reach, so you are never offered a slot that leaves you crossing the city in twenty minutes.

The diary: today's viewings, in order.

Book a viewing: only times you can actually get to.

How to

- 1 Open **Diary** to see today's viewings in order: the time, the client, the property and its reference.
- 2 Each viewing has **Directions**, **WhatsApp** and **Call**. **Move it** changes the time.
- 3 To book, pick a time from the offered slots and press **Book it**.
- 4 After the viewing, record what happened: they came, they did not, and what they thought. Today reminds you ("How did the viewing go?") until you do.
- 5 The owner's weekly report counts the feedback; the buyer's own words stay with you.

GOOD TO KNOW

- Your viewings can appear in your own phone calendar: Settings → **Create my calendar link**.

2.12 Say it: record by voice or text

AGENTS

The fastest way to get something out of your head and into the system, between viewings or in the car. Type or speak a sentence and it works out what to record and what to do next.

Say it: tell it what happened, and it works out what should happen next.

How to

- 1 Open **Ask** (from Search, or the box on Today).
- 2 Type, or press **Speak** and talk: "Met Sarah today, after a four-bed villa in Dubai Hills around twelve million, moving within three months."
- 3 Press **Go**. You see what it understood, and it is kept under **Earlier**.

GOOD TO KNOW

- It prepares; you confirm. It never sends anything to a client.

2.13 Find anyone

EVERYONE

Search in plain words, across people, owners and properties at once.

Find anyone: ask the way you would ask a colleague.

How to

- 1 Type a question the way you would ask a colleague: *3 bed in Dubai Marina under 3m, sellers in Palm Jumeirah, anyone relocating.*
- 2 Press **Find**. Results are grouped by people, owners and properties.

GOOD TO KNOW

- Area names are understood as places: "Dubai Hills" finds listings filed under "Dubai Hills Estate".

2.14 Your blackbook

AGENTS

Your personal book of contacts: the developer's sales manager, the mortgage broker, the building manager. Your notes and tags are yours. No manager sees this page, and you can export it and take it with you if you ever leave.

Your blackbook: your own contacts, notes and tags.

How to

- 1 Press **Add somebody**, give them a name, number, tags and a note.
- 2 Filter by tag, or star the ones you call most.
- 3 **Export your book** downloads your notes, nicknames and tags.

GOOD TO KNOW

- Client records and compliance files belong to the brokerage and stay with it. Your blackbook is yours.

2.15 My figures, availability and alerts

AGENTS

Your own page: what you are owed, where you rank, whether you are taking new leads, and when alerts may reach you.

The screenshot shows the 'Yours' page in the PotatoFarm.io interface. The page is dark-themed and contains the following sections:

- Navigation bar:** Includes the PotatoFarm.io logo, links for Today, Inbox, Leads, Listings, Pipeline, Diary, and Settings. It also has a search bar with 'Search' and 'Ctrl K' buttons, a notification 'Demo — messages recorded, never delivered', and the user's name 'Marina Bay Properties'.
- Last 30 days:** A section header for the main content area.
- Yours:** A sub-header with the text 'You see these first. Your manager's view runs 24 hours behind.'
- Financial figures:** Three boxes displaying values: 'AED 2,640.00' (Owed to you), 'AED 8,400.00' (Paid), and 'AED 5,350.00' (Forecast).
- The board:** A section showing a leaderboard with one entry: '1 Lena Popescu' with a score of '0'. Below this is a note: 'Positions are shared, figures aren't. Your brokerage can open this up in settings if everyone wants it.'
- Your availability:** A section with the text 'This is what decides whether a new enquiry comes to you. Nothing else on this screen changes who gets what.'
- Send me new leads:** A toggle switch that is currently checked. Below it is a note: 'Off means routing skips you entirely. Leads you already have are unaffected — nobody takes work off you for this.'
- Away:** A section with two date pickers for 'First day' and 'Last day', both showing 'mm/dd/yyyy'. Below these is a text input field for 'Note (optional)' containing the text 'Back Monday'.
- Save button:** A pink button at the bottom right of the form.

Yours: your figures for the last 30 days, whether you are taking new leads, and when not to buzz you.

How to

- 1 See what you are owed, what has been paid and what is forecast.
- 2 **Send me new leads:** switch off and routing skips you. Leads you already have are not taken away.
- 3 **Away:** set the first and last day you are off, with an optional note.
- 4 **When not to buzz you:** quiet hours and days off. Anything that arrives then is held and sent once you are back, in one message. **Let urgent things through anyway** keeps a buyer waiting mid-conversation from being held.

GOOD TO KNOW

- Quiet hours are in Dubai time, so they do not move when you travel.

03

Properties and deals

Listings, owners, the pipeline, offers, deals and the money that follows.

3.1 Listings

3.2 Adding a property

3.3 The page a buyer sees

3.4 Owners (vendors)

3.5 The pipeline

3.6 Offers

3.7 Recording an offer

3.8 Deals

3.9 Commission

3.10 Revenue

3.11 Documents: permits, cards and licences

3.1 Listings

AGENTS

MANAGERS

Every property on the book, with its price, portals and Trakheesi permit. The two panels at the top are the ones that cost money when missed: permits expiring inside 14 days, and listings a portal has rejected.

9 available

2 Permits expiring inside 14 days
An expired Trakheesi permit means the listing is pulled and you're advertising illegally until someone notices.

0 Rejected by a portal
Rejections are silent from your side — the listing just never appears.

Reference, name or building: DH-101, Marina Gate

Status: Available

Sale or rent: Either

Area: Marina

Type: Any

Ready or off-plan: Either

Bedrooms: Any

Price from (AED): 1m

Price up to (AED): 3m

Agent: Anyone

Sort: Last changed

Property	Price	Portals	Permit
TH-514 Three-bedroom townhouse, Town Square Townhouse	AED 1,980,000		16 days left
BB-506 One-bedroom apartment, Business Bay Apartment	AED 1,650,000		10 days left
EH-512 Six-bedroom villa, Emirates Hills Villa	AED 47,000,000		239 days left

Listings: permits about to expire, portal rejections, filters and every property.

How to

- 1 Filter by status, sale or rent, area, type, ready or off-plan, bedrooms, price and agent.
- 2 Each row shows days left on the permit. An expired Trakheesi permit means the listing is pulled and you are advertising illegally until someone notices.
- 3 **Edit** changes the details. **Check wording** checks the advert for claims that break the rules. **Who wants it** lists buyers whose search matches. **Publish** queues it for the portals. **Owner** sets who owns it and which agent looks after it.
- 4 **Export** downloads the list.

GOOD TO KNOW

- A listing will not publish without a valid permit.

3.2 Adding a property

MANAGERS

Add a property by hand, or import many at once (Settings → Import).

The screenshot shows the 'Add a property' form on the left and a 'Rejected by a portal' message on the right. The form has the following fields:

- Reference: DH-101
- Name: 2-bed, Marina Gate
- Community: Dubai Marina
- Building: Marina Gate 1
- Bedrooms: (empty)
- Bathrooms: (empty)
- Area (sq ft): (empty)
- Price (AED): 2,400,000
- Type: Not said
- Ready or off-plan: Ready
- Purpose: For sale
- Status: Available
- Trakheesi permit — needed before it can be advertised:
 - Permit number: (empty)
 - Expires: mm/dd/yyyy
- RERA broker card: (empty)
- Off-plan and rental details: (empty)

The 'Rejected by a portal' message on the right says: 'Rejected by a portal. Rejections are silent from your side — the listing just never appears.'

Add a property: the details a buyer asks about first, and the permit.

How to

- 1 On Listings, press **Add a property**. A reference and a name are enough to start; everything else can follow.
- 2 Add the community, building, bedrooms, bathrooms, area and price, then the type, ready or off-plan, for sale or to rent, and its status.
- 3 Under **Trakheesi permit**, enter the permit number and expiry, and the RERA broker card. The permit is needed before it can be advertised.
- 4 Off-plan and rental details are further down if they apply.
- 5 Press **Add it**. It appears on Listings, and **Who wants it** immediately lists matching buyers.

3.3 The page a buyer sees

EVERYONE

Every available listing has a public page you can send to a buyer. It shows the facts, the permit and RERA numbers, and a button to ask about it, which arrives as an enquiry.

A listing's public page: what a buyer sees from a link you send.

How to

- 1 Open the listing and copy its link, or send it from a conversation.
- 2 When the buyer presses **Ask about this property**, it arrives in your Inbox like any other enquiry.

3.4 Owners (vendors)

AGENTS

MANAGERS

The seller side. Each owner has a page with their properties, viewings and offers, and the weekly report they receive.

An owner's page: their properties, and what has happened since you last spoke.

A screenshot of the 'Add an owner' form in the PotatoFarm.io web application. The form is titled 'Add an owner' and includes several input fields: 'Name', 'Phone', 'Email', and 'Acting for (if not the owner)' with a dropdown menu showing 'Power of attorney, family member, company rep'. Below these is a section 'How they want to hear from you' with four radio button options: 'WhatsApp' (selected), 'A call', 'Email', and 'Only when there's an offer'. Each option has a brief description. At the bottom, there is a 'Weekly report day' section with a row of buttons for 'Mon', 'Tue', 'Wed', 'Thu' (selected), 'Fri', 'Sat', 'Sun', and 'None'. A final note at the bottom explains that a quiet week is still worth sending a report.

Add an owner, and how they want to hear from you.

How to

- 1 Open an owner from a listing's **Owner** button, or add one with **Add an owner**.
- 2 Choose how they want to hear from you: **WhatsApp, a call** (the report is prepared and put on your list; we do not ring people), **email**, or **only when there's an offer**.
- 3 Pick the day for their weekly report. A quiet week is still worth sending: an owner who hears nothing assumes you have stopped trying.

GOOD TO KNOW

- "Only when there's an offer" is a real instruction. Ringing that owner for a chat is the fastest way to lose the property.
- An owner who writes to your WhatsApp number lands on their own conversation, not as a new buyer.

3.5 The pipeline

AGENTS

MANAGERS

The board, by stage: New, Qualifying, Viewing booked, Negotiating, Won and Lost. At the top, **Where it stops moving** shows how many people and how much value sit in each stage, so you can see where the pipeline is stuck.

The board: where things stop moving, then every column with its people and value.

How to

- 1 Each card shows the person, their budget, where they came from and their agent.
- 2 **Untouched 3 days** means nobody has done anything for that long. Those are the ones to look at.
- 3 Move a card by dragging it to another column, or change the column from the person's page.
- 4 Other business with a person (a letting alongside a purchase) appears as its own card in its own column.

GOOD TO KNOW

- Agents see their own cards; managers see everyone's.

3.6 Offers

AGENTS

MANAGERS

Every live offer, soonest to expire first, because an offer that lapses while you were looking at a bigger one is a deal lost to a calendar. Open a property to see its offers ranked by strength, not price.

Live

6 on the table.

Soonest to expire first. An offer that lapses while you were looking at a bigger one is a deal lost to a calendar.

AED 11,200,000	DH-101	3h
AED 3,050,000	MG-202	19h
AED 10,950,000	DH-101	26h
AED 11,000,000	DH-101	50h
AED 2,320,000	DH-509	70h
AED 1,560,000	BB-506	92h

Offers on the table, soonest to expire first.

One property's offers, strongest first.

How to

- 1 Open **Offers** to see everything on the table and how long each has left.
- 2 Click a property. Offers are ordered by whether the buyer can actually complete: cash with no conditions beats a higher offer subject to a mortgage nobody has applied for.
- 3 Press **Counter** to record the owner's counter. Offers are never edited: each move is kept, so the negotiation is on record.
- 4 Press **Accept** when the owner agrees. A deal is created and, if needed, a compliance file opens.

GOOD TO KNOW

- "Strongest, not highest" is the label to show an owner. It is the conversation that wins you the instruction next time.

3.7 Recording an offer

AGENTS

Record every offer the moment you hear it, so it is ranked, timed and on the owner's report.

The screenshot shows the 'Record an offer' form in the PotatoFarm.io application. The form is set against a dark background. At the top, there is a navigation bar with the PotatoFarm.io logo, links for Today, Inbox, Leads, Listings, Pipeline, Diary, and Settings, a search bar with 'Q Search Ctrl K', a status indicator 'Demo — messages recorded, never delivered', and the user's name 'Marina Bay Properties'. The form itself has the title 'Record an offer' and several sections: 'Amount in dirhams' with a text input field; 'How they're paying' with three buttons: 'cash', 'mortgage', and 'Not said' (which is highlighted in pink); a checkbox labeled 'The seller has a mortgage on the property' with explanatory text below it; 'Conditions' with a text area containing 'Subject to survey, subject to another sale, a fixed completion date...'; 'Expires in (days)' with a text input field containing the number '3'; and a final note about marking offers as lapsed. At the bottom of the form is a large 'Record it' button.

Record an offer: the amount, how they are paying, conditions and when it expires.

How to

- 1 Enter the amount in dirhams.
- 2 Choose how they are paying: cash, mortgage, or not said. Tick if the seller has a mortgage on the property; it changes how long the transfer takes.
- 3 Add conditions ("subject to selling their own villa").
- 4 Set how many days it is open for. We mark it lapsed and tell you when it runs out.
- 5 Press **Record it**.

3.8 Deals

AGENTS

MANAGERS

An accepted offer becomes a deal, planned backwards from the completion date on the Form F. The screen tells you which deals are at risk and why.

at risk	Aditi Ramanathan · Marina Gate 2 The completion date is no longer achievable — short by 25 working days.	AED 5.3M Agreed
at risk	Fatima Al Zaabi · Palmera 3 The completion date is no longer achievable — short by 4 working days.	AED 8.4M Agreed
on track	Tom Bradley · Creek Rise No completion date agreed yet, so there is nothing to be late for.	AED 2.6M Agreed

Deals: every agreed sale, and whether its completion date is still achievable.

How to

- 1 **At risk** means the agreed completion date is no longer achievable. The line says by how many working days.
- 2 **On track** means nothing is late, or no date has been agreed yet.
- 3 Click a deal to see its steps to transfer at the DLD. Tick each step as it is done, or mark it blocked with the reason, so everyone can see what is holding it up.

GOOD TO KNOW

- A mortgaged buyer against a mortgaged seller takes roughly 47 working days. A 30-day Form F is about 22. Agree realistic dates early.

3.9 Commission

AGENTS

What you are owed, what has been paid, what is invoiced and what is forecast, deal by deal.

The screenshot shows the 'Commission' section of the PotatoFarm.io interface. It features a summary table titled 'What you're owed' and a table titled 'Every deal'.

What you're owed	
AED 8,400.00 Paid	AED 2,640.00 Owed to you
AED 0.00 Invoiced, awaiting payment	AED 5,350.00 Forecast

Every deal		
DM-507	AED 5,350.00	forecast
CT-515	AED 2,640.00	received
AR-508	AED 8,400.00	paid

Commission: what you are owed, what has been paid, and every deal.

How to

- 1 **Owed to you:** the brokerage has been paid and your share has not yet been paid out.
- 2 **Paid:** paid to you. **Forecast:** deals not yet invoiced.
- 3 Each deal shows its reference, amount and state: forecast, invoiced, received or paid.

GOOD TO KNOW

- If your share looks wrong, check your commission plan with your manager (Settings → Commission).

3.10 Revenue

OWNERS AND ADMINS

MANAGERS

What the brokerage has actually earned, dated by when the money arrived. Owners and admins also move fees along from here.

Revenue: what the brokerage has actually been paid, and what is still to settle.

How to

- 1 See what was received in the last twelve months, what is invoiced and not yet paid, and what is forecast.
- 2 Under **To settle**: press **Mark invoiced** when you bill a fee and **Mark received** when the money arrives. **Write off** if it never will.
- 3 Once received, press **Mark paid** against each agent's share when you pay them.
- 4 **By month** shows every month, including the quiet ones.

GOOD TO KNOW

- Only owners and admins can mark money received or paid. A manager can read the book.

3.11 Documents: permits, cards and licences

EVERYONE

The register of documents with an expiry date: Trakheesi permits, RERA broker cards, the brokerage licence. It tells you what needs renewing, and which lapses stop work.

Documents: what needs renewing, and what stops work when it lapses.

How to

- 1 Filter by **Needs renewing**.
- 2 Each entry says what happens when it lapses. A broker card: that agent cannot legally act on a transaction.
- 3 Press **Record one** to add a document and its expiry, with a scan if you have it.
- 4 Press **I have seen it** to confirm a document you have checked.

GOOD TO KNOW

- Agents can always record their own broker card.

04

Running the brokerage

Reports, the assistant's record, the team, documents and compliance.

4.1 Reports

4.2 What the assistant did

4.3 Team

4.4 Compliance (for the compliance officer)

4.1 Reports

MANAGERS

OWNERS AND ADMINS

How the brokerage is doing, starting with the number the product exists to improve: how quickly enquiries are answered.

Reports: response time, by hour, by source, the weighted pipeline and who has gone quiet.

How to

- 1 **Response time:** the median first reply.
- 2 **Capture this week as your baseline** before switching the assistant on. It freezes the current numbers, so the difference afterwards can be measured.
- 3 **By hour of day:** when enquiries arrive and how quickly they are answered. The gap after six in the evening is usually the whole story.
- 4 **Where they come from:** leads, wins and conversion by source.
- 5 **The business:** the pipeline weighted by stage, commission on its way, enquiry-to-completion time and who has gone quiet, by agent.

GOOD TO KNOW

- Choose the period: last 30 days, 90 days or year.

4.2 What the assistant did

MANAGERS

OWNERS AND ADMINS

A record of everything the assistant has done on your behalf, why it did it, and how to undo it. This is also where you choose how much it may do on its own.

What it did: everything the assistant has done for you, why, and how to take it back.

How to

- 1 **Copilot:** it tells you what to do; you do all of it.
- 2 **Assisted:** it prepares what it can and waits for you.
- 3 **Autopilot:** it handles reversible, internal things on its own, and still asks before anything it starts reaches a client.
- 4 Under **Recently**, each entry says what it did and gives you the way to take it back.

GOOD TO KNOW

- Replying to a new buyer while qualifying is a separate switch: Settings → Assistant.

4.3 Team

OWNERS AND ADMINS

MANAGERS

Invite people, set their role, choose who gets which leads, and decide what agents can see of each other.

Team: who is here, who gets which leads, and what agents see of each other.

How to

- 1 Type an email under **Invite by email**, choose Agent or Manager, and press **Send**. Their seat starts today; you pay for the days they use.
- 2 **Remove** someone and you are asked who takes their book. Leads, viewings and follow-ups move in one go, and their seat stops.
- 3 **Who gets what**: each agent's capacity, languages and communities for routing.
- 4 **What agents see about each other**: the whole board, or just their own figures and rank.

GOOD TO KNOW

- Managers and owners always see the whole team.

4.4 Compliance (for the compliance officer)

COMPLIANCE OFFICER

Every UAE brokerage that concludes a sale is a DNFBP, with anti-money-laundering duties. This screen belongs to the compliance officer (MLRO). Owners and admins cannot open it, by law: telling a client a report has been filed is itself an offence.

The compliance officer's desk: decisions waiting, reportable transactions and reviews due.

The screenshot shows the PotatoFarm.io compliance interface. At the top, there's a navigation bar with links: Today, Inbox, Leads, Listings, Pipeline, Diary, Settings. A search bar with 'Q Search Ctrl K' and a status indicator 'Demo — messages recorded, never delivered' are also present. The main content area is titled 'Compliance' and 'Not screened yet'. Below this is a 'Run the check again' button. A 'Screening history' section is visible. The 'Risk rating' section shows a transaction value of 4200000. A note states: 'There is no deal on this file yet, so there is no figure to read. Value is one of the inputs to the rating — assessing without it would understate a large purchase.' The 'Your decision' section has buttons for 'No filing' (highlighted), STR, SAR, REAR, CNMR, and FFR. Below this is a 'Why' section with a text area for 'At least a sentence. This is the part an inspector reads.' and another for 'Why you are not filing'. A final note at the bottom says: 'A decision not to report is still a decision. Without a reason recorded against it, there is nothing to show.'

A compliance file: screening, risk rating and the decision.

How to

- 1 **Waiting on a decision:** files that need you. **Not checked** means no sanctions or PEP list was consulted: the file is unscreened.
- 2 Open a file. Run the screening, set the risk rating, and enter the transaction value.
- 3 Record your decision: no filing, or STR, SAR, REAR, CNMR or FFR. Write why, in at least a sentence. This is the part an inspector reads.
- 4 A decision not to report still needs a reason.
- 5 Press **Record the decision**. Your name and the time are recorded permanently; the log cannot be edited or deleted.

GOOD TO KNOW

- Nothing is ever auto-cleared. A possible match is always a person's decision.
- Records are kept for five years, even if the sale never completed. An erasure request waits for that to expire.

05

Settings

Every switch an owner or manager can change, and what each one does.

5.1 Settings: the assistant's brake, calendar and listing feed

5.2 The assistant: questions, tone and automatic replies

5.3 Channels

5.4 Lead routing

5.5 Working hours

5.6 Nurture plans

5.7 Commission plans

5.8 Email

5.9 Import your history

5.10 Security and two-step sign-in

5.11 Support access

5.12 Privacy requests

5.13 Billing and invoices

5.1 Settings: the assistant's brake, calendar and listing feed

OWNERS AND ADMINS

MANAGERS

The first Settings screen: whether the assistant is running, the button that stops it, your calendar link, and the feed address a portal collects your listings from.

Settings: the assistant's status and stop button, your calendar link, and your listing feed.

How to

- 1 **Stop the assistant** halts every conversation in the brokerage at once: no delay, no cache, no messages still going out. Press it again to start.
- 2 **Create my calendar link** puts every viewing booked for you in the calendar you already use (Apple, Google or Outlook). It is read-only.
- 3 **Your feed address** is what a portal collects your available, permitted listings from. Copy it and give it to Property Finder, Bayut or Dubizzle once your agreement is signed.

GOOD TO KNOW

- Treat the feed address like a password. Anyone with it can read every property you have for sale or rent.

5.2 The assistant: questions, tone and automatic replies

OWNERS AND ADMINS

What the assistant asks a new buyer, how it sounds, and whether it replies by itself while it qualifies them.

Settings → Assistant: replies while qualifying, the five questions, and the tone.

How to

- 1 **Replies while qualifying:** on, the assistant replies to new buyers by itself within seconds (read receipt, "typing...", then the reply), asks your questions one at a time, and hands over to their agent. Off, every reply is drafted for an agent to send.
- 2 Beside the switch: how many of the assistant's drafts agents sent exactly as written. That is the evidence to look at before you turn it on.
- 3 **What it asks:** five questions, in order: budget, timeline, financing, purpose and a viewing. Change the wording; what each question is for stays fixed, because the answers feed the pipeline.
- 4 **Tone:** how it should sound, in your words.
- 5 Press **Save**. The next enquiry uses it.

GOOD TO KNOW

- It never claims to be a person, and says it is the brokerage's assistant if asked. "Stop everything" and "I've got this" still stop it at once.
- Nothing you write in Tone can make it quote a price nobody gave it, or negotiate for you.

5.3 Channels

OWNERS AND ADMINS

Where enquiries come from: your WhatsApp number, your website form, Facebook and Instagram lead ads, and the portals. A feed that stops does not throw an error, it just sends fewer leads. This is where that becomes visible.

Channels: where enquiries come from, and whether each can reply.

Connect a channel.

How to

- 1 Press **Connect a channel** and choose the type.
- 2 WhatsApp: enter the phone number ID and access token from Meta. Without the token, messages arrive but replies will not send, and the channel says so.
- 3 Website form: you are given an address to post your website's enquiry form to.
- 4 Each channel shows when it last received something. **Disconnect** stops it.

5.4 Lead routing

OWNERS AND ADMINS

MANAGERS

How new leads are shared between agents. Every agent can see this page, because a rule nobody can see is a rule everybody suspects.

Lead routing: how new leads are shared out, and who would get the next one.

How to

- 1 Choose a rule: **In turn**, **Whoever has fewest**, **Whoever replies fastest**, **Always one person**, or a **Shared pool** where the first to claim it owns it.
- 2 **Who would get the next one** shows every agent, their current load and capacity.
- 3 An agent who thinks a lead went to the wrong person raises it from the lead itself; it reaches a manager with the routing decision attached.

5.5 Working hours

OWNERS AND ADMINS

The hours viewings can be offered in. A day with nothing set is treated as closed.

Working hours

Your week.

Viewings can only be offered inside these hours. A day with nothing set is treated as closed, so nothing is offered on it at all.

Sunday	☐ Closed	09:00 AM	to	07:00 PM
Monday	☐ Closed	09:00 AM	to	07:00 PM
Tuesday	☐ Closed	09:00 AM	to	07:00 PM
Wednesday	☐ Closed	09:00 AM	to	07:00 PM
Thursday	☐ Closed	09:00 AM	to	07:00 PM
Friday	☐ Closed	02:30 PM	to	07:00 PM
Saturday	☐ Closed	10:00 AM	to	06:00 PM

Save the week

Working hours: your week, including the weekend.

How to

- 1 Set a start and end time for each day, or tick **Closed**.
- 2 Remember Saturday: most viewings happen at the weekend.
- 3 Press **Save the week**.

5.6 Nurture plans

MANAGERS

A plan puts the next thing to do on an agent's list at the right time, for somebody who is not ready yet. Nothing is sent by itself, and a reply from them pauses the plan until the agent decides to carry on.

Nurture plans: for somebody who said "in about six months".

How to

- 1 Press **New plan**, or start from the ready-made six-touch buyer plan.
- 2 Add steps: what to do, and how many days after the last one.
- 3 Agents put somebody on a plan from that person's page.

5.7 Commission plans

OWNERS AND ADMINS

Each agent's commission bands. Bands are cumulative over the calendar year: an agent earns the share of the highest band they have passed.

Commission plans: each person's bands for the year.

How to

- 1 Press **Set a plan** next to a person.
- 2 Add bands: up to a year-to-date amount, and the share above it.
- 3 Save. Changing a plan never rewrites the old one; the previous bands stay on record.

5.8 Email

AGENTS

MANAGERS

Connect your mailbox so mail with your clients appears on their page beside WhatsApp. Only mail with somebody already on the book is kept, and only who it was with, when, the subject and a line of it. Never the whole message, and nothing else from your inbox.

Email: connect your Gmail or Outlook mailbox.

How to

- 1 Press **Connect Google** or **Connect Microsoft**.
- 2 Sign in to your mailbox and allow read-only access.
- 3 Your mailbox appears under **Connected**. Disconnect it here at any time.

5.9 Import your history

OWNERS AND ADMINS

Bring listings and history across from your current system as a CSV export with a header row. You see exactly which records will not come across, and why, before anything is written.

Import: bring your history across from your current system.

How to

- 1 Choose **Your export file**.
- 2 Match the columns and check the preview.
- 3 Press **Import**.

5.10 Security and two-step sign-in

EVERYONE

Protect your account. Two-step sign-in adds a code from an app on your phone, so somebody who gets into your email still cannot get in here.

Security: two-step sign-in, and every device you are signed in on.

How to

- 1 Press **Turn on two-step sign-in**.
- 2 Install an authenticator app (Google Authenticator, Microsoft Authenticator or 1Password). On your phone, tap **open it in the app**; on a computer, choose "enter a setup key" in the app and type the key shown.
- 3 Type the code the app shows and press **Turn on**. Save the recovery codes you are given somewhere safe.
- 4 **Where you're signed in** lists every device. Do not recognise one? Sign it out, then turn on two-step sign-in.

GOOD TO KNOW

- Owners and managers can see every client and every commission. Please turn it on.

5.11 Support access

OWNERS AND ADMINS

Nobody at PotatoFarm.io can see your data unless you grant it. A grant names one person, lasts 72 hours and expires on its own.

Support access

Nobody has access.

Nobody at PotatoFarm.io can see your data unless you grant it. A grant names one person, lasts 72 hours, and expires on its own — you do not have to remember to close it.

Grant access

Who — one named person

name@potatofarm.io

Not a team, not a role. If you cannot name the person, do not grant it.

Why

Investigating why the Bayut feed stopped on Tuesday

Goes on the permanent record next to their name. If it ever needs explaining, this is the explanation.

Grant for 72 hours

Support access: nobody at PotatoFarm.io can see your data unless you grant it.

How to

- 1 Type the one named person who needs access.
- 2 Write why. It goes on the permanent record next to their name.
- 3 Press **Grant for 72 hours**. You can revoke it early.

GOOD TO KNOW

- If you cannot name the person, do not grant it.

5.12 Privacy requests

OWNERS AND ADMINS

When somebody asks what you hold on them, or asks to be erased.

Privacy requests: a copy of what you hold on somebody, or erasing them.

How to

- 1 Type their WhatsApp number.
- 2 **Build the file** gives you everything you hold on them, in plain language, to send to them.
- 3 **Erase** scrubs their personal details and keeps the audit trail. If there is a live compliance file, erasure waits: UAE rules require five years of due-diligence records, and we tell them when it expires.
- 4 **Past requests** lists every request and what was done.

5.13 Billing and invoices

OWNERS AND ADMINS

What this month will cost, your payment card, the details on your invoices, and every invoice.

The screenshot shows the 'Settings' page in the PotatoFarm.io application. The top navigation bar includes links for Today, Inbox, Leads, Listings, Pipeline, Diary, and Settings. A search bar and a status indicator 'Demo — messages recorded, never delivered' are also present. The main content area displays the following information:

- This month so far:** A large display of **\$415.63**, with a note below it: 'AED 1,526.41 — what the invoice will say. No VAT is charged.'
- Summary:** A table showing '4 agents' for '\$415.63' and '1 conversations answered' (356 included) for 'included'.
- Payment:** A section stating 'No card on file.' and explaining that the payment goes straight to the provider. It includes an 'Add a card' button.
- On your invoices:** A note stating 'Each invoice keeps these as they were on the day it was issued, so a change applies from the next one.'
- Marina Bay Properties:** A section for billing address and tax registration number (TRN).

Billing: this month so far, your card, and invoices.

The screenshot shows the 'Billing' section in the PotatoFarm.io application. The top navigation bar is the same as the previous screenshot. The main content area displays the following information:

- Billing:** A section with a 'Print or save as PDF' button.
- Invoice:** A large display of the invoice number **PF-000181**.
- From:** PotatoFarm.io
- To:** Marina Bay Properties, Office 1204, Marina Plaza, Dubai Marina, Dubai
- Issued:** 25 September 2026
- Period:** 27 July 2026 – 26 August 2026
- Due:** 9 October 2026
- Status:** Open
- Description:** Agent seats, 180 seat-days over a 30-day period
- Amount:** AED 594.00
- Conversations:** 0 answered, within the 350 included
- Amount:** AED 0.00
- Subtotal:** AED 594.00
- No VAT charged:** — PotatoFarm is not VAT-registered.
- Total:** AED 594.00

An invoice, ready to print or save.

How to

- 1 **This month so far** shows agents, conversations answered and the running total. You pay per agent per month; conversations beyond the included allowance are charged per conversation.
- 2 **Add a card:** it goes straight to our payment provider and we never see it.
- 3 Enter your billing address and, if you are VAT-registered, your 15-digit TRN.
- 4 Open an invoice to print it or save it as a PDF.

GOOD TO KNOW

- Add someone mid-month and you pay for the days they use. Remove them and it stops the same way.

06

On your phone

The same system in your pocket, built for a thumb.

6.1 Using PotatoFarm.io on your phone

6.1 Using PotatoFarm.io on your phone

AGENTS

Everything works on a phone, in the browser, and it installs to your home screen like an app. Navigation moves to a bar at the bottom, within reach of your thumb: **Today**, **Inbox**, **Diary**, **Pipeline** and **More**.

Today on a phone.

The Inbox.

A conversation.

A person: Call, Message and Next step first.

The board.

More: everything else.

How to

- 1 **Install it:** open PotatoFarm.io in Safari (iPhone) or Chrome (Android), then choose **Share** → **Add to Home Screen** (iPhone) or **Install app** (Android). It opens full-screen from the icon.

- 2 Turn on notifications when asked, so a buyer waiting reaches you.
- 3 In the Inbox, open a conversation; ← **All conversations** takes you back.
- 4 On a person's page, **Call**, **Message** and **Next step** are the first things under the name.
- 5 **More** opens everything else: Leads, Listings, Offers, Deals, Commission, Reports and Settings.
- 6 No signal? You are told you are offline rather than shown a broken page. Anything already saved is safe; try again when you are back.

07

Routines and reference

Checklists for each role, what to do when something looks wrong, and the words we use.

7.1 Routines by role

7.3 Words we use

7.2 When something looks wrong

7.1 Routines by role

Tick through these until they are habit. They are the difference between a CRM that is filled in and one that is used.

Agent: every morning

- ☐ Open Today and work 1 to 5.
- ☐ Clear Reply ready and Handover in the Inbox.
- ☐ Reply to anybody whose window is about to close.
- ☐ Check today's viewings in the Diary.

Agent: after every viewing

- ☐ Record the outcome: came, no-show, and what they thought.
- ☐ Update what they are looking for if it changed.
- ☐ Add a next step with a date.

Agent: when an offer comes in

- ☐ Record it at once, with how they are paying and any conditions.
- ☐ Tell the owner the same day.
- ☐ Watch the expiry on Offers.

Manager: every week

- ☐ Look at Nobody's and Gone quiet on Leads.
- ☐ Check Untouched cards on the Pipeline.
- ☐ Read Reports: response time by hour and by source.
- ☐ Review Deals at risk with the agents on them.

Owner: every month

- ☐ Reports and Revenue: what was earned and what is owed.
- ☐ Mark fees invoiced and received; pay agents' shares.
- ☐ Team: who is joining, who is leaving.
- ☐ Documents: anything due for renewal.

Compliance officer: every week

- ☐ Clear Waiting on a decision on Compliance.
- ☐ Record a reason for every decision, including not filing.
- ☐ Check Reviews due.

7.2 When something looks wrong

A buyer says they never got my message.

Check the reply window on the conversation. After 24 hours without a message from them, WhatsApp accepts a normal message and never delivers it. Use an approved template, or ring them.

The assistant did not reply to someone.

Check the top bar for **Assistant stopped**, the conversation for **I've got this** or **Handover**, and whether the buyer wrote STOP. Past qualification, or once an agent has written, it drafts rather than sends.

A lead went to the wrong agent.

Open the conversation and use **This should have gone to someone else**. It reaches a manager with the routing decision attached.

My sign-in link does not arrive.

Look in Junk or Other. The link lasts ten minutes; request another if it has expired.

A listing is not on the portals.

Check its Trakheesi permit on Listings. Without a valid one it is held back. Check Rejected by a portal at the top.

The Channels screen says a channel can't reply.

Its WhatsApp access token is missing or has expired. Reconnect it with the token from Meta.

I can't open Compliance.

By design. Only the compliance officer can, because telling a client a report has been filed is an offence.

I think a figure is wrong.

Every screen says where its number comes from. Commission is dated by when money arrived; the pipeline is weighted by stage. Ask your manager, or email hello@potatofarm.io.

STILL STUCK?

- Email hello@potatofarm.io from the address you sign in with, and a person will reply.

7.3 Words we use

24-hour window	WhatsApp's rule: a business may send free-form messages only within 24 hours of the customer's last message.
Handover	The assistant has asked for a person to take a conversation.
I've got this	Silences the assistant on one conversation.
Stop everything	Halts the assistant across the whole brokerage, immediately.
Replies while qualifying	The owner's switch that lets the assistant reply to new buyers by itself.
Draft / Reply ready	A reply the assistant has written for an agent to send.
Score (Golden, Hot, Warm, Cold)	How likely a lead is to transact, recalculated every night, with the reasons shown.
Trakheesi	Dubai Land Department's advertising permit. No permit, no listing.
Form F	The sale agreement; its completion date is what a deal is planned back from.
DLD	Dubai Land Department, where transfer happens.
DNFBP	Designated non-financial business or profession: a UAE brokerage concluding a sale is one, with AML duties.
MLRO	Money laundering reporting officer: the compliance officer.
STR / SAR / REAR	Suspicious transaction report, suspicious activity report, real-estate activity report.
PEP	Politically exposed person.
Nurture plan	A timed list of reminders for somebody not ready yet. Nothing is sent by itself.
Blackbook	Your personal contacts and notes. Yours, not the brokerage's.
Baseline	Your reply times before the assistant was switched on, frozen so the difference can be measured.

PotatoFarm.io

Every property enquiry answered in seconds, qualified in the
buyer's own language, and carried through to transfer.
